Dear Wiha customer,
Dear business associate,

» Where are good ideas and innovative solutions created? In practice, where users work. Identifying needs, understanding and implementing these requires not only technical expertise but a view of the complete situation and an eye for details. Wiha customers have been able to rely for more than 70 years on our proximity to the practical world and our feeling for solutions that facilitate work.

We wish to express our gratitude for your trust in our brand, service, quality and solution expertise with many innovative further developments.

This annual catalogue contains a series of new products, for example the new magazine bit holder. The space-saving handle magazine contains a compact exchange bit system for standard bits and slimBits. A new opening mechanism ensures that the user receives the correct bit simply through the push of a button and a lifting function. The new BiCut pliers also demonstrate genuine user proximity. Users gain a doubling in cutting strength by simply pressing a button – 200% BiCut power! The SoftFinish® screwdriver is celebrating its 15th anniversary.

Attractive packaging with optically relaunched displays and elegant stand walls in anthracite ideally complement visual appearances and are transformed into real eye-catchers.

I cordially invite you to discover the new catalogue. Browse, see and wonder about the high diversity and professional quality of our tools, and experience in words and images how our tools are able to make your everyday work even more successful. Finding ideal solutions for you is the philosophy that drives us. Typical in fact for Wiha premium tools.

With best regards,

Wilhelm Hahn

by Innovation

Wiha Services

Orders:

- By phone, fax, email or EDI

Consulting service:

- Field service incl. key accounts everywhere on site
- Internal service can be reached from Mon. – Fri. 7:30 am – 5 pm CET by phone

eBusiness (for catalogue articles):

- Media-neutral database for data export
- eClass classification
- BMEcat Version 1.2

Warranty:

- 5-year warranty on materials and workmanship

Quality level:

- ISO 9001:2008
- Production depth far above average
- Virtually 100% own production

Patents and licenses:

- over 80 trademark rights (patents or registered designs)
- long-term cooperation with licensors guarantees maximum quality and fitting accuracy of tools

Special articles:

- Production of semi-standard and drawing-dependent tools. Just ask us!

Sales aids:

- CD or DVD with article data and photos
- Equipment consulting with sales aids
- Presentation materials

Wiha product innovations.

The clever addition to our assortment.

Tested safety with industrial
quality:
all Wiha VDE tools are individually
tested in a water bath at
10,000 volts according to IEC
60900:2012.

For use with electrostatically
endangered components:
all Wiha ESD tools are equipped
with dissipative handles with a
defined surface resistance of
 $10^6 - 10^9$ ohms.

Silver 2013

Focus Open
Silver 2012

The iF product design award counts as one of the most renowned international design awards and represents both innovation and outstanding design excellence.

The red dot award is one of the most renowned international design awards, featuring one of the world's largest exhibitions of contemporary design.

The "red dot" seal of quality is awarded exclusively to especially creative, innovative and high-quality products.

The Design Center Stuttgart regularly announces the international design award according to a special thematic focus.

Innovation Quality Reliability

Our system of values is reflected in the following areas:

Company

- We develop and manufacture top-quality and highly functional tools which reflect their innovative design.
- We are an independent, family-owned company.
- We are experiencing strong and healthy growth.

Processes

- We optimise internal process by the use of state-of-the-art technologies and concepts.
- We guarantee the highest possible inventory availability and a comprehensive service.
- We enjoy an active and committed collaboration with our customers, sales partners and suppliers all over the world.

Employees

- We are a team, with each member being directly responsible for their own actions, as well as being target and performance-oriented.
- Ongoing training and support strengthen the commitment and qualification of our employees.
- In all our actions, we are fully aware of our responsibility to the environment.

Wiha SoftFinish concept.

Innovative. Timeless. Ergonomics at its best.

product
design
award

1997

Fraunhofer
Institut
Arbeitswirtschaft und
Organisation

With its innovative handle concept, Wiha designs for the hand. Existing handle designs available on the market are not ergonomically designed with the constancy of human hands in mind. The handle sizes are created by scaling a basic style. This causes disadvantages for users when guiding the tool or transmitting torque.

Wiha is breaking new ground and designing its handle to suit the constancy of all hands.

Thanks to four different SoftFinish® handle sizes, the basic requirements for fastening are fulfilled ideally. Thus, each Wiha handle provides a perfectly correlated ratio of guidance, speed and torque for any task.

Special practical conditions result for

- **quick turning:** consistent consideration of motor skills
- **maximum power transmission:** Comfortable and loss-free transmission of physical strength, even for intensive fastening.

Power-turning and quick-turning zones (length) are integrated in the four handle sizes in various forms.

Handle design adapted to screw sizes.

Dynamic

Design features for turning speed:

- Small quick-turning zone with circular cross-section for fast turning at the beginning of the handle
- Extended slim handles with tapered handle ends for stable guidance
- Perfect for sensitive fastenings

Power

Design features for power transmission:

- Power turning zone with extra large, octagonal cross-section for comfortable maximum power transmission
- All the fingers are positioned on the handle and add to power transmission
- No painful edges
- Ideal for large screws with a high torques

Wiha SoftFinish®.

Tangible advantages.

product
design
award

1997

Fraunhofer Institut

Organisation

Wiha SoftFinish®.

Quick-turning zone

- Safe, fast turning between the thumb and index finger
- Perfect guidance thanks to tapered handle end
- Long, slim handles
- Circular cross-section

Power turning zone

- Comfortable maximum power transmission
- All fingers can be placed on the handle
- No painful edges
- Large, octagonal cross-section

Long lifespan:

Through hardened blade of chrome-vanadium-molybdenum steel

Perfect fit in the screw head:

Precisely manufactured tip

Durable corrosion protection:

Chromed surface

Fast tip identification:

Cap imprint for tip and size

No complaints even after intensive use, no pressure marks, calluses, or blisters:

Burr-free and offset-free

Optimal material distribution:

The position of the soft and hard zones also supports the perfect grip for quick and powerful turning

Optimal for scanning:

EAN code on each article

Work safety:

Dual roll-off protection

product
design
award

1997

The right tool at a glance, thanks to the printed screw symbol on the handle end.

The Wiha SoftFinish® zone features a solid moulded core with soft outer grip. This requires less force, yet achieves 40% more torque than conventional handles. The handle is shaped to fit comfortably in the hand, providing maximum through forces in dry working conditions.

If a stuck screw has to be loosened, a precise hammer blow can be applied to the solid steel cap. Due to the hex blade extending through the handle to the steel cap, there is no loss of impact energy.

The solid steel cap at the end of the SoftFinish® handle enables controlled hammer blows, for example, when loosening a tight screw.

Due to the solid steel cap and hex blade extending through the handle, there is no loss of impact energy when a precise hammer blow is applied.

Blade with hex bolster for wrenches to use on particularly tight screws.

Wiha SoftFinish®.

- Multi-component SoftFinish® handle provides maximum user comfort
- Ergonomically perfect handle design
- Printed screw symbol on handle end for fast identification
- Available in versions with round blade, hex blade or hex blade with solid steel cap
- Blade made of high quality CVM-steel, through-hardened and chrome plated
- Wiha ChromTop®-finish on tip for a perfect fit every time

For slotted screws.

**302** SoftFinish® slotted cabinet screwdriver.**Round blade.**

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.

Wiha Info

**Wiha TORX® MagicSpring®.**

Because of the "MagicSpring®" retaining spring made of stainless steel, TORX® screws are held securely in place. An innovation, which will convince each user.

Wiha MicroFinish.

The specialist for wet and oily applications.

The non-slip handle is made from cellulose acetate and has a micro-fine surface structure. This gives maximum torque transmission and perfect handling in wet and oily work surroundings.

Optimum power transfer, even with very oily hands! Wiha MicroFinish screwdrivers stand for contemporary handle design, together with the ideal combination of materials for wet and oily applications.

The micro-fine surface of the finish zone made of sandblasted cellulose-acetate ensures maximum power transfer and provides an effective non-slip grip, even with very oily hands. The roll-off protection in the front area of the handle prevents the tool from rolling off the workbench. The screwdriver is also available with a solid steel cap for loosening tight screws with a single hammer blow. As the steel cap is connected to the blade, the entire energy from the impact is transmitted to the screw head without damaging either the handle or the blade.

The MicroFinish hex blades

with ChromTop® tip are made of highquality chrome-vanadium-molybdenum steel, are through-hardened and chrome-plated. This guarantees a particularly long tool life.

Wiha's MicroFinish screwdrivers are ideal for automotive applications, for use on building sites or when working with sanitary installations. However, they can also be used to perform repairs to machinery and equipment where oil and lubricants pose potential problems.

The hex blade and hex bolster model with solid steel cap is ideal for loosening tight screws.

Wiha MicroFinish.

- Micro-fine handle surface for a non-slip grip in an oily working environment
- Ergonomic handle shape fits every hand
- Blades made of high-quality chrome-vanadium-steel, through-hardened and chrome-plated for a long tool life
- Wiha ChromTop® blade tip sits securely in the screw head and offers great dimensional accuracy

For slotted screws.

Wiha Info

**Wiha MicroFinish®.**

Due to the sandblasted surface, oil and moisture flow away from the handle surface for a powerful, non-slip grip – a maximum force and comfort with dry, oily or wet hands is ensured.

The ergonomic handle shape ensures also exceptional torque transfer.

Wiha MicroFinish®.

Wiha Classic.

The classic for a range of uses.

The Wiha Classic, resistant to chemicals and oils, impact resistant and cadmium-free – and also copes with a few hammer blows.

The Classic screwdriver from Wiha proves its reliability on a daily basis in a wide variety of applications. Its robust handle of high quality plastic is impact resistant, shatter-proof and recyclable.

Users appreciate its versatility and high quality, which is also conveyed by the hardened chrome-vanadiummolybdenum steel blade.

Wiha Classic – the robust and diverse square handle.

The slender Classic even fits into the narrow pockets of work trousers.

Wiha Classic.

- Universal use, and successful for many years
- Robust, large-surface handle made of impact-resistant plastic material, chemical and oil-resistant
- Smooth handle surface allows easy cleaning
- Wiha ChromTop®-finish on tip for a perfect fit every time

For slotted screws.

**186** Classic slotted screwdriver.**Round blade.**

Blade: Chrome-vanadium steel, through hardened, nickel-plated.
Tip and blade width identical up to size 6.0.

Handle: Impact resistant Wiha Classic handle, resistant to chemicals and oils.

Application: For universal use in trade and industry.

Extra: Series includes extra long dimensions for screws that are difficult to access.

Wiha Info

Reamers and awls are also available with wood handles, see page 35.

Wiha wooden handle.

The all-rounder for woodworking applications.

The Wiha wooden handle is made of untreated, sealed beechwood.

Its hex bolster and specially developed handle profile underlines its professional claim. This is expressed through the blade that extends to the end of the handle. This enables the user to loosen tightened screws with a hammer stroke, since the through blade conducts energy from the hammer stroke directly to the screw.

The handle end of the screwdriver is protected against damage by a high-quality, robust leather cap.

Wiha wooden-handle screwdriver – the allrounder made of beech is particularly suitable for all woodworking applications.

The through-blade, hex bolster and leather cap are the professional features that are particularly prized by users.

With hex bolster for greater torque transfer.

Wiha wooden handle.

- Handle made of sealed beechwood
- High torque can be transmitted even on the tightest screw with the help of the hex bolster for wrenches
- Blade extending through handle transmits the energy of the hammer stroke directly to the tightened screw
- Handle end protected with high-quality leather cap
- Precision blade tip, blade material of chrome-vanadium steel

For slotted, Phillips and Pozidriv screws.

**162** Wooden slotted screwdriver.**Round blade with hex bolster.**

Blade: Chrome-vanadium steel, through hardened, nickel-plated.
From size 5.5, blade extends through handle. Anti-cam-out ribs, hex bolster.

Handle: Wiha wooden handle made of sealed beech wood, handle end protected with high-quality leather cap.

Application: For all applications in woodworking and furniture industries.

Wiha PicoFinish.

The comfortable precision screwdriver.

Screw symbols printed in white on the rotating cap make it easier to identify each screwdriver.

The PicoFinish is distinguished by top-quality materials and an ergonomic handle design. The comfortable precision screwdriver with multi-component handle, rapid rotating zone and easy-movement rotating cap is a professional tool for all precision work for confined screw applications. To make things even easier for the user working with tiny screws, we've developed a second, smaller handle. The colour-coded marking of the drive symbol on the rotating cap is also new. This makes it easier to recognise the individual screwdrivers when several are being used at once.

The blades are made of top-quality chrome-vanadium-molybdenum steel to ensure a particularly long tool life. They are subsequently through-hardened in a controlled process and chrome-plated. The

precise ChromTop® tip ensures a secure hold in the screw head.

The smooth-running turn-cap protects the palm of your hand.

Wiha PicoFinish.

- Ergonomic handle design with soft zone for comfortable work
- Easy-movement rotating cap for rapid hand action
- The white imprint of the screw symbol eases recognition
- Through-hardened, chrome-plated blade made of chrome-vanadium-molybdenum steel for a long tool life
- Wiha ChromTop® tip guarantees a secure hold in the screw head
- Ideal for all fine, filigree applications in electronics and precision-mechanics applications, as well as for DIY and model-building

For slotted and Phillips screws.

**260P** PicoFinish slotted screwdriver.**Handle with rotating cap and rapid-turning zone.**

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.

Wiha ChromTop® finish on tip for a perfect fit every time.

Handle: Wiha PicoFinish handle for sensitive and fast screw fixing.

Application: Ideal for fine and delicate fastening tasks for electronics, precision mechanics, model-making and hobby activities.

Wiha universal scraper.

Easily removes sealing, paint and glue.

The razor sharp blade quickly removes sealing, paint and glue.

The Wiha universal scraper is the optimal tool to quickly and easily remove seals, paint, glue and labels from glass and metallic surfaces.

The universal scraper is a robust tool with an ergonomic SoftFinish® multi-component handle. Due to the special handle shape ultimate user comfort is provided. The high quality blades have a very long life. If a blade change is necessary, it can be done quickly and easily using the unique blade changing device.

The Wiha universal scraper is a tool which should be present in every professional toolbox. It also makes life easier for every home worker.

The Wiha universal scraper can be used for the easy removal of gasket remains.

Wiha universal scraper.

- Removes quickly seals, paint, glue and labels
- High-quality blades have a very long life
- Square blade geometry, ideal for corners and edges
- Unique blade changing device ensures easy blade change
- Ergonomically shaped SoftFinish® multi-component handle for maximum user comfort

2011

The right tool at a glance, thanks to the printed screw symbol on the handle end.

slimTECHNOLOGY

Applications on live equipment are subject to very special requirements. The focus is on absolute user safety and Wiha demonstrates this with a wealth of details.

The high quality blade insulation is moulded directly onto the blade and therefore guarantees safety when working on live equipment up to 1,500 V DC / 1,000 V AC. To maintain this safety, each screwdriver of the SoftFinish® electric series is individually tested in a water bath at 10,000 Volts according to IEC 60900:2012.

The roll-off protection and the special handle geometry offer optimum handling and electrical safety, even in critical applications.

slimTECHNOLOGY:
Up to 33% reduction of the bit diameter in the critical working area allows effortless access to low-lying fastening/spring elements.

Wiha SoftFinish® electric slimFix.

- Unlimited access
- Blades up to 33% narrower due to integrated insulation
- Tool for spring clips (wedge-profiled output geometry)

**Safety Notice:**

When working with VDE tools, observe the national safety and accident prevention regulations!

**For slotted, Phillips and Pozidriv screws.****3201 SoftFinish® electric slimFix slotted screwdriver.**

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Protective insulation moulded directly onto the blade and completely integrated into the blade in the lower area.

Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.

Standards: DIN ISO 2380.
Manufactured acc. to IEC 60900:2012.

Application: For all work on or around electrical components up to 1,000 V AC.

Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.

Wiha Magazine Bit Holder LiftUp electric.

With 6 slimBits.

A clever solution: 2 rockers pressed simultaneously unlock the bit depot

Turnable cap: Convenient way to add additional axial force

The magazine bit holder LiftUp electric is the latest development in the successful slimVario product line: a compact magazine bit holder which accommodates 6 common slimBits. This makes this tool the ideal companion for use on the move of any electrician.

Pressing both rockers extends the bit depot out of the magazine and provides all slimBits in a fanned-out presentation. Thus, removing and re-inserting individual slimBits is child's play. The proven ClicFix bit holder securely accommodates all the bits, locks them reliably and makes this tool a magazine which is suitable for universal use. The turnable cap is a further advantage. The required axial force can be built up by vigorously pressing the cap. The second hand is used to turn it along the longitudinal axis.

The magazine provides the maximum possible safety. In addition to the individually tested slimBits, the magazine is also completely VDE-GS certified. This means twice the safety for users.

In addition to their main application in the electrical field, these bits can also be used for mechanical fastening.

Each slimBit can be removed from the depot and re-inserted easily and conveniently

Wiha Magazine Bit Holder LiftUp electric.

- **Light and universal**
Ideal for use on the move
- **Does the job of 6 screwdrivers**
All common drives are always at hand
- **Turnable cap**
Convenient way to add additional axial force
- **Durable**
Internal metal construction ensures bit holder doesn't wear
- **Maximum safety:**
slimBit and magazine bit holder LiftUp electric are individually VDE-GS certified according to IEC 60900:2012

Safety Notice:

For work in the area of live parts up to 1,000 V AC! 6 mm VDE exchange bits should be used only with the hand-held screwdriver supplied! When working with VDE tools, observe the national safety and accident prevention regulations!

For slotted and Phillips screws.

NEW
2831 09 020 Magazine Bit Holder LiftUp electric with 6 slimBits.
 Doubled safety: slimBits and magazine are individually VDE-GS tested.

Blade: Chrome-vanadium steel, through-hardened.
 Insulation moulded directly onto blade.

Handle: Wiha SoftFinish® electric multi-component handle with roll-off protection.
 Internal magazine accommodates 6 common slimBits.
 Upon opening the magazine holder fans out enabling easy removal of slimBits.
 Turnable cap for comfortable handling.

Bit holder: Insulated metal ClicFix bit holder locks all slimBits reliability.
 Easily turnable guide sleeve provides support when fastening.
 Suitable for 6 mm slimBits only.

Application: Compact magazine screwdriver for electrical applications, especially for mobile applications.

Attention: Not for use with bit styles C 6.3 and E 6.3.

slimTECHNOLOGY

The perfect combination of functional bits, handy holders and maximum safety standards! The Wiha slimBits and SoftFinish® hand-held screwdriver were especially developed for mobile applications at various locations, e.g. building sites, solar systems or external switch cabinets. Perfect for the job with its light weight and compact geometry.

Its slim design and especially the protective insulation integrated into the bit means highly diverse applications. It can be used both as a mechanical and electrical fastening tool. The bit holder manufactured from metal parts gives the tool a long service life and an unusual level of ruggedness for everyday use. Added to that is an assortment of commonly used exchange bits and the pleasant SoftFinish® handle.

For all those unwilling to compromise in terms of safety and comfort.

slimTECHNOLOGY:
Up to 33% reduction of the bit diameter in the critical working area allows effortless access to low-lying fastening/spring elements.

Safety Notice:

For work in the area of live parts up to 1,000 V AC! 6 mm VDE exchange bits should be used only with the hand-held screwdriver supplied! When working with VDE tools, observe the national safety and accident prevention regulations!

Wiha SoftFinish® electric slimVario.

- **Slim - light - mobile**
Ideal for taking along
- **Durable**
Internal metal construction ensures bit holder doesn't wear
- **Gets everywhere**
Even in small apertures and low-lying fastening and spring elements
- **A firm hold**
Optimal interplay of bit and holder
- **Certified quality**
GS mark for inspected safety, one-off testing in a water bath at 10,000 V according to IEC 60900:2012

**Warning:**

6 mm slimBits only to be used in the slimVario bit holder and slimTorque VDE bit holder (VDE torque system).

Wiha SoftFinish® electric slimVario.

Maximum safety at minimum size.

SoftFinish® electric slimVario sets.

1000 V
IEC 60900:2012

2831 T704 slimVario starter set, 7-pcs.

Important slimBits in a bag.
Slotted/ Phillips.

Handle: Wiha SoftFinish® electric multi-component handle with roll-off protection.
Bit holder: Insulated metal ClicFix bit holder locks all slimBits reliability.
Only for 6 mm slimBits.

Bits: High-quality chrome vanadium steel, through-hardened, bronzed.
Protective insulation moulded directly onto the bit and completely integrated into the bit in the lower area.
Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Application: For all work on or around electrical components up to 1,000 V AC.

Extra: Effortless access to low-lying fastening elements. Arranged clearly in a high quality, rugged and durable bag.

Wiha SoftFinish® electric.

- Safety when working with live equipment up to 1,000 V AC and 1,500 V DC
- Each screwdriver is individually tested in a water bath at 10,000 volts according to IEC 60900:2012
- Awarded the GS symbol for tested safety
- Multi-component SoftFinish® handle provides maximum user comfort

Applications on live equipment are subject to very special requirements. The focus is on absolute user safety and Wiha demonstrates this with a wealth of details.

The high quality blade insulation is moulded directly onto the blade and therefore guarantees safety when working on live equipment up to 1,500 V DC/ 1,000 V AC. To maintain this safety, each screwdriver of the SoftFinish® electric series is individually tested in a water bath at 10,000 Volts according to IEC 60900:2012.

The roll-off protection and the special handle geometry offer optimum handling and electrical safety, even in critical applications.

Wiha SoftFinish® electric Xeno.

For terminal screws.

The SoftFinish® electric Xeno screwdriver is a special VDE screwdriver used to turn terminal screws. Terminal screws are typically used in switch-cabinet systems and fuse boxes, terminal blocks and relays.

They have a special combination profile and are available as slotted/Phillips or slotted/Pozidriv models.

The Wiha SoftFinish® electric Xeno is ideally suited for work on switch cabinet systems, fuse boxes, terminal strips and relays.

Wiha SoftFinish® electric Xeno.

- The special slotted/ Phillips or slotted/ Pozidriv profile of the Xeno is optimally suited for terminal screws
- The combination profile reduces slipping and ensures greater torque transfer

**Safety Notice:**

When working with VDE tools, observe the national safety and accident prevention regulations!

**For terminal screws (slotted/ Phillips).**

Wiha Topra 2K electric.

Pure power for electrical applications.

Finely serrated ratchet with 72 teeth enables 5° switching angle: guarantees precise work when things get tight.

The turbo wheel in use

The new Topra 2K electric pistol handle for electrical applications is especially advisable whenever large screwed connections have to be fastened. This is because the transmission of force can be axial when using a tool of this type due to its shape, and because the lever arm can be used to produce up to 20 Nm torque comfortably. This handle geometry is supported by a finely serrated ratchet with 72 teeth which enables a small switching angle of just 5°. In connection with the very low range of motion, all screwed connections (from the smallest to the largest) can be moved, even in extremely tight spaces.

The soft and hard zones are distributed across the handle according to the grip requirements of the hand and fingers in order to optimise the transmission of force to the handle. Thanks to the ergonomic design of this tool, it can be used to work with either a 2-finger grip or a hand clasp:

- **2-finger grip** when work has to be done quickly, e.g. when fastening long screws
- **Hand clasp** when the tightening or loosening requires increased torques.

Equipped with the special VDE blades, this tool fulfils the most demanding requirements of IEC 60900:2012

Wiha Topra 2K electric.

- **Powerful:**
Ergonomic pistol handle for high torques.
- **Without losses:**
Axial transmission of forces – without breakdown torque
- **Comfortable:**
Maximum transmission of force due to soft and hard zones which are adapted to the users palm
- **Fast:**
Finely serrated ratchet with 72 teeth enables 5° switching angle which works precisely when things get tight.
- **Innovative:**
Turbo wheel for fast turning of metal screws

**Safety Notice:**

When working with VDE tools, observe the national safety and accident prevention regulations!

**Topra 2K electric pistol ratchet.**

1000 V
IEC 60900:2012

Torque TR electric interchangeable blade, hex.

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, black-finish. Insulation moulded directly onto blade and completely integrated into the blade in the lower area.

Standards: Manufactured according to IEC 60900:2012.

Application: For all work on or around electrical components up to 1,000 V AC.

Wiha PicoFinish electric.

The new ergonomic Wiha PicoFinish electric precision screwdriver has protective insulation on the bronzed blade which is certified in accordance with VDE-GS and individually tested for breakdown in a water bath at 10,000 V. Because of this, this new family expands the application possibilities of VDE-GS tested fastening tools with tools for smaller screw sizes. These are necessary especially when settings should be made on live electrical or electronic components. Sensitive turning is particularly easy due to its octagonal profile at the beginning of the quick-turning zone.

A further advantage: This tool eliminates the risk of accidentally touching live parts with a blank blade and causing a short circuit.

- Ergonomic handle design with soft zone for comfortable work
- Through hardened, bronzed blade of chrome-vanadium-molybdenum steel for a long lifespan
- Protective insulation spray-coated directly onto the blade
- Safety when working with live equipment up to 1,000 V AC and 1,500 V DC
- Each screwdriver is individually tested in a water bath at 10,000 volts according to IEC 60900:2012
- Ideal for all fine and delicate work in electrical engineering and electronics

Wiha Volt Detector.

Testing pen for AC voltages.

The testing pen detects the phase and neutral conductor

Press down the clip, and the battery compartment locking mechanism opens

The Wiha Volt Detector is a measuring device to test the presence of AC voltage safely. For this purpose, the white tip is guided to the wire or contact to be tested. If the sensor detects AC voltage within a field of 4 mm, the red LED lights up immediately.

A particular advantage is that this test can be performed without having to disconnect or open cables, mains sockets, fuses, circuit breakers, junction boxes, etc.

A current flow through the user's body is not necessary for the reliable use of the testing pen. The power for operating the red LED is provided by 2 AAA batteries (LR03) that are included in the delivery

Wiha Volt Detector.

- Testing pen detects AC voltages from 230 to 1,000 V AC
- A bright red LED indicates AC voltages
- A current flow through the user's body is not necessary
- Complies with IEC 61010-1 safety standard: Measuring category CAT III 1,000 V
- CE compliant.

Volt Detector.

NEW

255-12

Volt Detector: Non-contact measuring voltage tester for AC voltages from 230 to 1,000 VAC.

- Scale: Bright red LED.
- Handle: Handy plastic housing with removable cap. Practical clip.
- Torque transducer: Protected under the white tip, the sensor provides non-contact recognition of AC voltages within a field of 4 mm.
- Standards: IEC 61010-1
- Measuring category: CAT III 1,000 VAC.
- Application: For determining AC voltages in the low voltage range between 230 and 1,000 VAC.
- Extra: 2 AAA batteries (LR03) are inserted in the voltage tester.

Wiha SoftFinish® ESD.

For use on electrostatically sensitive components.

EPA

Wiha SoftFinish® ESD screwdrivers have a surface resistance of $10^6 - 10^9$ ohms.

The SoftFinish® ESD screwdrivers feature an impressive and ergonomic multi-component handle.

For work on electrostatically sensitive devices and assemblies, there is no better screwdriver than the Wiha SoftFinish® ESD, with integrated soft zone in the multi-component handle. The dissipative handle with a surface resistance of $10^6 - 10^9$ ohms discharges the electrostatic energy in a controlled manner to protect devices at risk from electrostatic discharge.

The ergonomic handle form was developed from the basis of extensive scientific investigations in cooperation with the Fraunhofer Institute. The result is a multi-component handle with a seamless outer form. Each hand size adapts perfectly to screwdriver, there are no pressure points while working and loading of the finger joints is minimised.

The hard handle core consists of impact resistant polypropylene. The thermoplastic elastomer handle provides for a pleasant, safe and slip-proof grip. The inseparable handle is connected to the core by a moulding process. The high-quality blade of chrome-vanadium- molybdenum steel is through hardened and mattechrome plated. The Wiha ChromTop® blade tip ensures a perfect fit in every screw head.

Wiha SoftFinish® ESD screwdrivers correspond to the internationally specified ESD standards IEC 61340-5-1.

Wiha SoftFinish® ESD.

- Dissipative handle designed to discharge uniformly, surface resistance $10^6 - 10^9$ ohms
- Meets ESD standard IEC 61340-5-1
- Ergonomic SoftFinish® multi-component handle guarantees comfortable work and optimised handling
- Blade made of high-quality CVM steel, through hardened and chrome plated
- Wiha ChromTop® blade tip ensure a perfect fit in every screw head

**Safety Notice:**

Wiha ESD screwdrivers are noninsulated, therefore not suitable for working on live parts.

**For slotted, Phillips and Pozidriv screws.****For slotted, Phillips and Pozidriv screws.****302ESD**

Safety Notice:

Wiha ESD screwdrivers are noninsulated, therefore not suitable for working on live parts.

Wiha Precision ESD.

The static dissipative precision screwdriver.

EPA

Wiha ESD precision screwdrivers with the successful handle geometry. Due to the surface resistance of $10^6 - 10^9$ ohms, defined electrostatic discharge is guaranteed.

The rotating cap with contact area makes incremental adjustment quick and easy.

Electrostatic discharges are a major problem, since even low voltages can damage sensitive components.

Various factors have to be considered in order to understand the problem. In ESD protection areas, the electrostatic charge is safely conducted to earth. Users have to wear the appropriate ESD footwear or grounded wrist strap. The tools used also have to be electrostatically protected.

The ESD screwdrivers from Wiha conform to the international ESD Standards IEC 61340-5-1. Due to the electrical surface resistance, $10^6 - 10^9$ Ohm, defined electro-

static discharge is guaranteed. Thanks to the rotating cap, incremental adjusting is easy. The large handle enables powerful tightening and loosening of screws.

The dissipative Precision ESD - for working on electrostatically sensitive components.

Wiha Precision ESD.

- Dissipative handle designed to discharge uniformly, surface resistance $10^6 - 10^9$ ohms
- Meets ESD standard IEC 61340-5-1
- Rotating cap with large surface for extra fast working
- Large handle end for powerful tightening and loosening screws
- Wiha ChromTop®-finish on tip for a perfect fit every time

Wiha Precision ESD.

The static dissipative precision screwdriver.

For slotted, Phillips and Pozidriv screws.

272 Precision ESD slotted screwdriver.

Dissipative handle, ESD-safe.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.

Wiha ChromTop® finish on tip for a perfect fit every time.

Handle: Precision handle with rotating cap, surface resistance $10^6 - 10^9$ ohms.

Standards: IEC 61340-5-1.

Application: For working on electrostatically sensitive components.

Wiha Ceramic.

The non-static adjustment tool for clean rooms.

The Wiha Ceramic precision screwdrivers with blades made of high-tech zirconium ceramic are the perfect tools for all applications in clean rooms and for delicate electrostatic components. In these areas there are high requirements in terms of eddy-current losses.

The ceramic blades and handles are completely antimagnetic and anti-static. This is a fundamental requirement for working with highly sensitive components, such as capacitors, solenoids and various

resistances. The ceramic blades are resistant to mechanical wear, acid corrosion and thermal shock stress. Wiha Ceramic screwdrivers are available with slotted and Phillips tips, as well as in a set.

With centring head and quick-turning zone for optimum handling.

The ceramic blade and handle are completely anti-magnetic and anti-static.

Wiha Ceramic.

- Ideal for adjusting electrical components
- Suitable for working in clean rooms
- Anti-static and anti-magnetic handle and blade
- Rotating cap for easy working
- Resistant to mechanical wear, thermal shock stress and acidic corrosion

For slotted and Phillips screws.

270 Ceramic slotted screwdriver.

Non-static adjustment tool with ceramic blade.

Blade: Made of high-quality special ceramic, anti-static/ anti-magnetic.

Handle: Wiha Proturm® Precision handle with rotating cap, anti-static/anti-magnetic.

Application: Specially designed for tuning and adjusting high frequency devices, suited to cleanrooms.

Wiha torque screwdrivers.

Exact and with high repeat precision.

A convincing concept.
The exact torque!

This is more and more vital for accurate and efficient work, especially when such accuracy must be maintained and repeated, as with fastening and unfastening sensitive and expensive components, in assembly or in final inspections

and quality assurance applications. These are all perfect tasks for the new Wiha torque tools with their ergonomic handles, a unique interchangeable blade system and practical problem solutions.

Torque specialist

- Long-term application experience
- Comprehensive range
- Innovation down to the smallest detail
- Single unit adjustment based on customer specifications

Wiha Services – Calibration and Co.

- Wide spectrum of recalibration services
- Quick, competent processing
- Repeat precision and reliability

A wide spectrum of products / services

- Industry, ESD and VDE applications

Highest quality standards and latest production technology

- Individual unit testing with calibration certificate
- Individual unit designation with identification number

Perceptible ergonomics

- Award-winning Wiha handle size concept
- Comfortable multi-component handles

Wiha torque screwdrivers.

Quality is the guiding principle

- Use of innovative materials for maximum service life
- Complies with all common standards
- Torque accuracy $\pm 6\%$ of the pre-set scale value
- Maximum precision with special calibration and labelling systems

Innovation down to the smallest detail

- Simple, intuitive operation
- Distinctly audible and perceptible click signal
- Numerical, stepless display of torque values enable rapid identification without reading errors
- Limited loosening and tightening torque

The right tool for every application

- Wide product assortment: Industry, ESD and VDE
- User-oriented development of problem solutions
- Flexible exchange blade system with colour coding

Wiha torque screwdrivers.

Diverse areas of application in trade and industry.

New materials – sensitive electronic components in extremely tight spaces – automated processes in production technology – just a few of many examples that illustrate how rapidly industrial and trade applications are developing. The demands for correct fastening of

components also grow with these changes. Only in this way for example is it possible to eliminate protection from humidity or the danger of damage to materials in production processes.

Industrial applications:

Industrial installations

Using torque tools is vital to assure an uniformly high quality in manufacturing.

Fastening of indexable cutter inserts

In the metal cutting industry, great importance is attached to process safety. When changing indexable cutter inserts, this can only be ensured by using torque tools.

Sensitive fastenings in the ESD protected zone

Printed circuit boards and electronic semiconductor components react extremely sensitively to mechanical loads. The correct torque guarantees secure installation of cost-intensive materials.

Circular plug connector - protection class IP67

For correct functioning of distributions systems on machines, the correct torque must be observed when connecting the circular plug connectors. Otherwise the protection class IP67 cannot be complied

Smartphones and Co.

Today's electronic devices are always smaller and more efficient. This makes smaller screws necessary which are fastened in sensitive materials such as plastic. Without the correct torque, these screws are damaged or the plastic

Trade applications

Type-tested switching devices

For type-tested switching devices, the torque to be observed is specified by all manufacturers to prevent the formation of glowing contact areas.

Installation of glass elements

Particularly for materials such as glass which react sensitively to pressure and tension, fastening with the recommended torque is a prerequisite.

Electrical devices in outdoor areas

This type of device must be protected from penetrating humidity and are e.g. subject to the protection class IP67. In order to ensure this, all housing screws must be tightened with the torque according to man

Solar technology

Overtightened screws can damage the sensitive photovoltaic modules. In contrast, secure fastening cannot be guaranteed with screws which are not tightened enough.

Composite materials

The use of new materials such as carbon make using torque tools vital. The carbon structure is damaged by the incorrect torque during fastening. Because of this, the material no longer withstands the requirements.

"i" as in "intelligent" - the iTorque

Mechatronic version, highly precise and convenient to use - the intelligent iTorque screwdriver sets new standards in the torque world.

Technology down to the smallest detail

iTorque, superior design from A to Z. Operation could not be simpler or more efficient: the required value on the display is rapidly set with the setting wheel at the handle end, completely without tools.

The digital display impresses with a clear display: no more reading errors, but simple, individual setting options. Especially practical: A short click and all units are switched over according to needs (Nm 1 in.lb)

The plastic metal compound handle also convinces: with perceptible ergonomics, high quality robust materials and optimal distribution of soft zones. And of course handle sizes optimally matched to specific torque ranges.

Modern, efficient testing equipment monitoring: All applications count!

iTorque also sets new quality assurance standards. Its integrated counter records all applications and shows their actual number. An integrated alert function promptly reminds the user of the pre-specified calibration cycle that can be individually set with ordering.

And for practical purposes that means: the calibration interval can be optimally matched to the number of applications according to user and application.

Further practical details round off the profile of the all-rounder: with the test equipment marking that cannot be lost and that can be freely specified, each iTorque becomes a unique object. And thanks to the interchangeable blade system the blades of all Wiha torque screwdrivers can be randomly changed.

All in all: innovative mechatronics paired with sophisticated operating comfort.

The new iTorque.

Wiha iTorque.

- Mechatronic technology
- Nm-setting shown on digital display
- Click control
- Display indicates when calibration is necessary
- Release accuracy $\pm 6\%$

iTorque with scale.

TorqueVario®-S sets.

2852 S10 TorqueVario®-S Torque screwdriver set, 13 pcs.

Torque value can be set via window scale.

With bit universal holder and 10 Phillips/ Pozidriv/ TORX®/ hex Standard bits.

- Handle: Model 1.0-5.0 Nm.
Torque infinitely adjustable with Torque-Setter setting tool (also supplied).
Ergonomic multi-component handle, particularly light and compact.
Audible and perceptible click when the pre-set torque has been attained.
- Standards: EN ISO 6798, BS EN 26789, ASME B107.14M.
- Accuracy: $\pm 6\%$, traceable to national standards.
- Application: For applications where recommended torque settings are important.
Supply in robust box.
- Extra: Incl. works inspection protocol.

TorqueFix® and Torque cable key.

**2850** TorqueFix® torque screwdriver.

With a fixed torque value pre-set by Wiha.
Automatic release.

- Handle:** Ergonomic multi-component handle, particularly light and compact. Handle sizes proportioned to optimise torque setting. Audible and perceptible click when the pre-set torque has been attained. Compatible with all blades of the 2859 series.
- Standards:** EN ISO 6798, BS EN 26789, ASME B107.14M.
- Accuracy:** ±6%, traceable to national standards.
- Application:** For applications where recommended torque settings are important. Use in combination with a Wiha torque interchangeable blade.
- Extra:** Delivered in practical plastic box, incl. factory calibration certificate.
- Note:** The below articles are available from stock. Further articles with pre-set, customer torque values of between 0.15 and 8 Nm are available on request. Bit holders or blades are not included in delivery.
- Individual:** Products can be designed individually using the configurator at mytorque.wiha.com. (Can be chosen freely: text field, torque unit, torque value)

slimTECHNOLOGY

TorqueVario®-S VDE. Completely certified VDE torque system.

The TorqueVario®-S VDE with integrated scale in combination with the slimTorque VDE bit holder and slimBits offer controlled tightening of screws with simultaneous user safety fo

slimTECHNOLOGY:
Up to 33% narrower bits ensures unimpeded access to low-lying fastenings/ spring elements in the critical working area.

In type-tested switchgear systems, the torque to be observed is specified by all manufacturers.

Wiha Torque VDE screwdrivers.

- Clearly audible and perceptible click on attaining the pre-set torque
- Torque accuracy $\pm 6\%$ of the pre-set scale value
- Delivered with factory calibration certificate
- Safety when working with live equipment up to 1,000 V AC and 1,500 V DC
- Fulfills all accuracy requirements as defined by EN ISO 6789, BS EN 26789 and ASME B 107.14M

Wiha slimTorque VDE bit holder.

- Absolute safety even if mistakes are made: no metal connection between the bit holder and blade tang

**Safety Notice:**

When working with VDE tools, observe the national safety and accident prevention regulations!

**TorqueVario®-S VDE. slimTorque VDE bit holder.**

with scale

**2872****TorqueVario®-S VDE torque screwdriver.**

Insulation up to 1,000 V AC, GS-mark.

Torque value can be set via window scale. Automatic release.

- Handle: Torque infinitely adjustable with Torque-Setter setting tool (also supplied).
Ergonomic multi-component handle, insulation up to 1,000 V AC, GS mark.
Handle sizes proportioned to optimise torque setting.
Audible and perceptible click when the pre-set torque has been attained.
Compatible with all blades of the 2831 series in connection with the bit holder (2879 series).
- Standards: Manufactured acc. to IEC 60900:2012.
EN ISO 6798, BS EN 26789, ASME B107.14M.
- Accuracy: ±6%, traceable to national standards.
- Bit holder: slimTorque VDE bit holder (included in delivery) for 6 mm slimBits.
- Application: For controlled fastening on live parts up to 1,000 V AC, for use only in combination with a slimTorque VDE bit holder for 6 mm slimBits.
- Extra: Delivered in practical plastic box, incl. factory calibration certificate.
- Individual: Products can be designed individually using the configurator at mytorque.wiha.com. (Can be chosen freely: text field, torque unit)

Wiha Torque VDE screwdrivers.

slimBits.

2831-10

SoftFinish® electric slimBit, slotted.

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: Manufactured acc. to IEC 60900:2012.

Material: High-quality chrome vanadium steel, through-hardened, bronzed.
Protective insulation moulded directly onto the bit and completely integrated into the blade in the lower area from size 4.0.

Application: For all work on or around electrical components up to 1,000 V AC.

Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.
The slim form of the bit allows easy reaching of the screws below the finger and hand guards.

Attention: 6 mm slimBits only to be used in the slimVario bit holder and slimTorque VDE bit holder (VDE torque system).

**Safety Notice:**

When working with VDE tools, observe the national safety and accident prevention regulations!

**slimBits.**

2831-17 SoftFinish® electric slimBit, square (Robertson).
Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: Manufactured acc. to IEC 60900:2012.

Material: High-quality chrome vanadium steel, through-hardened, bronzed.
Protective insulation moulded directly onto the bit and completely integrated into the bit in the lower area.

Application: For all work on or around electrical components up to 1,000 V AC.

Extra: The integrated protective insulation enables low-lying fastening and spring elements to be reached and manipulated.
The slim form of the bit allows easy reaching of the screws below the finger and hand guards.

Attention: 6 mm slimBits only to be used in the slimVario bit holder and slimTorque VDE bit holder (VDE torque system).

Wiha Torque ESD torque range.

TorqueVario®-S ESD with scale.

with scale

2882

TorqueVario®-S ESD torque screwdriver.

Torque value can be set via window scale.

Automatic release.

Handle:

Torque infinitely adjustable with Torque-Setter setting tool (also supplied).

Ergonomic multi-component handle, made of ESD-safe dissipative material.

Handle sizes proportioned to optimise torque setting.

Audible and perceptible click when the pre-set torque has been attained.

Surface resistance $10^6 - 10^9$ ohms.

Compatible with all blades of the 2889 series.

Standards:

IEC 61340-5-1.

EN ISO 6798, BS EN 26789, ASME B107.14M.

Accuracy:

$\pm 6\%$, tracing to national standards (see table for other tolerances).

Application:

For ESD applications where recommended torque settings are important. Use in combination with a Wiha Torque ESD interchangeable blade.

Extra:

Delivered in practical plastic box, incl. factory calibration certificate.

Note:

Bit holders or blades are not included in delivery.

Further articles can be individualised and set at mytorque.wiha.com or on request.

Wiha TorqueVario®-S ESD with integrated scale.

Specially designed for applications on electrostatic sensitive components and devices that may be damaged by electrostatic fields or discharges. The dissipative handle and blade coating, with a surface resistance of $10^6 - 10^9$ Ohms, controls electrostatic energy discharge.

Four models cover torque ranges from 0.04 Nm up to 5.0 Nm.

Wiha Torque ESD torque range.

- Dissipative handle designed to discharge uniformly, surface resistance $10^6 - 10^9$ ohms
- Meets ESD standard IEC 61340-5-1
- Ergonomic SoftFinish® multi-component handle guarantees comfortable fastening and optimal handling
- Ergonomic handle sizes that are proportional to the torque ranges
- Each tool is individually tested and marked with an identification number
- Clearly audible and perceptible click signal when torque is reached
- Fulfills all accuracy requirements as defined by EN ISO 6789, BS EN 26789 and ASME B 107.14M

**Safety Notice:**

Wiha ESD screwdrivers are noninsulated, therefore not suitable for working on live parts.

**Torque ESD interchangeable blades.****2889 Torque ESD slotted interchangeable blade.**

For Wiha ESD torque screwdrivers.

Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.

Wiha ChromTop® finish on tip for a perfect fit every time.

Moulded with static dissipative, black plastic material.

Surface resistance $10^6 - 10^9$ ohms.

Standards: IEC 61340-5-1, DIN ISO 2380.

Application: For ESD applications where recommended torque settings are important.

with scale

Wiha Torque TR.

Torque value is set without tools

With the Wiha "TorqueVario S TR" variable torque handle, torque values between 2 and 8 Nm are continuously adjustable. Settings are made by using a tool integrated in the handle.

Reliable torque technology (audible and perceptible)

Overtightening of the pre-set value is therefore eliminated. Release accuracy is $\pm 6\%$ of the pre-set scale value, as required by EN ISO 6789. To prevent users from breaking the blade or damaging the screw when loosening the screw, the tools limit the tightening torque, as well as apply a special limit to the loosening torque; this is approximately 30% greater than the tightening torque.

The combination of soft and hard zones eases handling

The ergonomic soft zones ease handling and gripping and enable comfortable and effortless power transmission, even at higher torques.

Blade locking mechanism to increase product safety

A mechanical blade locking mechanism prevents it from slipping out of the Wiha "Torque TR" handle. Because locking is not mechanical, work is even possible in magnetic or machining environments.

Optimal handle version for optimal torque

One blade system for all handles

6-mm interchangeable blades made of high-quality, tough-but flexible chrome-vanadium molybdenum steel are available to match the handles. Two adapter blades for nuts (1/4" and 3/8"), together with a plastic-coated universal bit holder for all C 6.3 and E 6.3 (1/4") bits, complete the product range. Due to the 6mm chuck, the blades are adapted for torques up to 15 Nm.

Can be set without separate tool opening

Distinctly audible and perceptible release signal

Automatic / mechanical blade locking

1 tool –several gripping methods

POWER

SPEED

Finely toothed, switchable ratchet (72 teeth) with 5° switching angle

Wiha Torque TR.

Powerful work for applications of up to 8 Nm

- Handle geometry enables force-orientated operation of up to 8 Nm

Finely toothed ratchet

- A switching angle of only 5° enables very precise and cramped working

Torque value is set without tools

- The torque values can be set continuously between 2 and 8 Nm

Reliable torque technology (audible and perceptible)

- Overtightening the screw is eliminated by the reliable torque technology
- Distinctly audible and perceptible click signal
- In accordance with DIN EN ISO 6789 release accuracy of $\pm 6\%$

The combination of soft and hard zones eases handling

- The ergonomic soft zones enable comfortable and effortless power transmission, even at higher torque values

Blade locking mechanism to increase product safety

- Suitable even for magnetic or machining environments thanks to mechanical locking

One blade system for all handles

- Broad selection of interchangeable blades and adapter blades

Wiha TorqueVario®-S TR VDE.

TorqueVario®-S TR VDE.

with scale

NEW
28372

TorqueVario®-S TR VDE torque tool.

For individually tested VDE torque blades of the 28379 series.

Torque value can be set variably using a numeric scale.

Automatic release with ratchet.

- Handle:** Ergonomic pistol handle for high torques.
Axial power transmission.
Maximum transmission of force due to soft and hard zone.
Finely toothed ratchet with 72 teeth enables 5° switching angle:
guarantees precise work when things get tight.
Torque can be conveniently set via a setting tool integrated in the handle. Audible and perceptible click when the pre-set torque has been attained. Non-magnetic blade locking.
Compatible with all VDE torque blades of the 28379 series.
- Standards:** EN ISO 6798, BS EN 26789, ASME B107.14M.
- Accuracy:** ±6%, traceable to national standards.
- Application:** For applications where recommended torque settings are important.
Loosening torque approx. +30% greater than tightening torque.
- Extra:** Delivered in practical plastic box.
Incl. factory calibration certificate

Wiha TorqueFix®-Key.

Wiha TorqueFix®-Key.

Compact torque tool

The TorqueFix-Key is an extremely compact torque tool with pre-set torque values between 0.5 Nm and 4.0 Nm. The tool is especially developed for applications in which users only have little space for fastening.

Extra slim blade geometry

With the "TorqueFix-Key", the entire system is designed for applications in tight spots. Like the key, the blade is also perfectly adapted to the work scenario. This is achieved with a significantly shortened blade length in combination with an extra slim blade diameter.

Quick-turning zone

The torque tool features a quick-turning zone, which enables fast and time-saving work.

Reliable torque technology

Overtightening of the pre-set value is therefore eliminated. Release accuracy is $\pm 6\%$ of the pre-set scale value, as required by EN ISO 6789. To prevent users from breaking the blade or damaging the screw when loosening the screw, the tools limit the tightening torque, as well as apply a special limit to the loosening torque; this is approximately 30 % greater than the tightening torque.

Blade assortment

A 4 mm interchangeable blades made of high-quality, tough-but-flexible chrome-vanadium-molybdenum steel are available for the "TorqueFix-Key".

Small & compact

- Ergonomic key handle, extremely handy thanks to its compact design.
- Torque tool for very tight machine assembly spaces.

Extra slim blade geometry

- Very slim blade diameter for hard-to-reach screws.

Rapid handling

- Time-saving work due to twist zone in the handle area.

Individual unit testing with calibration certificate

- Distinctly audible and perceptible release signal.
- Release accuracy $\pm 6\%$.
- Loosening torque approx +30% greater than tightening torque.

Flexible and economic due to interchangeable blades

- Non-magnetic blade clamping specifically for cutting processes.

TorqueFix®-Key.

NEW

2836

TorqueFix® key torque screwdriver.

With a fixed torque value pre-set by Wiha.

Automatic release.

Handle: Ergonomic key handle, extremely handy thanks to its compact design. Specially for hard-to-reach screws and confined spaces.

Audible and perceptible click when the pre-set torque has been attained.

Compatible with all blades of the 2859 series.

Standards: EN ISO 6798, BS EN 26789, ASME B107.14M.

Accuracy: ±6%, traceable to national standards.

Application: For applications where recommended torque settings are important. Loosening torque approx. +30% greater than tightening torque.

Extra: Delivered in practical plastic box.

Incl. factory calibration certificate.

Wiha SYSTEM 6.

The space-saving all-rounder.

Are you looking for a versatile and space-saving system for your toolbox or for use on the road?

Then our **SYSTEM 6** exchange tools with 6 mm reversible blades and suitable handles are exactly the right solution for you. Just select the right variations for your application among the wide choice of handles and reversible blades or simply decide for one of the **SYSTEM 6** sets.

- The starter sets with tough roll-up bag are already equipped with the most common reversible blades, but also offer room for a maximum of 11 further reversible blades.
- The extensive professional sets are the perfect solution if you need a professional universal set in a rigid box.
- The practical roll-up bag sets are especially handy and space-saving.

The Wiha **SYSTEM 6** reversible blade systems are high quality products with industrial quality that fulfill maximum demands thanks to first class materials and manufacturing. The 150 mm long reversible blades are manufactured from chrome-vanadium molybdenum steel and are through hardened. The various handles are particularly ergonomically designed and guaranteeing optimal power transmission.

With the Wiha **SYSTEM 6** series you always have the right tool on hand for a wide range of applications - ideal for industry, trade and the ambitious handymen.

The Wiha SYSTEM 6 range is the compact all-rounder for different applications.

Thanks to the ClickStop ball clamp in each telescopic handle, 24 different visible blade lengths can be set between 42 and 114 mm in 3 mm increments.

Wiha SYSTEM 6.

- Versatile reversible blade system in industrial quality
- Expandable individual tool system
- Ergonomic handles for almost every application
- Blades of high-quality, tough yet elastic chrome-vanadium-molybdenum steel, through hardened
- Titanium silver surface for high corrosion protection

SYSTEM 6 handles.

**284** SYSTEM 6 SoftFinish®-telescopic handle.**Ergonomic multi-component handle with roll-off protection.**

Handle: With 6 mm hex retainer.
Enables adjustable blade lengths from 42 - 114 mm.
ClickStop ball clamp guarantees a secure hold and rapid blade exchange.

Application: Versatile for general applications in the workshop and factory.

Order-No.	6.0	120	36	5

Wiha Info

**SYSTEM 6 Magnetic.**

The ideal set for magnetising or demagnetising screwdriver blades and similar tools made of steel.

Wiha SYSTEM 4.

Ideal for precision work.

Colour-coded ChromTop® tips for maximum clarity.

Due to its versatility and quality the Wiha **SYSTEM 4** is a reversible blade system that convinces every user.

Either for slotted, Phillips, TORX® or hex screws, the wide product range provides the right model for every application.

All reversible blades are made of high-quality CVM-steel, through hardened and chrome-plated, which provides an extra long service-life. The Wiha ChromTop® tips guarantee a perfect fit every time.

Just choose from the SYSTEM 4 products for the relevant tool. Following handles are offered.

- The ergonomic **SoftFinish®** telescopic handle.
- The dissipative **SoftFinish®** telescopic ESD handle.

Each with adjustable blade lengths from 18 – 90 mm.

We offer SYSTEM 4 sets in compact roll-up pouches, rigid metal and easy access plastic boxes.

Convincing variety and quality. SYSTEM 4 – a real multi-tasker.

Wiha SYSTEM 4.

- Versatile reversible precision blade system
- Sets in compact roll-up pouches, rigid metal- or easy access plastic-boxes
- Ergonomic handles for almost every application
- Colour-coded blades made of high-quality, tough chrome-vanadium-molybdenum steel, through hardened, chrome-plated
- Wiha ChromTop® tips ensure a perfect fit every time

The ClickStop ball clamp in each telescopic handle allows 24 different visible blade lengths between 18 and 90 mm in 3 mm increments.

SYSTEM 4 handles.

2691 SYSTEM 4 SoftFinish®-telescopic handle.
Ergonomic multi-component handle with roll-off protection.

Handle: With 4 mm hex retainer for all SYSTEM 4 blades.
 Enables adjustable blade lengths from 18 - 90 mm.
 ClickStop ball clamp guarantees a secure hold and rapid blade exchange.

Application: Ideal for all precision work in the fields of electronics and mechanics.

Holders	ErgoStar holder	ProStar holder	Compact holder	Classic holder
				
Holder type	Two-row holder	Two-row holder	Two-row holder	Single-row holder
Description	Wiha ErgoStar: this holder stands for comfortable and fast handling. Mechanical operation in form of rotating enables simple and rapid access to each key without being hindered by the other keys.	Wiha ProStar: this holder stands for simple operation. A sliding function enables removing each individual key without accessing the other keys.	Wiha Compact: this holder stands for a combination of space-saving storage and ideal key fixing	Wiha Classic: this holder stands for quick operation. Short removal distances of the keys achieve time-saving operation.
Features	<ul style="list-style-type: none">• Simultaneous operation of all keys• Easy and quick key removal• Solid stopping point for fixing L-keys in the holder• Innovative clamping ensures L-keys are held firmly in both closed and open state• Compact design takes up little space on the bench or in the toolbox• Wall bracket for practical storage of the ErgoStar• Colour guidance system for output recognition	<ul style="list-style-type: none">• Sliding function for one-handed opening of the holder• Easy and quick removal• Compact design takes up little space on the bench or in the toolbox• Hanging possible using hanging bracket• Colour guidance system for output recognition	<ul style="list-style-type: none">• Innovative clamping ensures L-keys are held firmly in the holder• Very compact holder construction saves room on workbenches and in toolboxes• Colour guidance system for output recognition	<ul style="list-style-type: none">• Easy and very quick key removal• Innovative clamping ensures L-keys are held firmly in the holder• Solid stopping point for fixing L-keys in the holder• Very flat holder construction saves room on workbenches and in toolboxes• Hanging possible using hanging bracket• Colour guidance system for output recognition

All Wiha product advantages at a glance

Holders	Logo	Application images		Description	
Ball end				The Wiha ball end stands for mobility, thus enabling fastening of allen screws up to 30° per side.	
Ball end TORX®				The Wiha ball end stands for mobility, thus enabling fastening of TORX® screws up to 25° per side.	
MagicRing®				Wiha L-keys with Magic-Ring® hold allen screws firmly in any position thanks to a high-tensile spring steel ring.	
MagicSpring®				Wiha L-keys with Magic-Ring® hold TORX® and TORX PLUS® screws firmly in any position thanks to a high-tensile spring steel ring.	
Stubby				The new L-key from Wiha, especially for hard-to-reach screws and confined spaces.	
Colour coding					
					The Wiha colour guidance system identifies the output category. There is a distinction among the categories Hexagon metric, Hexagon inch, TORX® and TORX PLUS®.
	 Red	 Yellow	 Green	 Light green	
	Hexagon metric	Hexagon inch	TORX®	TORX PLUS®	
					
					

Advantages

- Fastenings at angles up to 30° per side
 - Quick feeding of the key into the screw thanks to feeding from various angles
 - The key does not slip out of the screw, which reduces the risk of accidents
 - No deformation of the screw head thanks to precision fitting of the ball end
-
- Fastenings at angles up to 25° per side
 - Higher torque transmission due to maximum core diameter
 - Elongated profile positioning for further use of the L-key
-
- Thanks to the combination of MagicRing® with the Wiha ball end, inserting and removing screws is possible, even in hard-to-reach locations
 - Securely holds screws made of steel and non-magnetic materials such as stainless steel, titanium, aluminium and plastics in any position
 - Can be used for all standard screws
 - Use for applications in which magnetised fastening tools cannot and may not be used (magnetic environment)!
 - Fastenings at angles up to 25° per side
-
- Securely holds screws made of steel and non-magnetic materials such as stainless steel, titanium, aluminium and plastics in any position
 - TORX® and TORX PLUS® screws manufactured according to Camcar Textron specifications
 - Use for applications in which magnetised fastening tools cannot and may not be used (magnetic environment)!
-
- Reduction of the short L-key arm, especially for hard-to-reach screws and confined spaces
 - Increase in the hand working space of over 30% and thus a reduction of the risk of injury to the knuckles and fingertips thanks to a 95° bend of the L-key
 - Improved access through a reduction of the L-key head height of up to 15%
 - Ball end geometry enables fastening at an angle of up to 25°
-
- Handles and holders in the same colour depending on the output size
 - This provides an overview of the tool assortment

Wiha ErgoStar.

Fastening on to something good.

reddot design award
winner 2010

Focus Open
Silber 2011

Extremely agile: the new ball end now enables fastenings up to an angle of 30°.

The trick with the new Wiha ErgoStar is as simple as it is effective: rotating a single L-key in the holder means that all other keys rotate to the side at the same angle! That means: there's no more complicated disentangling of adjacent keys any more. All L-keys are ready for removal with a single turn, quicker, more simply and more clearly than ever before.

But easy removal is not the only advantage. The set of Wiha premium L-keys from the series 369S is also included. With the new ball end design, screws can be effortlessly fastened even at an angle up to 30°. Through-hardened, chrome vanadium steel and high quality brilliant chroming are further convincing reasons that make the L-keys essential accessories for everyday work.

The right idea: a flowing movement means all L-keys are ready for removal.

Wall holder for practical storage of the Wiha ErgoStar: all keys always ready to hand. Available together with the Wiha ErgoStar in all display and blister pack versions.

Wiha ErgoStar.

- Innovative key extraction: One turn and all L-keys are rapidly and conveniently ready for removal
- Quick replacement of keys in the holder thanks to a solid stopping point
- Guaranteed firm fixing of keys over the complete life service
- Up to 25% more corrosion resistance thanks to high quality brilliant chroming
- Metric scale (SW 10) in range 20 – 150 mm

For Allen screws (metric).

**369S** Ball end hex L-key, long.

Blade: Chrome vanadium steel, through-hardened, brilliant chrome-plated.
 Standards: Based on ISO 2936L.
 Application: Especially for screws that are difficult to access.
 Extra: The ball end enables fastening and unfastening at an angle of up to 30°.

Wiha MagicRing® hexagon L-key.

Securely holds hexagon bolts in place in any position.

MagicRing® holds all standard screws!

- DIN 6912
- DIN 7984
- DIN EN ISO 4762
- DIN EN ISO 10642
- DIN EN ISO 4026
- DIN EN ISO 4027
- DIN EN ISO 4028
- DIN EN ISO 4029
- DIN EN ISO 7380

Wiha hex keys with MagicRing® guarantee the perfect location of hex screws in every position.

Due to a high-quality retaining ring in the key head, the insertion of a screw in straight, inclined or very deep pocket holes is no problem. The new ball geometry with MagicRing® now offers even more advantages:

- Greater retention force for screws. For example, size 6 holds screws up to 1000 mm in length.
- Enlarged maximum torque of up to 10% due to the new ball geometry.
- Can now be used with all standard screws.

A further advantage is that the Wiha MagicRing® can even be used to hold non-magnetisable screws made of stainless steel, titanium and aluminium.

Wiha MagicRing® metric is only available as long design from size 3. With the inch dimensions, MagicRing® is available from 1/8". All series are made from high-quality chrome-vanadium steel.

Thanks to the Wiha MagicRing®, inserting and removing screws is safe and easy, even in areas that are difficult to access.

The ball end can be rotated by up to 25° in both clockwise and anti-clockwise direction.

Wiha MagicRing® hexagon L-key.

- Suitable for removing sunk-head standard screws and for inserting and working screws in horizontal, inclined or deep pocket holes
- Holds screws made of steel and non-magnetisable materials such as stainless steel, titanium and aluminium
- Ideal for applications where there is insufficient space for a simple hex key
- No troublesome searching for dropped screws

For Allen screws (metric).

369R Ball end hex L-key, long.
With MagicRing®.

Blade: Chrome-vanadium steel, through hardened, chrome-plated.
 Standards: Based on ISO 2936L.
 Application: Insert screws into or remove from boreholes, especially in difficult to access areas.
 Extra: MagicRing® of spring steel (from size 3 mm) secures all hex standard screws independently of screw material in any position.
 The ball end enables the user to work at angles up to 25°.

For Allen screws (metric).

369T Ball end hex L-key, long.

Blade: Chrome-vanadium steel, through hardened, chrome-plated.
 Standards: Based on ISO 2936L.
 Application: Specially for hard-to-reach screws and confined spaces.
 Extra: Increase in the hand working space of over 30% and thus a reduction of risk of injury to the knuckles and fingertips thanks to 95° bend of the L-key. Improved access through a reduction of the L-key head height of up to 15%. The ball end enables the user to work at angles up to 25°.

TORX PLUS® blades

Wiha TORX® MagicSpring®.

Holds TORX® and TORX PLUS® screws securely in place.

Wiha MagicSpring®:
a stainless steel spring securely holds
TORX® and TORX PLUS® screws.

No more annoying and time-consuming hunting around for TORX® or TORX PLUS® screws that have apparently vanished into thin air. With Wiha's ingenious new tool, the MagicSpring®, TORX® or TORX PLUS® screws* are kept firmly where you want them. The highlight of the "MagicSpring®" tools is the stainless steel "magical" retaining spring that, together with a thin cover disc, is laser-welded to the tip of the blade.

This completely new innovation acts as a clamp between tool and TORX® or TORX PLUS® screw, so that the latter is firmly gripped by the tip of the blade. The new tools are especially beneficial when turning particularly small screws or when turning screws in areas that are difficult to access. Simply place the screw on the tip of the blade and start to turn. No more screws will fall to the ground or disappear between components.

Insertion and removal of TORX® and TORX PLUS® screws is safe and comfortable thanks to MagicSpring® from Wiha.

** TORX® and TORX PLUS® screws manufactured according to Camcar Textron specifications.*

As the clamping action is purely mechanical, MagicSpring® also gets a firm grip on TORX® or TORX PLUS® screws made of aluminium, stainless steel, plastic and titanium.

The retaining spring is a completely new technical solution that, together with a thin cover disc, is laser-welded to the tip of the blade.

Wiha TORX® MagicSpring®.

- MagicSpring® retaining spring made of stainless steel gets a firm hold on every TORX® or TORX PLUS® screw
- No more annoying searching for dropped screws
- Ideal for areas that are difficult to access
- Made of high-quality materials in the renowned Wiha quality
- Also suitable for TORX® or TORX PLUS® screws made of aluminium, stainless steel, plastic and titanium

For TORX® screws.

**366R** TORX® MagicSpring® L-key, long.

Retaining spring holds TORX® screws in place.

Blade: Chrome-vanadium steel, through-hardened, black finish.

Application: For setting and tightening TORX® screws in difficult to access areas.

Wiha TORX® ball end.

Simpler, more powerful, safer.

Plenty of room to manoeuvre: The ball end enables access to the TORX® screw at an angle of up to 25°.

Tight spaces that only allow fastening and unfastening in at an angle: In these "problem zones" for TORX® screws, Wiha TORX® ball end tools are in demand. The advantages for the user are obvious: With the improved geometry of the ball end, TORX® screws can now be screwed in and out even at angles up to 25°. As a result, maximum torques are no longer a problem even in difficult installation positions. Wearing of the tool and screw head is noticeably reduced.

And Wiha is also pursuing a different path in production. Thanks to an innovative manufacturing process, cold forming, the TORX® ball end gains a great deal of strength.

So that these advantages benefit a broad range of applications, the Wiha TORX® ball end is integrated in several types of tools and is available in proven Wiha quality:

- as an L-key in sizes T9 to T40, separately or as a set with a holder
- as a bit with the lengths 50, 70 and 90 mm
- as a screwdriver with the ergonomic SoftFinish® handle, through-hardened, brushed chrome-plated blade and precision-fitting ChromTop® blade tip

Thanks to their ruggedness, flexibility and diversity, Wiha TORX® ball end tools are indispensable for any user who has to depend on a long tool life under difficult working conditions.

With elongated TORX® profile behind ball end.

Wiha TORX® ball end.

- With optimised TORX® ball end geometry
- Increased strength thanks to the special cold forming on a system developed by Wiha especially for this purpose
- Enables fastening and unfastening at angles up to 25°
- Simple insertion of the tool/bit and fastening/unfastening, especially in hard-to-reach locations
- Broad product range: As an L-key, as a bit and as a SoftFinish® screwdriver

For TORX® screws.

Wiha TORX® titanium silver.

TORX® surface for maximum quality requirements.

The new titanium silver surface for TORX® L-keys is a special process of surface refinement. This surface is ideally suited for all applications indoors and outdoors and fulfils maximum quality requirements. Titanium silver provides significantly more corrosion protection compared to the conventional, oiled, black TORX® L-keys. This makes oily fingers or re-oiling of the L-keys to maintain the corrosion protection a thing of the past. The new functional coating guarantees TORX® L-keys fit in the screw accurately, in contrast to conventional chrome coating.

Wiha TORX® titanium silver.

- Designed for ideal corrosion protection
- No more annoying oil or wax on the L-keys
- Especially long service life
- Ensures an accurate perfect fit in the screw

Wiha TORX® ball end L-keys.

Wiha PocketStar.

The right key with the press of a button.

The unique opening mechanism facilitates an easy selection of the desired key size.

The Wiha PocketStar fold out offers optimum handling and a wide variety of uses, which are expressed in the form of many practical details.

The ingenious opening mechanism facilitates the simple selection of the required key size from the glass-fibre-reinforced holder.

Wiha solved an important demand of fold-out users: When turning a key into working position only this one moves. The remaining keys stay where they are.

The various working positions offer universal use:

- In the 180° position, the PocketStar is used as a screwdriver.
- 270° stop limit for using the tool as practical lever for high torques.
- Any position can be set between 90° and 270° for a variety of different work applications.

The 270° stop limit when working on applications with higher safety requirements puts an end to trapped fingers.

Three flicks of the wrist and you have an effective screwdriver: take it out of the pocket, press the button and adjust the desired key to 180° or 270°.

Wiha PocketStar.

- Innovative opening mechanism for simple selection of the desired key size
- Particularly suitable for use as screwdriver when the blade axis is set at 180° or as practical lever with blade in 270° position
- Ergonomic, glass-fibre-reinforced holder guarantees the easy transfer of even the highest torques
- Can be rotated by any angle between 270° and 90° to save time when working on applications where space is tight
- 270° stop limit for higher safety puts an end to trapped fingers
- Colour-coding system for different drives and dimensional systems delivers great clarity when using several PocketStars
- Covered hex key axes prevents catching on clothes

Wiha PocketStar.

With hex keys.

For Allen screws (metric).

369R P7 Ball end hex fold out holder PocketStar. With MagicRing®, in large PocketStar, 7 pcs.

Blade: Chrome-vanadium steel, through hardened, electro-plated.
Handle: Ergonomic, reinforced fibreglass housing, 120 mm long.
Application: Practical fold out holder for hex screws in the workplace or on the job. Insert screws into or remove from boreholes, especially in difficult to access areas.
Extra: Robust casing with eject button for simple and easy key selection. MagicRing® of spring steel (from size 3 mm) secures all hex standard screws independently of screw material in any position. The ball end enables the user to work at angles up to 25°.

Wiha Mini PocketStar.

The smallest blade at the push of a button.

The unique opening mechanism facilitates an easy selection of the desired key size.

Who hasn't spent ages looking for the small SW 0.9 hex key or for other small keys?

Wiha has developed an extremely smart solution to solve exactly this problem: the Mini PocketStar, a small practical helper that is an absolute must in the toolbox of every service and customer-service engineer.

Regardless of whether replacing a proximity switch or pneumatic control unit, or whether adjusting the sensitivity of a light barrier. With the Mini PocketStar, all keys are within reach.

Small but effective. The Mini PocketStar from Wiha is the smart helper for service engineers and for DIY use.

The 180° stop limit when working on applications with higher safety requirements puts an end to trapped fingers.

Wiha Mini PocketStar.

- All small keys are held together in the Mini PocketStar. Not a single blade is lost
- Each of the 8 blades can be used as screwdriver when set at 180° and as tool with lever arm when set at 90°
- The glass-fibre-reinforced polyamide holder ensures that the Mini PocketStar withstands every stress unscathed
- Of course, the smallest PocketStar also has the same special functions as the "big" PocketStars

Mixed sets.

SB 351 PM8X Hex fold out holder Mini PocketStar.
With additional blades, 8 pcs.
Blister packed.

Blade: Chrome-vanadium steel, through hardened, electro-plated.
Handle: Ergonomic, reinforced fibreglass housing, 55 mm long.
Application: Practical fold out holder for mini keys so they no longer get lost. Particularly suitable for use with the smallest screws, e.g. when tightening screws or for the accurate setting of sensors.

Wiha ComfortGrip T-handle.

Soft zones for maximum working comfort.

Side blade with through blade.

The new Wiha T-handle with through blade for additional side blade features soft zones for the comfortable transmission of high torques.

Due to their ergonomic design, these handles are comfortable to hold. Fewer pressure points and less strain on the user mean that these tools are a pleasure to use.

When using the side blade, a supporting hand on the handle produces additional stability, which prevents the blade from suddenly slipping out of the screw head. This is better for both blade and screw.

The hole in the handle can be used for shop storage.

No screw can resist. The powerful Wiha ComfortGrip is quick and comfortable to use and even loosens screws that have been glued into position.

A tool that is a pleasure to use. Using the side blade for even greater torque, a supporting hand stabilises the handle and prevents the blade from slipping.

Black soft zones in the handle for comfortable working.

Chrome-plated blade for optimum corrosion protection.

Wiha ComfortGrip T-handle.

- The integrated side blade is particularly useful when loosening or tightening screws that are rusted-in, glued into position or particularly hard to move
- The through blade withstands even the highest stresses
- Distinctive soft zones on the ergonomic handle for the comfortable transmission of even high torques
- Handle-size concept with three handle shapes designed for maximum ease of use and for applying just the right amount of torque
- The new colour-coding system for the handles couldn't be clearer:
Red: metric hex blades
Green: TORX® profiles

Wiha ComfortGrip.

Soft zones for maximum working comfort.

For Allen screws (metric).

540DS Hexagon ball end screwdriver with ComfortGrip. With side blade.

Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Wiha ComfortGrip, the comfortable multi-component T-handle with soft zones for maximum working comfort.
Application: For comfortable high torque transfer. Especially useful for loosening or tightening screws that are hard to move.
Specially for hard-to-reach screws.
Extra: One piece blade, through the handle withstands even the highest stresses.
The ball end enables the user to work at angles up to 25°.

Wiha Classic T-handle.

The classic for high torques.

The handle design is such that the complete handle surface can be used, thus enabling optimum power transmission.

The ergonomic design of the Wiha T-handle that fits comfortably into the hand ensures optimum, symmetrical torque transmission from the hand through the blade to the screw. The extruded, angled end of the blade ensures that, even at the highest torques, the blade does not slip but gains a secure hold when either tightening or loosening the screw.

As the blades are subjected to high stresses, Wiha uses exclusively high-quality chrome-vanadium steels that are first subjected to a complex hardening procedure before being used in the wear-resistant blades.

A wide range of hex (metric and inch sizes), TORX® and TORX PLUS® blades, as well as hex drivers (metric and inch), ensures that the perfect tool is at hand for all conceivable applications. A colour-coding system for the handles facilitates the selection of the right blade.

Red handle:
metric hex blades

Yellow handle:
inch hex blades

Green handle:
TORX® blades

Light green handle:
TORX PLUS® blades

Thanks to the clear colour-coding system, you're sure to select the appropriate blade.

Wiha Classic T-handle.

- High torque transmission thanks to ergonomic handle
- Through hardened blades made of chrome-vanadium steel withstand every stress
- The angled blade end is injection-moulded into the T-handle and non detachable
- Hanging hole for workshop storage
- Made of high-quality plastic

For Allen screws (metric).

334R Hex driver with T-handle.
 With MagicRing®.

Blade: Chrome-vanadium steel, through hardened, nickel-plated.
 Handle: Wiha Classic T-handle.
 Application: For high torque transfer with minimal effort.
 Extra: MagicRing® of spring steel (from size 3 mm) secures all hex standard screws independently of screw material in any position.

364IP TORX PLUS® driver with T-handle.

Blade: Chrome-vanadium steel, through hardened, chrome-plated.
Handle: Wiha Classic T-handle.
Application: For high torque transfer with minimal effort.
Extra: The stronger profile of the TORX PLUS® tip allows up to 25% extra torque than the TORX® profile.
ChromTop® blade tip for the highest accuracy.

Attention: TORX PLUS® keys cannot be used with TORX® screws.

Wiha flag and key handle.

The knack of applying just the right amount of pressure.

Innovative torsion blade in sizes T5 to T10 does not damage the expensive fastening screws or the tool profile.

Screwdrivers with flag or key handles are used whenever replacing indexable inserts on milling heads.

Thanks to the large support area for thumb and index finger, it is possible to loosen or tighten any screw with comfort by applying just the right amount of pressure. These tools are also particularly suitable for high-torque adjustment work.

The small, 7-piece bench stand ensures a tidy working environment.

The flag and key handles have large support surfaces for thumb and index finger for ease of use and efficiency.

Wiha flag and key handle.

- Large support areas for thumb and index finger on the ergonomically shaped handles. The transmission of high torques is thus quite simple
- Cylindrical handle shaft for quick turning of screws
- Innovative torsion blade for T5 to T10 greatly reduces the risk of breakage. Thus, broken profiles in the screw head are largely avoided. If more torque than required is applied, the blade responds elastically (cf. picture)
- Thanks to thin blades, even covered screws in the screw axis can be turned

Wiha key handle.

For Allen screws and TORX® screws.

331 Hex driver with key handle.

Blade: Chrome-vanadium steel, through hardened, black-finish.

Handle: Wiha key handle.

Application: For high torque transfer with small screws, especially when replacing indexable inserts on milling heads.

2013

reddot design award
winner 2013

Focus Open 2013
Silver

High-performance drill and impact screwdrivers place tough demands on bits, for example via changing loads with impact screwdrivers or especially tough fastenings.

Standard bits are quickly unable to meet the challenge.

But not Maxx-Tor bits! With their optimised torsion zone, the lifespan of the bits is significantly increased.

29er MaxxTor bits The ultimate torsion bit

* Double lifespan: Compared to other high-performance impact bits, Wiha MaxxTor T25x29 achieves twice as many load changes in testing. The load changes simulate the number of completed fastenings before breakage.

* Triple lifespan compared to common standard bits.

49er MaxxTor bits The ultimate impact bit

* 70% longer lifespan compared to the best T25x50 high-performance impact bits on the market.

• Ideal for continuous impact use

Wiha MaxxTor bits.

- Maximum service life thanks to maximum torsion zone
- Plastic sheath improves torsion properties, enables clamping in the BitBuddy
- Ideal for high-performance drills and impact screwdrivers
- Full assortment: PH, PZ, TORX®, hex, Robertson

MaxxLifetime

* Research and Testing Centre results
Information refers to comparative test of competing T25 bits conducted by the renowned, independent German testing institute:
VPA Versuchs- und Prüfanstalt Zertifizierung GmbH / Remscheid | 7/2012 (Remscheid Research and Testing Centre, Germany)

The 2-component bit.

29er® MaxxTor bit.

7011 M9T 29er® MaxxTor bit, Phillips, 1/4" hex.

Material: High quality alloyed tool steel, optimally hardened.
Casing of transparent, impact resistant plastic.

Geometry: Maximum torsion zone – optimised and adapted for any output.
Precision-milled profile for perfect fit and maximum performance.

Drive: 1/4" hex, combination drive for bit holder in accordance with DIN 3126, ISO 1173 style D 6.3 and F 6.3.

Application: Ideally suited for high-performance drill and impact screwdrivers

Extra: Plus 4 mm length.
Additional range, easier handling when changing the bit.
Two-component construction – Plastic coating for improved torsion properties, increased work safety, facilitates clamping in the BitBuddy®.
Practical laser marking for easy identification of size.

Wiha DuraBit.

A diamond among bits.

The extremely wear-resistant hard-metal coating considerably increases tool life.

With DuraBit, Wiha puts its innovative strength to the test. The tough torsion bit has an extremely wear-resistant hard-metal coating that gains a secure hold in the screw head.

This revolutionary coating technology originates from the aerospace industry and guarantees outstanding gripping of the bit surface. The user quickly comes to appreciate the benefits: a longer tool life, much reduced cam-out effects and superior handling enable efficient work, even with the most difficult of applications.

The wolfram carbide particles are permanently applied to the bit tip - a breaking away of the particles (as occurs with conventional, diamond-coated bits) is therefore significantly reduced.

The Dura coating reduces CamOut effects to an unbeatable minimum - no more slipping out of the bit from the screw head.

Wolfram carbide particles.

Non-corroding nickel coating.

Long-lasting, durable wolfram carbide coating increases service life of the bit by many times when compared to a diamond-coated bit. The subjacent nickel coating ensures extra-long corrosion resistance.

Wiha DuraBit.

- Extremely wear-resistant hard-metal coating also used in the aerospace industry gains a secure hold in the screw head. Outstanding reduction of CamOut forces prevents slipping out of the bit
- Wolfram carbide particles guarantee a significantly greater service life when compared to conventional diamond-coated bits
- Nickel coating of the entire bit for extra-long corrosion resistance
- Clear reduction in the cam-out effect (slipping of the bit out of the screw head) for:
 - Fatigue-free work (less force required)
 - Less wear of bit and screw
 - Safe work on delicate surfaces
- Work with Wiha DuraBits featuring torsion zones reduces the amount of time for fastening and enables economic and safe work

Style C 6.3 (1/4").

**7010 DR** DuraBit with torsion zone, slotted, style C 6.3.

Material: High grade chrome-vanadium steel, through hardened.

Geometry: Torsion zone for protecting against premature breakage of bits under load.

Coating: Hard-metal coating, extremely wear-resistant.

Drive: DIN 3126, ISO 1173, style C 6.3.

Application: For effortless, safe working in demanding industrial applications and on delicate surfaces.

Extra: Non-corroding nickel coating in combination with wolfram carbide particles.
Extremely wear-resistant, hard-metal coated DuraBit tip gains a secure hold in the screw head and guarantees a significantly greater service life when compared to conventional diamond-coated bits.
Outstanding reduction of CamOut forces prevents slipping out of the bit from the screw.

Wiha diamond bit.

Saves strength, time & money.

Finest diamond particles and sapphire particles ensure a firm grip a thousand times over.

Diamond torsion bits supplement Wiha's range of high-quality special bits. In the area of mechanical fastening the significantly greater tool life means substantial cost reductions.

The new Wiha diamond torsion bits are recognisable by their silver look and striking black tip and offer an impressively secure grip in the screw.

The Diamond torsion bit from Wiha scores on two accounts: it reduces the amount of pressure that has to be applied and increases the tool life.

The torsion zone protects against torque peaks.

Wiha diamond bit.

- Reduction of:
 - Pressure forces to be applied
 - Wear and tear of bit and screw head
 - The amount of time to turn the screw and thus reduction in the costs of screw applications
 - Cam-out effect
- Extended service life as a result of the improved torsion zone
- Nickel coating of the entire bit for long-lasting corrosion resistance

Style C 6.3 (1/4").

**7010 D** Diamond torsion bit, slotted, style C 6.3.

Material: High grade chrome-vanadium steel, through hardened.

Geometry: Torsion zone for protecting against premature breakage of bits under load.

Coating: Extremely wear-resistant diamond-sapphire coating with a long service life.

Drive: DIN 3126, ISO 1173, style C 6.3.

Application: For fatigue-free work; ideal bit for frequent working.

Extra: Non-corrosive coating.
Diamond particles and sapphire particles for optimum torque transfer and a secure grip in the screw head.

Wiha Torsion bit.

Patented torsion zone for longer service life.

The red line indicates the steep increase in torque with hard applications, e.g. in metal.

The blue line shows a steady torque increase in soft applications, e.g. in wood working.

Wiha Torsion bit.

The main cause of wear with soft fastening applications such as in wood for example is the wear of the profile edges because the bit rattles through. A hard bit needs to be used here: Wiha HOT.

With hard fastening jobs such as hitting metal surfaces the main reason for wear is breakage of the bits. These usually occur with torque peaks near to the end of the fastening process. A tough-but-flexible bit is the answer: Wiha ZOT.

The special assortment of Wiha torsion bits with torsion zones offers optimal products for both soft and hard fastening tasks.

Wiha ZOT Torsion bits

- Tough, hard Torsion quality for **hard applications**
- Ideal for screw applications in metal and hard materials
- Elastic Torsion zone absorbs the strong torque peaks in the final phase of the application (red line)
- Highly resistant to wear and tear due to special heat treatment
- Hardness 61-2 HRC.
- For trade and DIY

Wiha HOT Torsion bits

- Extra hard Torsion quality for **soft applications**
- Ideal for screw applications in wood and soft materials
- Average requirements concerning elasticity are used to optimise performance and resistance to wear and tear (blue line)
- Hardness 63-2 HRC.
- For trade and DIY

Wiha TiN Torsions bits

- Tough, hard Torsion quality with very hard **titanium-nitride (TiN)** coating
- Optimum resistance to wear and tear due to very hard TiN coating
- Combines the advantages of Wiha HOT bits and ZOT bits in one outstanding bit
- For trade and DIY, especially for industry

Style C 6.3 (1/4").

**7010 TiN** TiN Torsion bit, slotted, style C 6.3.

Material: High grade chrome-vanadium steel, through hardened.
 Geometry: Torsion zone for protecting against premature breakage of bits under load.
 Coating: Titanium nitride for extended tool life.
 Drive: DIN 3126, ISO 1173, style C 6.3.
 Application: Particularly suitable for screws that require frequent working.

Wiha Inkra bit.

The specialist for every angle.

The innovation for wood screws.

With the Inkra bit, Wiha has developed a revolutionary product for dry applications.

In practice, it is impossible to avoid working with an inclined bit axis. It is in such applications that the Inkra bit comes into its own. With its specially developed shape, the penetration depth in the screw head remains nearly constant, even in an inclined position.

Optimum torque transmission and a reduced cam-out effect are the resulting advantages.

Craftsmen value this bit because it makes their work much easier than using a standard bit.

User comfort and reduced pressure forces even in inclined positions.

Slippage and rounding of the bit tip are a thing of the past.

Wiha Inkra bit.

- Even when the drill is at an inclined position, the penetration depth in the screw head remains virtually constant
- No slipping and rounding of the bit tip and screw head
- Especially long service life
- The ideal bit for carpenters, joiners and craftsmen

Style C 6.3 (1/4").

7011 Inkra Inkra bit, Phillips, style C 6.3.

Material: High grade chrome-vanadium steel, through hardened.
 Drive: DIN 3126, ISO 1173, style C 6.3.
 Application: The ideal bit for areas that are difficult to access, particularly suitable for wood screws.
 Extra: Non-corrosive coating.
 Fastening possible at slightly oblique angles.

Wiha Standard bit.

Full programme range in outstanding quality.

The Wiha Standard bits offer impressive quality and they are available in a versatile range.

The bits are subject to processor-aided manufacture as well as processor controlled heat treatment. Wiha thus guarantees a uniformly high product quality.

The high-quality basic material permits torque values that are far beyond the DIN standards:

- DIN 5261 for PH/PZ-bits
- DIN 5263 for slotted bits
- Camcar standards for TORX® and TORX PLUS® bits

This results in a long tool life at high torque values; this is the ideal prerequisite for standard applications.

Wiha Standard bits are the ideal multi-purpose tool to meet high requirements in terms of both quality and performance.

Wiha Standard bit.

- Robust and powerful allround-bits for trade, industry and DIY
- Suitable for all applications. Thanks to its hardness values of HRC 59-61, it can be used for both manual and machine applications
- Highly resistant to wear and tear for a long tool life
- Optimum fitting in DIN screws for low wear and tear as well as optimum torque transmission
- Production based on industrial quality criteria according to the valid ISO standards with uniformly high product quality

Style C 6.3 (1/4").

**7010 Z** Standard bit, slotted, style C 6.3.

Material: High grade chrome-vanadium steel, through hardened.

Drive: DIN 3126, ISO 1173, style C 6.3.

Application: For all types of screw applications in trade and industry.

Wiha Professional bits.

Wiha Professional bits - everything but standard.

Wiha Professional Bits are high quality bits for professional users in trade and industry.

Complete assortment

Wiha Professional Bits are characterised by an extremely wide product spectrum. More than 200 profile and length variants are available from stock. Of course Wiha is an official licensee of all common screw profiles.

Wiha - the TORX® specialist

Ranging from traditional TORX® with all its variants (classic, wedge, tamper resistant) to a wide internal TORX® spectrum and the latest TORX PLUS® safety profile, Wiha as a premium manufacturer offers professional users a complete program.

Added to this are the Wiha specials with ball end and unique swivel angle as well as MagicSpring®, a 'magic' spring that securely holds screws.

Precise manufacturing

Production on extremely precise and process-robust CNC systems means high performance screw bits. Modern manufacturing technology ensures not only a perfect fit of profile tips but also outstanding rotation characteristics and concentricity of bits. Demanding customers with automated fastening processes looking for problem-free applications hold this in high regard.

Optimal heat treatment

Wiha Professional Bits are fundamentally through-hardened. Heat treatment is carried out in hardening systems with computer-controlled monitoring of hardening parameters (time, temperature, atmosphere). This enables constant hardening results. Wiha Professional Bits gain their functional fine finishing with the final annealing process, a second heat treatment following hardening that gives bits a specific characteristic. According to profile and application area, a differentiation is made between extra hard wear-resistant, tough and extra tough.

Wiha Professional bits.

- Powerful bits for professional users.
- Heat treatment matched to the profile to extend the service life
- Optimum fit in screws because of manufacturing according to DIN or the original specifications of well-known licensors
- Best rotation characteristics for stable fastening processes

Style E 6.3 (1/4").

7045BE Professional bit, TORX® ball end, style E 6.3.

Material: High grade chrome-vanadium steel, through hardened.
Drive: DIN 3126, ISO 1173, style E 6.3.
Application: For all internal TORX® screws, especially in hard-to-reach places.
Extra: The TORX® ball end enables fastening and unfastening at an angle of up to 25°. With elongated TORX® profile behind ball end.

Wiha Info

Wiha Industrial bits.

- Halfmoon and HIOS bits are mainly used in production lines for high-tech products such as smartphones
- Process stability thanks to precision-fitting profiles and excellent rotation characteristics
- The round 4 mm shaft ensures secure grip without play in the bit mount of the drive spindle
- The force is transmitted to the bit via drivers in semi-circles or wing shapes
- The bits are held securely in place in the circumferential groove using a ball latch
- The bits can be exchanged quickly and easily

Wiha threaded bit.

Customised for your application.

For M4 and M5.

Make the most of our experience. Our expertise in the manufacture of all types of fastening tools enables us to produce bits to your specifications.

Sophisticated manufacturing facilities with qualified employees, state-of-the-art machinery and a certified quality assurance system guarantee you maximum quality and flexibility.

Wiha special bit range - the construction kit of your special bit.

The Wiha special bit range is a construction kit system for your special bit.

Advantages:

- Attractive price
- No additional costs for technical drawings
- Short delivery time
- Flexibility

Wiha industrial quality - bits to the highest standard

Industrial quality expands the Wiha construction kit. We adapt the hardness, coating, form and concentricity of the bits precisely according to your requirements.

Hardness: 57 HRC - 63 HRC
Coating: Tungsten Carbide (Dura), Diamond, TiN
Form: according to specification drawings
Straightness: straightness with a tolerance of ± 0.05 mm

Perfect concentricity:

essential for bits in automated machines and/or with use of guide jackets.

Advantages:

- Screws easily located and fastened securely.
- Low-vibration fastening thanks to minimum imbalance.
- Idle times reduced.

Wiha special bits.

- Our customers require an exact fit and maximum truth of running for a frictionless production process.
- Wiha bits are being used to optimum effect by big-name companies operating all over the world.

Accessories for Wiha bits, style C 4.

2691 **SYSTEM 4 SoftFinish®-telescopic handle.**
Ergonomic multi-component handle with roll-off protection.

Handle: With 4 mm hex retainer for all SYSTEM 4 blades.
Enables adjustable blade lengths from 18 - 90 mm.
ClickStop ball clamp guarantees a secure hold and rapid blade exchange.

Application: Ideal for all precision work in the fields of electronics and mechanics.

Order-No.	4.0	105	23	10
30373				

U759 00 **SYSTEM 4 bit holder.**
Suitable for C 4 (4 mm) bits.

Blade: Chrome-vanadium steel, through hardened, electro-plated.

7000 EB16 ESD **SYSTEM 4 ESD bit set, 16 pcs.**
Mixed sets.

Handle: SYSTEM 4 SoftFinish®-telescopic ESD handle.
ESD-safe (dissipative),
surface resistance $10^6 - 10^9$ ohms.
Enables adjustable bit holder blade length.

Standards: DIN 3126, ISO 1173, style C 4.
IEC 61340-5-1.

Case: No danger to electronic components with use of ESD-safe materials.
Tough, space-saving metal box.

Application: Bit set suitable for smallest screws with electronic components.
Flexible working via adjustable blade length and rapid replacement of bit inserts.

Wiha CentroFix system.

Quick and professional.

Drilling, countersinking, driving screws and cutting threads is child's play with the Wiha CentroFix System. The innovative CentroFix quick-release holder forms the basis for a variety of hex-driven tools.

With CentroFix System, Wiha once again demonstrates that the user is central. The trend towards battery-powered drivers is continuing undiminished. Efficient models are greatly increasing the number of application areas and enabling more flexible working conditions. The Wiha CentroFix System also opens up these application areas to professional use.

With the CentroFix quick-release holder, Wiha closes the gap between the chuck of the battery-powered drivers and the quick-release holder for driver bits. The CentroFix holder allows rapid tool change, provides a secure fit and meets the more demanding requirements for concentricity and pull-off forces.

Flexible, easy and quick – drill, countersink and turn screws with the Wiha CentroFix System for wood ...

... or with the Wiha CentroFix System for metal.

Wiha CentroFix system.

Quick

- Saves time when changing tools

Secure

- Fixed connection between tool insert and holder

Zero-play

- For exact boreholes

Universal

- Fits all 1/4" hex drives

CentroFix - one for all.

7148C

CentroFix quick release holder, style E 6.3.

- Sleeve: Metal, coated.
- Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3 and E 6.3.
- Drive: DIN 3126, ISO 1173, style E 6.3.
- Packaging: Plastic box, reusable.
- Application: Whenever the bit needs a secure and zero-play hold. Optimised for the use of drill bits. Ideal for Torx bits.
- Extra: Due to the special holding mechanism, this bit holder holds all types of bits with 1/4" hex drive. The play between bit and holder is reduced to a minimum. Single-handed operation for fast bit exchange.

Wiha power nut driver product line.

The entire line for hand and machine use.

For those who place high demands in their tools: the extensive Wiha nut driver product line for hand and machine operation will definitely satisfy.

The high quality power nut driver inserts for example stand up to especially heavy loading. Another advantage is their hexagon opening with rounded corners: It grasps even flat bolts easily and extremely gently. With the incorporated permanent magnet and optional bit holder, particular attention was also paid to practical, user-friendly details.

A remedy for tough cases: The new hand impact screwdriver with hand protection and a changeover function is a specialist for jammed bolts and nuts. The matching 5/16" bits for PH, slotted and TORX® drives are produced of special chrome vanadium steel and through-hardened, making them especially impact and break-resistant.

The jack-of-all-trades product line is rounded off with universal connection pieces, parts and smooth-running ratchets. With a universal joint (connection pieces) and a locking button (ratchets) for holding or quickly releasing the attached tools, they're excellently equipped for working in hard-to-reach places. The 3-component handle (SoftFinish®) of the ratchets also guarantees comfortable, safe use.

Whether tools or accessories, whether its hand or machine-operated nut drivers: With this versatile assortment the user is also equipped for difficult and special cases.

Wiha power nut driver product line.

- Extensive application possibilities and large range of tools for electric and pneumatic screwdrivers as well as hand-operated nut driver inserts
- Nut driver inserts (1/4" drive) in high-quality special chrome vanadium steel; also available with incorporated permanent magnet that safely guides the screws when installing
- Hand impact screwdriver with hardened, lacquered impact end against chipping of chrome parts or mushroom-shaped deformations

Machine-operated nut driver inserts.

**7244** Power nut driver insert, hex - style E 6.3.

Material: High-quality chrome vanadium alloy steel, through-hardened, phosphate coated surface.

Drive: DIN 3126, ISO 1173, style E 6.3.

Application: For mechanical fastening and unfastening.

Extra: Rounded hex opening in the corners for protection of the screw heads.

7204 K39 Complete nut driver and bit set for hand and machine use, 37 pcs.

Case: Made of high-quality plastic with foam insert.
Content:

Hand use:
24630 ratchets, 1/4" with SoftFinish® handle
24632 T-handle
24635 universal joint
24637 bit holder for C 6.3 bits
7011Z PH1, PH2, PH3
7012Z PZ1, PZ2, PZ3
7015Z T10, T15, T20, T25, T30
28101 Stubby with magnet

Machine use:
7244M with magnet, size 6, 8, 10
7241Z connection piece, 50 mm
24634 extension piece
72050 TORX® nut driver E6, E8, E10
72040 hex nut driver, size 5.5, 6, 7, 8, 10, 12, 13 mm
7204Z bit holder for E 6.3 bits
7045Z T10, T15, T20, T25, T30

Contents: Nut driver and bits for hand and machine use.

32557	1/4	115	1

**24635** Universal joint (hand operation).

Material: High-quality chrome-molybdenum steel, through-hardened, chrome-plated and polished.

Drive: DIN 3123.

Application: For working in hard-to-reach places with hand-operated nut drivers.

Extra: Easier joint operation.

Order-No.	Ø	Ø	Length	Weight
32555	1/4	1/4	33	1

For nut driver inserts and bits

**24630** Ratchet with SoftFinish handle.

Design: Ratchet wheel with 20 teeth, extremely smooth-running and resilient. With proven Wiha SoftFinish® multi-component handle for more safety when working.

Material: High-quality chrome-molybdenum steel, through-hardened, chrome-plated and polished.

Drive: DIN 3122, style D 6.3.

Application: For hand-operated nut driver inserts.

Extra: The locking button ensures secure holding of the nut driver and quick release of the attached tool.

Order-No.	Ø	Length	Weight
32629	1/4	140	1

**24631** Ratchet with joint and SoftFinish handle.

Design: Ratchet wheel with 20 teeth, extremely smooth-running and resilient. With proven Wiha SoftFinish® multi-component handle for more safety when working.

Material: High-quality chrome-molybdenum steel, through-hardened, chrome-plated and polished.

Drive: DIN 3122, style D 6.3.

Application: The articulated head makes working in hard-to-reach places with nut drivers easier.

Extra: The locking button ensures secure holding of the nut driver and quick release of the attached tool.

Order-No.	Ø	Length	Weight
32630	1/4	165	1

**SB 2463 001** 1/4" bit ratchet, with thumb wheel. Blister packed for hanging.

Design: Drop forged, especially robust version.

Maximum ergonomics due to user-specific SoftFinish form.

Finely serrated ratchet mechanism with 72 teeth.

Clockwise and anticlockwise direction can be switched via switching lever. with practical thumb wheel.

Bit holder: For bits according to DIN 3126, ISO1173, style C 6.3 and E 6.3.

Material: High-quality chrome-molybdenum steel, chrome-plated and satin finished.

Application: Especially handy bit ratchet for a wide variety of fastening applications. Minimum switching angle of only 5° enables use of bit ratchet even in the tightest spaces.

Due to outstandingly smooth running the mechanism functions even when other ratchets fail, e.g. with furniture assembly.

Extra: Thumb-wheel aids applying, fastening and releasing screws.

Wiha Gripper.

Sizes everything.

Gripper.

9246 01 Gripper nut driver 3/8".

Material: Housing made from alloyed steel.
54 spring-loaded hardened steel pins.

Drive: DIN 3120, style C 10.

Application: Replaces nuts from 7 mm to 19 mm.
Regardless of whether inch or metric dimensions.
The 54 steel pins fit every nut or screw with an external profile.
For screws up to a height of 8 mm.

Extra: The Gripper also works on hooks or eyebolts.
Enables a torque transmission of up to 80 Nm.

Wiha bit holder.

For rapid changing of bits without tools.

CentroFix bit holders are characterised by particular user friendliness.

The bit is automatically locked when it is inserted. When unlocked it moves forward several millimetres and can be removed easily.

Ideal for powerful users- the CentroFix Force was designed to be particularly stable. The CentroFix SuperSlim shows off its thin design.

The new MagicFlip Force is perfectly suited for hard jobs thanks to its robust operating sleeve of steel. With its strong Neodym ring magnet it even securely holds heavy screws.

Wiha CentroFix Force

- Suitable for all bits with 1/4" hex drive Style C6.3 and E6.3
- Operating sleeve of robust, hardened steel
- SelfLock
The bit is locked mechanically and held securely when inserted
- EasyOut
When unlocked, the bit moves into the ideal removal position

Wiha CentroFix Super Slim

- Up to 30% reduced outer diameter compared to "conventional" quick release holders
- Screw accessibility is better in confined holes
- SelfLock
The bit is locked mechanically and held securely when inserted
- EasyOut
When unlocked, the bit moves into the ideal removal position

Wiha MagicFlip Force

- Extremely strong Neodym ring magnet, holding force 16N (approx. 1.6 Kg)
- New – also suitable for drywall screws with small screw heads
- New – operating sleeve of robust steel
- FlipBack
the operating sleeve automatically springs back during recessing.
- Magnet On/Off
The ring magnet can be "deactivated" by pushing the operating sleeve back

Wiha bit holder for power machines.

For rapid changing of bits without tools.

Drive system style E 6.3.

NEW

7148 CF CentroFix Force quick release holder, magnetic, style E 6.3.

Sleeve: Steel hardened, coated.
 Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3 and E 6.3.
 Drive: DIN 3126, ISO 1173, style E 6.3.
 Packaging: Plastic box, reusable.
 Application: Whenever the bit needs a secure and zero-play hold.
 Ideal for screw profiles (e.g. Torx) which tend to jam in the screw.
 Extra: Bit is automatically locked when inserted - SelfLock.
 Simple bit removal thanks to EasyOut ejection function.
 Robust operating sleeve of hardened steel.
 With strong Neodym magnet.

Order-No.	1/4	1/4	60	10
39133				

Drive system style E 6.3.

7148ST CentroFix stainless steel quick release holder, style E 6.3.

Blister packed.
 Sleeve: Of high-quality, non-rusting stainless steel, therefore recommended for use with stainless steel bits.
 Suitable for: DIN 3126, ISO 1173, style D 6.3 + F 6.3 and double bits.
 Drive: DIN 3126, ISO 1173, style E 6.3.
 Application: Whenever the bit needs a secure and zero-play hold.
 Optimised for the use of long bits.
 Extra: Due to the special holding mechanism, this bit holder holds all types of bits with 1/4" hex drive.
 The play between bit and holder is reduced to a minimum.
 Single-handed operation for fast bit exchange.

Order-No.	1/4	1/4	60	10
33765				

NEW

7143 CS CentroFix SuperSlim quick release holder, magnetic, style E 6.3.

Sleeve: Stainless steel.
 Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3 and E 6.3.
 Drive: DIN 3126, ISO 1173, style E 6.3.
 Packaging: Plastic box, reusable.
 Application: Particularly suitable for applications in confined working environments.
 Ideal for screw profiles (e.g. Torx) which tend to jam in the screw.
 Extra: Bit is automatically locked when inserted - SelfLock.
 Simple bit removal thanks to EasyOut ejection function.
 Robust operating sleeve of aluminium.
 With strong Neodym magnet.

Order-No.	1/4	1/4	66	10
39134

34306			150	5
36093			200	5
36094			250	5

NEW

7123 MagicFlip Force universal holder with ring magnet, style E 6.3.

Sleeve: Steel hardened, coated.
 Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3 and E 6.3.
 Drive: DIN 3126, ISO 1173, style E 6.3.
 Packaging: Plastic box, reusable.
 Application: The strong Neodym ring magnet even holds long screws securely.
 Enables easy fastening of screws.
 Extra: With strong Neodym magnet.
 Particularly small ring magnet inner diameter, also suitable for drywall screws.
 Ring magnet sleeve springs back to the last fastening phase, allowing a view of the screw head and enabling precise recessing.
 Ring magnet sleeve can be pushed back and thus "deactivated" if required.

Order-No.	1/4	1/4	62	10
36800				

7142 Universal holder, magnetic/ retaining ring, style E 6.3.

Sleeve: Copper beryllium.
 Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3.
 Drive: DIN 3126, ISO 1173, style E 6.3.
 Application: Copper-beryllium alloys prevent ignitable sparks and reduce the danger of explosion. Tools made of copper-beryllium are often used in potentially explosive areas.

Order-No.	1/4	1/4	73	10
01912

Wiha magazine bit holder.

Wiha magazine bit holders are ideally suited for those who require a variety of different screwdrivers but want to save space or weight.

Ergonomically designed handles of soft, skin-friendly material guarantee comfortable handling. High-quality bits can be cleverly stored in the handle.

The solution for bit storage and bit removal in the Wiha magazine bit holder 3809 received the coveted "red dot design award: best of the best."

The "telescopic" version of the magazine bit holder can be adapted to the space constraints using the length-adjustable bit adapter.

Small format – major professional quality: The short design of the Wiha Stubby 3801 magazine bit holder enables comfortable working in tight spaces.

- Unique fold-out mechanism
- Ergonomically designed SoftFinish® multi-component handle
- 1/4" bit holder, magnetic

The bit magazine accommodated by the handle is swung open with a light press of the thumb. The bits can then be quickly and simply changed.

2012

Wiha magazine bit holder telescopic

- Adjustable blade length from 50 - 85 mm. ClickStop ball clamp for secure hold and quick length adjustment
- ClicFix quick release holder, magnetic
- Adapter blade also suitable for use in battery-powered screwdrivers

Wiha magazine bit holder Stubby

- Extremely compact and light
- Ergonomically designed SoftFinish® Stubby multi-component handle
- 1/4" Stubby bit holder, magnetic

Handy, compact and particularly suitable for working in confined spaces.

Magazine bit holder LiftUp 25

The **LiftUp 25** magazine bit holder saves space by storing 25mm bits in its handle. At the press of a button, the bit magazine at the handle end comes out and makes the bits available for removal.

But that's not all, the **LiftUp 70** version has space for six professional 70mm bits. Low-lying fastening elements can be reached more easily. "Long" bits also fully play off their advantages even in battery-powered screwdriver use.

Making a particularly powerful entrance – the new **Topra 2K** with six 25mm bits cleverly located in the ergonomic pistol handle. In addition, there is a finely serrated, switchable ratchet with bit holder.

Bit magazine opens at the press of a button.

Magazine bit holder LiftUp 70

- Many versatile applications thank to its 12 bits
- Bit magazine opens at the press of a button
- Ergonomically designed SoftFinish multi-component handle
- 1/4" bit holder, magnetic
- Turnable cap

- With six 70 mm bits style E6.3
- Also ideal for use with a battery-powered screwdriver
- Particularly simple bit removal
- Bit magazine opens at the press of a button
- Ergonomically designed SoftFinish multi-component handle

Magazine bit holder Topra 2K bit

- Ergonomically designed pistol handle
- Finely serrated ratchet with 72 teeth, switchable
- Six 25mm bits in the handle
- 1/4" bit holder, magnetic, removable
- Further adaptors for SYSTEM6, 1/4" and 3/8" sockets available

Finely toothed, switchable ratchet

Wiha BitBuddy®.

Maximum efficiency by direct insert of bits.

No hand free?
And which bit has the profile you need?

The Wiha BitBuddy® eliminates such day-to-day problems when changing bits, because the new bit box enables you to work more efficiently and quickly than ever before. With consistent single-hand operation and according to the simple principle: "Plug-Work-Store"

Push the Wiha logo a little, and the torsion bits are ready for inserting in the bit holder! The profile type is additionally lasered to the bit base and can thus be instantly identified. The innovative terminal block with push buttons accommodates the bits securely later.

Tried-and-proven as ever: compact dimensions and the Wiha box design tried and tested a million times also characterise the new BitBuddy®. It's always ready to use on a ladder, on the ground or below the ceiling.

The BitBuddy® is available with the 29-series and 49-series assortment of new Maxx torsion bits.

Belt clip suitable for both boxes.
Buddy always fits – in any position!
- Open box
- Closed box
- Front
- Rear

Wiha BitBuddy®.

- Consistent single-handed operation: Opening at the press of a button, simple bit changing thanks to the innovative arrangement of the bits.
- Easy identification: Profile size lasered on the bit base
- At 99 x 63 x 17 mm, it fits into any shirt or trouser pocket or in the optional belt clip
- Robust, impact resistant polyamide

BitBuddy® 29.

NEW

7945-202 BitBuddy® 29, Pozidriv, 8 pcs.

- Housing:** Box of impact resistant, glass-fibre reinforced polyamide - permanently robust.
Bit clamping element with push buttons, 180° rotation.
Extra folding element for the magnetic bit holder.
- Bits:** 29er® MaxxTor bits.
- Geometry:** Maximum length torsion zone individually matched to the profile.
Precision-milled profile for perfect fit and maximum performance.
- Bit holder:** Universal holder 1/4", magnetic - ideal for rapid bit changing.
- Application:** Compact bit box with the most common bits. Ideal for frequently varying fastening applications within one work sector.
Push the Wiha logo slightly, and the bits are ready to be inserted into the bit holder!
Plug & Work & Store - Maximum efficiency due to direct bit insertion without any problems. Insert, work, store.
- Extra:** Design tried and tested a million times
Always ready to use - easily fits into trouser pockets or the belt clip.

Wiha FlipSelector and XLSelector.

Couldn't be smaller!

The Wiha FlipSelector: simplest handling guaranteed.

As the successor of the XSelector, the FlipSelector also features compactness, but combines it with even easier handling and 2 additional bit slots. Now with 12 bits, the configuration variants can be ideally adapted to individual types of applications.

Simply slide the Wiha logo down and the bit clamping element pivots by 180° and releases the bits for removal.

The XLSelector is perfect for those who need more than 12 bits. It holds 30 bits and thus covers an extremely broad fastening spectrum. Thanks to its super-flat design, it fits easily into any electrical toolbox.

Always ready to hand, without annoying searching.

Because it is extremely flat and compact, the XLSelector fits into any case

Wiha FlipSelector

- Contains 12 bits and a bit holder
- Bit box made of impact-resistant polyamide – permanently robust
- Effortless handling, opens at the press of a button
- At 99 x 63 x 17 mm, it fits into any shirt or trouser pocket
- Optional belt clip available to facilitate work further

Wiha XLSelector

- Extremely flat and compact bit box containing 30 bits and a bit holder
- Simple removal of the clearly arranged bits
- At 135x80x17.5 mm, there is space for the XLSelector even in fully packed electrical toolboxes

Wiha XLSelector.

Couldn't be smaller!

Wiha FlipSelector.

Couldn't be smaller!

DuraBits with torsion zone.

NEW

7947-0DR7 FlipSelector Torsion Dura, assorted, 13-pcs.

- Housing:** Box of impact resistant, glass-fibre reinforced polyamide - permanently robust.
Bit clamping element can be swivelled 180°.
Extra folding element for the magnetic bit holder.
- Bits:** 25 mm DuraBits with torsion zone.
Extremely wear-resistant Dura tip with hard-metal coating grips into the screw head and prevents the bit from slipping.
- Geometry:** Patented torsion zone to prevent premature breaking of the bit when under stress.
- Bit holder:** CentroFix quick release holder, magnetic, style E 6.3.
- Application:** Compact bit box with 12 high quality bits.
Slide the Wiha logo down – and the bits are immediately available for removal.
Bits for safe work without fatigue.
- Extra:** Design tried and tested a million times
Always ready to use - easily fits into trouser pockets or the belt clip.

Wiha Collector.

Everything in one box.

A completely new look, and outstandingly equipped: the new Wiha Collector sets standards for convenient application of the bits.

The first impression convinces: the box is compact, solid and surprises with an innovative opening mechanism. The Collector opens up like a book with the easy-to-use button. The bits are clearly laid out, easy to remove and yet so firmly held that they cannot fall out if the box is accidentally knocked over.

And talking of bits: the assortment is designed perfectly for all applications. Whether for special work in safety areas or for every-day tasks in trade and industry, the Wiha Collector is ready and waiting.

Versatile: for up to 60 bits as well as universal and quick release holders.

Innovative opening, and lots of space: the new Collector.

Wiha Collector.

- **Tough**
Compact form, tough polycarbonate
- **Easy to open**
With practical unlocking button - for when only one hand is free
- **Lots of space**
30 premium bits with bit holder and hand-held screwdriver or 60 premium bits with bit holder
- **Diverse**
Security bits or tried-and-true Standard bits for all applications
- **Optimal seating of bits**
Easy to remove and yet still firmly held

Security-bits.

**7928-928 Bit Collector Security, mixed, 27 pcs.**

Housing: Robust box made of high-tensile plastic.
The box opens automatically at the press of a button.

Handle: Wiha SoftFinish® multi-component handle, magnetic, with 1/4" bit mount.

Bits: 25 mm Standard and Torsion bits, TORX® Tamper Resistant, Tri-Wing®, Torq-Set®, Spanner, hex Tamper Resistant.

Bit holder: Universal holder, magnetic.

Application: Bit cassette with bits for all popular security screws.

Wiha SB bit programme.

Full programme range in outstanding quality.

Style C 6.3 and E 6.3 (1/4").

You can display the bits effectively in the practical Wiha plastic boxes.

The bits are easily recognisable in the dust-repellent, transparent packaging. In addition, the labels provide all necessary information and at the same time ensure protection against theft. Contents, EAN code, article number and order number - everything can be seen at a glance with the large-format symbols.

A comprehensive range: the Wiha SB bit range includes more than 100 different items.

Wiha SB bit programme.

- Full size label with viewing window allows a view of box contents
- Large, clearly laid out description of quality, size and quantity
- Reusable plastic box
- Full assortment
- Slotted, Phillips, Pozidriv, hexagonal and TORX® drives, various bit holders and tool shafts
- In bit types: Dura, Diamond, TiN, HOT, ZOT, Inkra and Standard
- 1 pc, 2 pcs, 3 pcs, 6 pcs and 10 pcs

- Wiha DuraBit®
- Wiha TiN-Torsions-Bit
- Wiha ZOT-Torsions-Bit
- Wiha Professional-Bits
- Wiha Standard-Bit

Bit holder.

NEW

7148 CF

CentroFix Force quick release holder, magnetic, style E 6.3.

Sleeve: Steel hardend, coated.
Drive: DIN 3126, ISO 1173, style E 6.3.
Packaging: Plastic box, reusable.
Application: Whenever the bit needs a secure and zero-play hold. Ideal for screw profiles (e.g. Torx) which tend to jam in the screw.
Extra: Bit is automatically locked when inserted - SelfLock. Simple bit removal thanks to EasyOut ejection function. Robust operating sleeve of hardened steel. With strong Neodym magnet.

Order-No.	1/4	1/4	60	10
39133				

NEW

7148 CS

CentroFix SuperSlim quick release holder, magnetic, style E 6.3.

Sleeve: Stainless steel.
Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3 and E 6.3.
Drive: DIN 3126, ISO 1173, style E 6.3.
Packaging: Plastic box, reusable.
Application: Particularly suitable for applications in confined working environments. Ideal for screw profiles (e.g. Torx) which tend to jam in the screw.
Extra: Bit is automatically locked when inserted - SelfLock. Simple bit removal thanks to EasyOut ejection function. Robust operating sleeve of aluminium. With strong Neodym magnet.

Order-No.	1/4	1/4	66	10
39134				

Bit holder.

**NEW****7123** MagicFlip Force universal holder with ring magnet, style E 6.3.

Sleeve: Steel, coated.

Suitable for: For bits according to DIN 3126, ISO 1173 style C 6.3.

Drive: DIN 3126, ISO 1173, style E 6.3.

Packaging: Plastic box, reusable.

Application: The strong Neodym ring magnet even holds long screws securely. Enables easy fastening of screws.

Extra: With strong Neodym magnet. Particularly small ring magnet inner diameter, also suitable for drywall screws. Ring magnet sleeve springs back to the last fastening phase, allowing a view of the screw head and enabling precise recessing. Ring magnet sleeve can be pushed back and thus "deactivated" if required.

Order-No.

**NEW****7011 DWS** Drywall stop bit, Phillips, style C 6.3, in a plastic box.

Material: High grade chrome-vanadium steel, through hardened.

Drive: DIN 3126, ISO 1173, style C 6.3.

Application: The ideal bit for drywall constructors.

Extra: The blue ring prevents the screw from being recessed too deeply into the plasterboard.

For high standards when it comes to precision and safety. 310 – 313

Wiha pliers.

Quality and ergonomics for professionals.

Quality in all aspects from stripping to gripping

Maximum quality for all products - in this way Wiha meets the high demands of the user. This also holds true for the pliers assortment.

First class material, tried-and-true processes

Selected, premium grade steel, pleasant plastic application on the handle and a manufacturing process for all aspects according to state-of-the-art quality management directives - this forms the basis for the tried-and-trusted Wiha quality. A special heat treatment and inductive hardening of highly stressed parts ensure a long lifespan.

Even more precise? Yes!

"Functionality": this somewhat sober yet important phrase represents a host of clever ideas. As such Wiha pays attention to a precise interplay of joints and an exact processing of cutting edges and gripping surfaces.

Ergonomics: "grippy" in the best sense of the word!

Wiha pliers are consistently designed according to the requirements of users. Proof of this is the innovative and angled form of the Wiha Inomic® pliers series. And the multi-component plier handles have also been designed according to the latest findings from the field of ergonomics. With extra wide handle backs and a well thought-out distribution of soft and hard zones they are both comfortable and easy on the hands.

Not only new, but innovative as well

Current examples in the further development of the Wiha pliers series clearly demonstrate what the power of innovation can achieve for users:

- Wiha has perfected the interplay of technology and natural movement with the **Inomic®** pliers generation.

- More "bite", meaning greater cutting performance with less expenditure of effort: that's what **Wiha DynamicJoint** represents. The optimised joint construction reduces the force needed for cutting!

- The **BiCut** diagonal cutters are a real problem-solver and once again underline user proximity: If the force during cutting with heavy-duty diagonal cutters is insufficient or needs high effort, help is at hand with the simple press of a button. 200% power at the press of a button means double the cutting force or half the required hand strength – unique!

- **MagicTips**, the precision tips of high performance steel achieve more stability and safety with circlip pliers from the Classic series. The special latching function preventing jumping away of the safety rings makes them both unique and very handy!

- **OptiGrip**, optimal grip due to newly designed gripping surfaces. The 'triple-point support' protects the workpiece from twisting or slipping. Now in standard Wiha combination pliers and high leverage combination pliers.

Because that is and has always been the aim of Wiha innovations: making work with pliers safer, more energy-saving and with greater comfort. For absolutely professional results.

Wiha quality management

The Wiha quality assurance system in accordance with ISO

9001:2008 ensures with pliers as well that only first-class products leave our factory. Continuously monitored production processes and documented organisational procedures form the basis for the excellent quality for which Wiha products are renowned.

product
design
award

2011

For its outstanding design quality, the new Wiha pliers generation has received the "iF – product design award". In 2011, there was a focus on the brand image. A strong and striking product appearance is the result of consistent brand management.

Distinction of the new Wiha pliers generation: Convincing design quality, design and product appearance.

reddot design award
winner 2007

For ergonomic and qualitative design, the Wiha Inomic® pliers were awarded not only the "iF – product design award" but the "red dot design award" as well. In addition to the red dot award, organised as part of the world's largest show for contemporary design, the iF product design award is one of the oldest and most renowned design accolades.

*Inomic® distinctions:
The levels of innovation, functionality, ergonomics and service life speak for themselves.*

product
design
award

2007

Wiha Professional pliers have won the "Focus in Silver" award for outstanding design. The Stuttgart Design Center awarded the 2006 international design prize in a special energy category. Energy also determines the reference level – the key to success.

*"Focus in Silver" award:
Convincing ergonomics, surface feel and clean design lines.*

Wiha Inomic®.

Pliers – reinvented.

product
design award

2013

reddot design award
winner 2013

Head of pliers made of high quality tool steel, cutting edges additionally induction hardened

Metal parts with all-round, corrosion resistant surface

The areas in the arm of the pliers that move and press against each other feature hard plastic: low abrasion

Locking mechanism: Pliers should be transported and stored in closed position

Handle with ergonomic soft-grip zone made of thermoplastic elastomer (TPE) in the pressure area around the ball of the thumb

Impact-resistant tool body made of fibre-glass reinforced plastic: Low weight

Innovative technology and as ergonomic as nature: descriptions that fit Wiha Inomic® pliers perfectly.

Firstly as an extension of the hand: firm and secure when gripping, and with a natural movement that is easy on the joints. And then progressive know-how: with high quality materials that feel soft but are relentless with components being worked upon.

Pliers have been around for ages. But never with so many ideas and intelligent details as the Wiha Inomic® pliers.

The relaxed hold when using Inomic® ensures fatigue-free work.

Fraunhofer Institut
Arbeitswirtschaft und
Organisation

In collaboration with the IAO Stuttgart (Institute for Industrial Engineering), a wide variety of shapes and variants for this new generation of pliers was investigated during the course of extensive studies and user tests. Gripping system, hand closure forces, jaw shapes and geometries are just a few of the points examined.

Wiha Inomic®.

- **Gentle**
The angled form is easy on muscles, tendons and joints
- **Powerful**
All fingers grip at the same time.
- **Robust and durable**
Strong pliers jaws, complete zinc-nickel coating, impact resistant construction
- **Sensitive**
Greater control with grasping via opening spring with fine resistance
- **Ergonomic**
Like the extension of a hand: grasping is simple, firm and safe
- **Attractive**
An appealing design

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

Combination pliers.**Z 01 0 15** Combination pliers Inomic®.

Head shape: Extra long cutting edge for flat and round cables.
Design: Serrated gripping jaws.
 Cutting edges additionally induction hardened to approx. 64 HRC.
 Arms of the pliers move in parallel: +25% force transfer.
 Angled shape (23°) for fatigue-free work.
 With opening spring and locking mechanism.
Material: Pliers head of high quality C 70 tool steel.
 Handles made of tough fibre-glass reinforced plastic, ergonomic soft grip zone in the handle.
Application: For gripping, holding and cutting.
 With improved access to the objects to be processed.

Wiha Inomic® VDE.

Completely relaxed.

product
design award

2013

reddot design award
winner 2013

How can maximum safety and effective working be combined with live parts?
It's possible, with the Wiha Inomic® VDE.

A principle of nature has inspired Wiha for the design of this pliers range: the angled form of the pliers means the user can work without tiring limbs, sinews and muscles, and he can apply a powerful grip when cutting. That means: tiredness and aching limbs are not an issue even after hours of work.

And just to be on the safe side: Wiha Inomic® VDE pliers are regularly subjected to a wide range of stringent quality inspections, thus repeatedly confirming their high normative quality.

Safety and functionality at the highest level - and with unashamedly good looks!

The relaxed position of the hand when using Inomic® VDE ensures fatigue-free work. Guaranteed with highest electrical safety level.

1000 V
IEC 60900:2012

Approved for work in the area of live parts up to 1,000 V AC or 1,500 V DC. When working with VDE tools, observe the national safety and accident prevention regulations.

Wiha Inomic® VDE.

- **Uncompromisingly safe**
Manufactured and inspected according to IEC 60900:2012, one-off testing at 10,000 V, GS mark for inspected safety, VDE tested
- **Gentle**
The angled form is easy on muscles, tendons and joints
- **Powerful**
All fingers grip at the same time.
- **Robust and durable**
Strong pliers jaws, complete zinc-nickel coating, impact resistant construction
- **Sensitive**

Wiha Professional.

Quality down to the last detail.

product
design
award

2011

Focus Energy
Silver 2006

Functionality, quality and comfort: only three of the many features that professionals fundamentally demand of their tools. Wiha Professional implements these in a consistent manner.

With a new dimension in terms of functionality: DynamicJoint®, the progressive development of the joint construction, ensures precise cuts with simultaneously less force of power. Cutting performance is still as high even after thousands of applications! And in addition Wiha Professional pliers are characterised by manufacture from selected, multi-hardened steel with quality chrome plating. The elastic, shock absorbing plastic handles guarantee comfortable, fatigue-free work.

Wiha Professional carries on where average tools give up the ghost. For thoroughly professional results every time.

Wiha Info

Wiha DynamicJoint –
A new dimension in
strength and durability

- **Innovative:**
Optimised joint construction
- **Effective:**
Low loss of force means
less force needed for cutting
- **Permanent:**
Optimal performance even after
thousands of cuts

Wiha Info

Opti-Grip – optimal grip
due to newly designed gripping
surfaces

- **A firm hold:** The 'triple-point support' protects the workpiece from twisting or slipping.
- **Highly effective:** Optimum grip even with a large jaw opening – and at the same time significantly less force needed
- **A wide selection:** Now in standard Wiha combination pliers and high leverage combination pliers

Wiha Professional.

- **Powerful**
With DynamicJoint, the high quality joint construction for simple, long-term cutting efficiency
- **As hard as steel**
Pliers head drop forged from high quality steels
- **Robust and durable**
Cutting edges are individually tempered and additionally induction hardened to approx. 64 HRC; joints are extremely wear resistant and withstand high stresses, with high-quality riveting
- **Ergonomic**
Extra wide handle backs, with soft and hard zones perfectly distributed across the handle
- **Attractive**
Award-winning design with high quality chrome-plated head

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

Combination and high leverage combination pliers.**Z 01 0 05 Combination pliers Professional.**

Standards: DIN ISO 5746.

Head shape: Extra long cutting edge for flat and round cables.

Design: OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working.
Cutting edges additionally induction hardened to approx. 64 HRC.
The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, tempered.

Application: General purpose pliers for gripping and holding as well as cutting soft and hard wires and cables.

**Z 02 0 05 High leverage combination pliers Professional.**

Standards: DIN ISO 5746.

Head shape: Extra long cutting edge for flat and round cables.

Design: OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working.
Particularly powerful leverage results in 40% less effort being required for cutting tasks compared with standard combination pliers.
Cutting edges additionally inductively hardened to approx. 64 HRC, therefore also appropriate for cutting piano wire.
The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, specially tempered.

Application: Power assisted general purpose pliers for gripping and holding as well as cutting wires and cables ranging in hardness from soft to extremely hard.

Diagonal cutters and stripping pliers.

NEW

Z 18 0 05 BiCut Professional - switchable high-performance diagonal cutters.

Standards: Based on DIN ISO 5749.
Head shape: Semi-circular.
Design: Clever - BiCut does the job of two pairs of pliers. Powerful - Up to 50% less hand strength required for cutting. Power - Cutting force doubled for extremely hard materials. Comfortable - Easily switch between the two strengths in a one handed operation. Robust and durable - Cutter blades induction hardened up to 64 HRC.
Material: Hard as steel - Drop forged of high-quality C70 steel.
Application: For cutting various materials from soft to extremely hard, such as cables, nails, screws, bolts, wire cable, spring wire, chains, etc.

Wiha Info

Wiha BiCut -
Double the power at the
press of a button

- **Clever:**
BiCut does the job of two pairs of pliers.
- **Power:**
Cutting force doubled for extremely hard materials.
- **Powerful:**
Up to 50% less hand strength required for cutting.

Wiha Info

Wiha DynamicJoint -
A new dimension in
strength and durability

- **Innovative:**
Optimised joint construction
- **Effective:**
Low loss of force means less force needed for cutting
- **Permanent:**
Optimal performance even after thousands of cuts

Wiha Professional.

Quality down to the last detail.

Needle-nose and round-nose pliers.

Z 07 0 05 Long-flat nose pliers Professional.

Standards: DIN ISO 5745.
Head shape: Extra long head.
Design: Ridged gripping surfaces.
Material: High-quality tool steel, tempered.
Application: Gripping and right-angled bending of wires and sheet metal parts.

Order-No.	mm	II	g	SB	
26731	160	6 ½	160		5
27407	160	6 ½	160	x	5

Z 09 0 05 Long-round nose pliers Professional.

Standards: DIN ISO 5745.
Head shape: Extra long head.
Design: Ridged gripping surfaces.
Material: High-quality tool steel, tempered.
Application: Gripping and bending of wires and sheet metal parts.

Order-No.	mm	II	g	SB	
26734	160	6 ½	140		5
27408	160	6 ½	140	x	5

Revolving punch pliers.

Z 65 2 05 Professional revolving punch and loop pliers.

Head shape: Alternate equipping of perforating tubes and loop punches.
Design: Locking lever and rotatable magazine with hole sizes 4.0 / 4.5 and 5.0 mm and corresponding loop punches for loops of 4.5 / 5.0 / 5.5 mm sizes.
Ergonomic plastic handle.
Material: Body of pliers made of high-resistance special steel, nickel-plated.
Application: For perforating and pressing of loops in three sizes with only one tool.

Order-No.	mm	II	Ø	g	
29550	225	9	4,0-5,0	325	5

Z 65 0 05 Professional revolving punch pliers.

Head shape: Size designation of perforating tubes in viewing window.
Design: Locking mechanism and 6 exchangeable punching tools, diameter: 2.0 / 2.5 / 3.0 / 3.5 / 4.0 / 4.5 mm.
With opening spring and locking mechanism for real single-handed operation.
Material: Body of pliers made of high-resistance special steel, nickel-plated.
Application: Perforation of a wide variety of different materials in trade, industry and DIY.

Order-No.	mm	II	Ø	g	
28402	225	9	2,0-4,5	325	5

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

**Pliers set.****Z 99 0 002 05 Pliers set Professional Plus, 3 pcs.**

Design: All pliers made of high quality tool steel, hardened, polished and chrome-plated.
Multi-component handles with slip guard for safe and comfortable operation.
Cutting pliers are also suited for extremely hard wires.
QuickFix water pump pliers with "automatic" rapid adjustment.
Weight 1120 g.

Application: Power assisted pliers for providing craftsmen or industrial mechanics with a basic set of pliers.

Display.**Z 99 0 005 05VH Professional pliers display.****Carton display with 10 pliers and 10 pliers flyers.**

Design: Pliers made of high quality tool steel, hardened, polished and chrome plated.
Multi-component handles with slip guard for safe and comfortable operation.
Size 33.5 x 20 x 40 cm (WxDxH).
Weight 6.95 kg.

Application: The pliers selection for demanding users in trade and industry.

Wiha Info**Wiha DynamicJoint –
A new dimension in
strength and durability**

- **Innovative:**
Optimised joint construction
- **Effective:**
Low loss of force means
less force needed for cutting
- **Permanent:**
Optimal performance even after
thousands of cuts

Wiha Info**Opti-Grip – optimal grip
due to newly designed gripping
surfaces**

- **A firm hold:** The 'triple-point support' protects the workpiece from twisting or slipping.
- **Highly effective:** Optimum grip even with a large jaw opening – and at the same time significantly less force needed
- **A wide selection:** Now in standard Wiha combination pliers and high leverage combination pliers

Wiha Professional electric.

Completely reliable.

product
design
award

2011

Focus Energy
Silver 2006

Hard, comfortable elastomer zones
ensure low friction in the movement
range of the fingers

The stops on the ends of the arms
prevent the hands from slipping

The robust, ergonomic handle is
carefully fixed to the pliers

Extra broad arms made of soft,
non-slip elastomer are gentle on the
parts of the hand that are sensitive to
pressure

Harmonious design of the front part of the
handle for an optimum finger hold when
applying force

Valuable chrome plating for long
lasting corrosion protection

For the VDE-tested Wiha Professional electric pliers only one thing counts: to protect the user one hundred percent when working precisely with live parts.

The new DynamicJoint® construction proves its worth: it makes cutting significantly easier and helps to eliminate the danger of cramping or slipping due to excessive force of power.

In addition the handle insulation and curved handle ends that prevent the fingers slipping away ensure even more safety.

Wiha Info

Wiha DynamicJoint –
A new dimension in
strength and durability

- **Innovative:**
Optimised joint construction
- **Effective:**
Low loss of force means
less force needed for cutting
- **Permanent:**
Optimal performance even after
thousands of cuts

Must maintain the highest level of electrical safety! All Wiha Professional electric pliers meet the strict VDE requirements.

1000 V
IEC 60900:2012

Approved for work in the area of live parts up to 1,000 V AC or 1,500 V DC. When working with VDE tools, observe the national safety and accident prevention regulations.

Wiha Professional electric.

- **Uncompromisingly safe**
Manufactured and inspected according to IEC 60900:2012, one-off testing at 10,000 V, GS mark for inspected safety, VDE tested
- **Powerful**
With DynamicJoint®, the high quality joint construction for simple, long-term cutting efficiency
- **As hard as steel**
Pliers head drop forged from high quality steels
- **Robust and durable**
Cutting edges are individually tempered and additionally induction hardened, joints are extremely wear resistant and can withstand high stresses, and with high-quality riveting
- **Ergonomic**
Extra wide handle backs, with soft and hard zones perfectly distributed across the handle
- **Attractive**
Award-winning design

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

Combination pliers and high-leverage combination pliers.

1000 V
IEC 60900:2012

Z 01 0 06**Combination pliers Professional electric.**

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: DIN ISO 5746. Manufactured acc. to IEC 60900:2012.

Head shape: Extra long cutting edge for flat and round cables.

Design: OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working.
Cutting edges additionally induction hardened to approx. 64 HRC.
The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, tempered.

Application: General purpose pliers for gripping and holding as well as cutting soft and hard wires and cables.

For all work on or around electrical components up to 1,000 V AC.

1000 V
IEC 60900:2012

Z 02 0 06**High leverage combination pliers Professional electric.**

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: DIN ISO 5746. Manufactured acc. to IEC 60900:2012.

Head shape: Extra long cutting edge for flat and round cables.

Design: OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working.

Particularly powerful leverage results in 40% less effort being required for cutting tasks compared with standard combination pliers.

Cutting edges additionally inductively hardened to approx. 64 HRC, therefore also appropriate for cutting piano wire.

The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, specially tempered.

Application: Power assisted general purpose pliers for gripping and holding as well as cutting wires and cables ranging in hardness from soft to extremely hard. For all work on or around electrical components up to 1,000 V AC.

Diagonal cutters.

NEW

Z 18 0 06

BiCut Professional electric - switchable high-performance diagonal cutters.

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: Based on DIN ISO 5749.

Head shape: Semi-circular.

Design: Clever - BiCut does the job of two pairs of pliers. Powerful - Up to 50% less hand strength required for cutting. Power - Cutting force doubled for extremely hard materials. Comfortable - Easily switch between the two strengths in a one handed operation. Robust and durable - Cutter blades induction hardened up to 64 HRC.

Material: Hard as steel - Drop forged of high-quality C70 steel.

Application: For cutting various materials from soft to extremely hard, such as cables, nails, screws, bolts, wire cable, spring wire, chains, etc. For all work on or around electrical components up to 1,000 V AC.

Installation pliers and cable cutter.**NEW**

1000 V
IEC 60900:2012

Z 14 1 06**Professional electric TriCut installation pliers**

Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: Manufactured acc. to IEC 60900:2012.

Head shape: With three processing stations: For cutting and stripping.

Design: Low wear lap joint, riveted and able to withstand high loads.

Diagonal cutters with durable cutting edges due to additional induction hardening to approx. 64 HRC.

Ergonomic and energy-saving stripping lengthwise on the cable and the pliers, thanks to the specially cranked head.

Material: High quality C 70 tool steel, tempered.

Application: Diagonal cutters for cutting soft and hard wires, as well as cables such as NYM lines 3x1.52 - 5x2.52

Flush stripping of round and damp-proof cable and stripping of conductors, even in hard-to-reach areas, e.g. in junction boxes and distribution boxes. For all work on or around electrical components up to 1,000 V AC.

Wiha Professional electric.

Completely reliable.

Cable shears.

Z 71 1 06 Cable shears Professional electric.

Head shape: Lightweight standard model, straight.
 Design: Standard model with wire stripper, cutting length 37 mm.
 Screw joint, adjustable cutting blades.
 Extruded plastic handle for a secure hold when cutting.
 Material: C 50 carbon steel, hardened, nickel-plated.
 Application: Universal cutter for electricians and other trades, also suitable for cutting and cutting back of cables.

Order-No.	mm	II	g	
27907	145	5 ¾	95	5

Cable shears.

Z 71 4 06 Electrician's / craftsman's cutters Professional electric.

Head shape: Sturdy model, straight, very robust, micro-toothed cutting.
 Design: Precision model with wire stripper; cutting length 50 mm.
 Concealed, adjustable screw joint.
 Extruded handle made of impact-resistant plastic for powerful and safe cutting.
 Material: High-alloy carbon steel, hardened, black finish.
 Application: Highly-developed universal cutter for electricians and other trades, also suitable for cutting and stripping copper cables.

Order-No.	mm	II	g	
27910	145	5 ¾	120	manganese-phosphated 5

Z 71 6 06 Electrician's / craftsman's cutters Professional electric.

Head shape: Strong, powerful design, straight, very robust, micro-ridged blade.
 Design: Particularly comfortable two-component handle with soft zone in area subject to compressive stress.
 Cutting edge with wire cutter, cutting length 43 mm, cutting edge hardness approx. 56 HRC.
 Concealed, adjustable screw joint.
 Material: Blades made of stainless steel, handles made of high-quality plastics.
 Application: Qualitative, comfortable universal shears for electricians and many applications for trade and industry.
 Also suitable for cutting and cutting back of cables.

Order-No.	mm	II	g	
33910	145	5 ¾	80	5

Z 71 5 06 Electrician's / craftsman's cutters Professional electric.

Head shape: Standard model, straight, micro-toothed blade.
 Design: Particularly comfortable two-component handle with soft zone in area subject to compressive stress.
 Cutting edge with wire cutter, cutting length 34 mm.
 Concealed, adjustable screw joint.
 Material: Blades made of stainless steel, handles made of high-quality plastics.
 Application: Comfortable universal cutter for many applications in trade and industry, also suitable for cutting and stripping cables.

Wiha crimp tools.

Crimping tools.

Z 62 0 000 06 Crimping tools for wire-end sleeves.

Head shape: Square crimp, linear pressing.
 Design: Tool with only one crimp profile.
 Automatic adjustment of cross-section area.
 Lateral contact feed.
 Low hand force required with optimal transmission.
 Delockable force lock for ensuring complete crimping process; required crimp pressure is factory set.
 Ergonomically formed soft handle with slip protection for especially comfortable handling.
 Material: Of high-tensile special steel.
 Parts subject to extreme loading are specially hardened and tempered.
 Application: For processing of wire-end sleeves with and without isolating collar according to DIN 46228, EN 50027. Especially suitable for processing twin sleeves.

Order-No.	mm	Ø mm	AWG	g	
33845	196	0.08-10	28-8	300	1

Z 62 0 001 06 Crimping tools for wire-end sleeves.

Head shape: Trapezoid crimp, radial travel.
 Design: Crimp profile:
 Profile 1. 0.14 - 0.75 mm² / AWG 26 - 18
 Profile 2. 1.0 - 1.5 mm² / AWG 18 - 16
 Profile 3. 2.5 mm² / AWG 14
 Profile 4. 4.0 mm² / AWG 12
 Profile 5. 6.0 mm² / AWG 10
 Profile 6. 10.0 mm² / AWG 8
 Delockable force lock for ensuring complete crimping process; required crimp pressure is factory set.
 Ergonomically formed soft handle with slip protection for especially comfortable handling.
 Material: Of high-tensile special steel.
 Parts subject to extreme loading are specially hardened and tempered.
 Application: For processing of wire-end sleeves with and without isolating collar according to DIN 46228, EN 50027.

Order-No.	mm	Ø mm	AWG	g	
33844	220	0.14-10	26-8	510	1

Crimping tools.

Z 62 0 002 06 Crimping tools for isolated cable eyes and contacts.

Head shape: Oval crimp, radial pressing.
 Conducting and isolating crimp are carried out in one work step.
 Design: Crimp profile:
 Red profile: 0.5 - 1.0 mm² / AWG 20 - 16
 Blue profile: 1.5 - 2.5 mm² / AWG 16 - 14
 Yellow profile: 4.0 - 6.0 mm² / AWG 12 - 10
 Delockable force lock for ensuring complete crimping process; required crimp pressure is factory set. Ergonomically formed soft handle with slip protection for especially comfortable handling.
 Material: Of high-tensile special steel.
 Parts subject to extreme loading are specially hardened and tempered.
 Application: For processing of red, blue and yellow isolated cable eyes, pin-end cable connectors, contact pins, contact pin sleeves, circular pins, circular pin sleeves, batch connectors and parallel connectors according to DIN 46234.
 For standardised, solderless electrical connections.

Order-No.	mm	Ø mm	AWG	g	
33841	220	0.5-6	20-10	510	1

Z 62 0 004 06 Crimping tools for non-isolated cable eyes with closed sleeve.

Head shape: W injection, radial pressing.
 Design: Crimp profile:
 Profile 1. 0.1 - 0.5 mm² / AWG 26 - 20
 Profile 2. 0.5 - 2.5 mm² / AWG 20 - 14
 Profile 3. 4.0 - 6.0 mm² / AWG 12 - 10
 Profile 4. 10.0 - 16.0 mm² / AWG 8 - 6
 Delockable force lock for ensuring complete crimping process; required crimp pressure is factory set.
 Ergonomically formed soft handle with slip protection for especially comfortable handling.
 Material: Of high-tensile special steel.
 Parts subject to extreme loading are specially hardened and tempered.
 Application: For processing of non-isolated cable eyes, pin-end cable connectors, batch connectors and mini cable eyes according to DIN 46234/ DIN 46230/ DIN 46341.
 For solderless electrical connections according to standards.

Order-No.	mm	Ø mm	AWG	g	
33843	220	0.1-16	26-6	510	1

Wiha crimp tools and stripping pliers.

Crimping tools and automatic stripping pliers.

Z 62 0 003 06 Crimping tools for non-isolated contact pins.

Head shape: B-crimp, radial pressing.
 Conducting and isolating crimp are carried out in one work step.

Design:
 Crimp profile: Contact width 6.3 / 9.5 mm
 Profile 1. 0.25 - 0.5 mm² / AWG 22 - 20 / F 6.3 + 9.5
 Profile 2. 0.5 - 1.0 mm² / AWG 20 - 16 / F 6.3 + 9.5
 Profile 3. 1.5 - 2.5 mm² / AWG 16 - 14 / F 6.3 + 9.5
 Profile 4. 4.0 - 6.0 mm² / AWG 12 - 10 / F 6.3 + 9.5
 Delockable force lock for ensuring complete crimping process;
 required crimp pressure is factory set. Ergonomically formed soft
 handle with slip protection for especially comfortable handling.

Material:
 Of high-tensile special steel.

Application:
 Parts subject to extreme loading are specially hardened and tempered.
 For processing of non-isolated contact pins and contact pin sleeves
 according to DIN 46247 for standardised, solderless electrical
 connections.

Order-No.	mm	Ø mm	AWG	g	SB
33842	220	0.25-6	22-10	510	1

246 75 SB Automatic stripping pliers. Blister packed.

Design:
 Automatic setting to various conductor diameters.
 Settable length stop from 5 -12 mm, can be removed if required.
 Integrated, easily accessible wire cutter.
 Light, ergonomically designed tool body with narrow head for optimal
 use in hard-to-reach areas.
 Locking for safe, space-saving transport.

Material:
 Housing of glass-fibre reinforced polyamide.

Application:
 Stripping of all commonly used flexible and solid conductors from 0.2 –
 6.0 mm² (24 - 10 AWG).
 Wire cutter for cutting of Cu and Al conductors to max. Ø2 mm.

Order-No.	mm	mm	Ø mm	AWG	g	SB	SB
36050	190	7½	0.2-6.0	24-10	110	x	1

Automatic Stripping pliers.

246 72 SB Automatic stripping pliers. Blister packed.

Design:
 Self-adjusting straight cutting edge in exchangeable cassette and wire
 cutter for copper and Al conductors.
 Optimally positioned wire cutter enables effortless cutting of multi-wire
 conductors to 10 mm² / 8 AWG.
 Simply replaceable stripping cassette with adjustable stripping length to
 18 mm and adjustable cutting depth for various insulation materials.
 Ergonomically sophisticated solution with soft plastic zone in main hand-
 le, secure gripping without play, optimised handle opening width, an
 angled head as well as a low weight for working without fatigue.

Material:
 Housing of tough glass-fibre reinforced plastic.
 Soft plastic zone in upper handle section used for gripping.

Application:
 For precise stripping and cutting of single, multi and fine-wired cables
 for many tasks in the electronics industry.

Order-No.	mm	mm	Ø mm	AWG	g	SB	SB
33847	190	7½	0.02-10	34-8	135	x	1

246 73 SB Stripping cassette for automatic stripping pliers. Blister packed.

Design:
 Cassette with straight blade.

Order-No.	Ø mm	AWG	g	SB	SB
33846	0.02-10	34-8	7	x	1

Wiha crimp tools and stripping tools.

Stripping tools.

246 22 02 Cable stripper.

- Design:** Comfortable stripping with continuously adjustable cutting depth per adjusting screw and self-turning inner cutter. Damage to the inner conductor is therefore eliminated. Self-tensioning holding lever for safe cable guide. With cutter and hooked blade incl. safety cap for transport and storage. Additional spare blades included in the tool. Ergonomically designed construction.
- Material:** Impact resistant plastic housing made of Polyamide reinforced with glass-fibre. Hooked blade and cutter are made of hardened steel.
- Application:** Precise, fast and safe stripping of all common round cable from \varnothing 4 mm – 28 mm. Self-turning inner cutter for circular and longitudinal cutting.

Order-No.	mm	II	Ø mm	g	SB	
35969	165	6 ½	4.0-28	80		1
35538	165	6 ½	4.0-28	80	x	1

NEW 246 80 SB Cable stripping knife.

- Standards:** Manufactured acc. to IEC 60900:2012.
- Design:** Rugged, fixed blade with straight cutting edge. Non-slip soft component in the handle ensures an optimal hold and more safety. Protective cap for safe transport and protection of cutting edges.
- Material:** Insulating multi-component handle. Blade of hardened, non-rusting steel.
- Application:** For stripping and cutting open of insulation, particularly large cables and the various layers of multi-insulated cables. For all work on or around electrical components up to 1,000 V AC.

Order-No.	mm	II	g	SB	
38798	200	8	120	x	1

Crimping and stripping tool.

246 78 SB Stripping knife for round cables.

- Blister packed.**
- Standards:** Manufactured acc. to IEC 60900:2012.
- Design:** Robust, fixed, sickle-shaped hooked blade. Shoe-shaped blade tip limits the cutting depth and prevents damage to conductors. Protective cap for safe transport and protection of cutting edges.
- Material:** Insulating multi-component handle. Blade of hardened, non-rusting steel.
- Application:** For stripping thick cables and cutting open the various layers of multi-insulated cables. For all work on or around electrical components up to 1,000 V AC.

Order-No.	mm	II	g	SB	
36053	200	8	120	x	1

246 77 SB Stripping tool for round cables.

- Blister packed.**
- Design:** Double layered, folding stripping tool with opening spring and locking mechanism. Setting of cutting depth not required. Ergonomically designed tool body for non-slip, safe work.
- Material:** Housing of glass-fibre reinforced polyamide.
- Application:** Flush stripping of round and damp-proof cable from \varnothing 8 – 13 mm (e.g. NYM 3 x 1.5 mm² to 5 x 2.5 mm²), also for hard-to-reach locations e.g. ceiling and wall areas, in junction boxes, distribution boxes, switch cabinets etc.

Order-No.	mm	II	Ø mm	g	SB	
36052	125	5	8-13	45	x	1

246 76 SB Stripping tool for coaxial cables.

- Blister packed.**
- Design:** Double layered, folding stripping tool with opening spring and locking mechanism. Setting of cutting depth not required. Extra-long tool body for optimal handling. With 5.0 - 20.0 mm length scale.
- Material:** Housing of glass-fibre reinforced polyamide.
- Application:** Incremental stripping of all commonly used coaxial cables (e.g. antenna and transmission cables) from 4.8 – 7.5 mm outer diameter. Also suitable for stripping of round cables (e.g. NYM 3 x 0.75 mm², PVC flex 10 mm² and 16mm²).

Order-No.	mm	II	Ø mm	g	SB

Focus Energy
Silver 2006

For industrial applications in particular, the diversity of tools and the demands made upon them have increased dramatically. Here the Wiha Industrial pliers series has proven to be ideal. It combines the advantages of the Wiha Professional and Classic series: pleasant handling, a concise shape and a flexible range.

With DynamicJoint, Wiha Industrial implements the new generation of precision joints: cuts are powerful and at the same time more energy-saving than ever before. Tests have proven: significantly less expenditure of effort is a convincing argument.

Wiha Info

Wiha DynamicJoint –
A new dimension in
strength and durability

- **Innovative:**
Optimised joint construction
- **Effective:**
Low loss of force means
less force needed for cutting
- **Permanent:**
Optimal performance even after
thousands of cuts

Wiha Industrial pliers offer a secure hold when gripping, bending and cutting soft and hard wire.

Wiha Industrial.

- **Powerful**
With DynamicJoint®, the high quality joint construction for simple, long-term cutting efficiency
- **As hard as steel**
Pliers head drop forged from high quality steels
- **Robust and durable**
Cutting edges are individually tempered and additionally induction hardened to approx. 64 HRC; joints are extremely wear resistant and withstand high stresses, with high-quality riveting
- **Ergonomic**
Extra wide handle backs, with soft and hard zones perfectly distributed across the handle
- **Attractive**
An appealing design, with a multi-polished head

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

Combination and high leverage combination pliers.**Z 01 0 02** Combination pliers Industrial.

Standards: DIN ISO 5746.

Head shape: Extra long cutting edge for flat and round cables.

Design: OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working.
Cutting edges additionally induction hardened to approx. 64 HRC.
The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, tempered.

Application: General purpose pliers for gripping and holding as well as cutting soft and hard wires and cables.

Order-No.	mm	II	○	●	●	g	SB

**Z 02 0 02** High-leverage combination pliers Industrial.

Standards: DIN ISO 5746.

Head shape: Extra long cutting edge for flat and round cables.

Design: OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working.
Particularly powerful leverage results in 40% less effort being required for cutting tasks compared with standard combination pliers.
Cutting edges additionally inductively hardened to approx. 64 HRC, therefore also appropriate for cutting piano wire.
The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, specially tempered.

Application: Power assisted general purpose pliers for gripping and holding as well as cutting wires and cables ranging in hardness from soft to extremely hard.

Wiha Industrial.

Comfortable in your hand, versatile in application.

Diagonal cutters and heavy duty diagonal cutters.

Z 12 0 02 Diagonal cutters Industrial.

Standards: DIN ISO 5749.
Head shape: Semi-circular, swedish style.
Design: Low wear lap joint, riveted and able to withstand high loads.
The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.
Lightweight action, clean cutting achieved by specially milled precision cutting edges.
Long term cutting is achieved through additional inductive hardening to approx. 64 HRC.
Material: High quality C 70 tool steel, tempered.
Application: For soft and hard wires.

Diagonal cutters and heavy-duty end cutting nippers.

NEW

Z 18 0 02 BiCut Industrial - switchable high-performance diagonal cutters.

Standards: Based on DIN ISO 5749.
Head shape: Semi-circular.
Design: Clever - BiCut does the job of two pairs of pliers.
Powerful - Up to 50% less hand strength required for cutting.
Power - Cutting force doubled for extremely hard materials.
Comfortable - Easily switch between the two strengths in a one handed operation.
Robust and durable - Cutter blades induction hardened up to 64 HRC.
Material: Hard as steel - Drop forged of high-quality C70 steel.
Application: For cutting various materials from soft to extremely hard, such as cables, nails, screws, bolts, wire cable, spring wire, chains, etc.

Z 17 0 02 Industrial heavy-duty end cutting nippers.

Standards: DIN ISO 5748.
Head shape: Classic style.
Design: Low wear lap joint, riveted and able to withstand high levels of load.
Striking high quality cutting edge with high cutting performance and low application of force due to highly precise processing.
Good durability due to additional induction hardening of cutting edges to approx. 64 HRC.
Material: High-quality C 70 tool steel, hardened, polished and chrome-plated.
Application: Power assisted, all round diagonal cutter for soft wires as well as demanding piano wires.
Also appropriate for binding (plaiting) and cutting wire netting in reinforced concrete structures.

Wiha Industrial electric.

Highest safety even for non-chromed pliers.

Wiha Industrial electric heavy-duty diagonal cutters are incomparably good and durable when cutting electrical cables and for tough cutting jobs.

Outstanding cutting quality due to high-quality tool steel C70

Multiple polished heads

Comfortable, easy stripping using precise cutting edges and spring in the joint which can't be lost.

Slipping off is prevented by a limit.

Wiha Industrial electric.

• Uncompromisingly safe

Manufactured and inspected according to IEC 60900:2012, one-off testing at 10,000 V, GS mark for inspected safety, VDE certified

• Powerful

With DynamicJoint®, the special joint for energy-saving and durable excellent cutting results and OptiGrip, the reshaped grip surface for an optimal hold

• As hard as steel

Pliers head drop forged from high quality steels

• Robust and durable

Cutting edges are individually tempered and additionally induction hardened, joints are extremely wear resistant and can withstand high stresses, and have high-quality riveting.

• Ergonomic

Extra wide handle backs, with soft and hard zones perfectly distributed across the handle

• Attractive

Visually appealing design with a multi-polished head and award-winning pliers handles

Wiha Industrial electric pliers join the advantages of Wiha Industrial pliers while simultaneously ensuring one hundred percent safety when working near live parts. Wiha Industrial electric pliers are uncompromisingly safe, whether in industrial electrical assembly, maintenance, servicing or electrical installation in construction.

The award-winning design of the two-component handles comply with the latest ergonomic findings in terms of their soft and hard zone distribution and their outer geometry while simultaneously guaranteeing the utmost safety regarding the strict standards of IEC 60900 and the VDE.

Wiha Info

Wiha DynamicJoint –
A new dimension in strength and durability

- **Innovative:**
Optimised joint construction
- **Effective:**
Low loss of force means less force needed for cutting
- **Permanent:**
Optimal performance even after thousands of cuts

Safety is at the top of the list - all Wiha Industrial electric pliers fulfil the strict standards of IEC 60900 and the VDE.

1000 V
IEC 60900:2012

Approved for work in the area of live parts up to 1,000 V AC or 1,500 V DC. When working with VDE tools, observe the national safety and accident prevention regulations.

Wiha Industrial electric.

Highest safety even for non-chromed pliers.

Combination pliers and high-leverage combination pliers.

NEW

Z 01 0 09

Industrial electric combination pliers.
Individually tested protective insulation 1,000 V AC, VDE and GS tested.

Standards: DIN ISO 5746.
Manufactured acc. to IEC 60900:2012.

Head shape: Extra long cutting edge for flat and round cables.

Design: With multi-polished head. OptiGrip - the newly designed gripping surface with 'triple-point support' ensures optimal hold of the workpiece while working. Cutting edges additionally induction hardened to approx. 64 HRC. The Wiha DynamicJoint® ensures optimal transmission of hand strength to the cutting edges.

Material: High quality C 70 tool steel, tempered.

Application: General purpose pliers for gripping and holding as well as cutting soft and hard wires and cables. For all work on or around electrical components up to 1,000 V AC.

Wiha Classic.

Pipe, wire, sheet metal parts, cable, springs, nails, bolts and screws, safety rings, wire-end sleeves: the tool needs to be as diverse as the materials and tasks it faces in everyday work.

The most suitable prerequisites are supplied by the Wiha Basic range of pliers: over 80 pliers have been tested in all possible application scenarios.

And Wiha continues to perfect them: DynamicJoint for example, the progressive development of the joint construction, ensures significantly easier cutting. And the precise Wiha MagicTips stabilise and protect the circlip pliers.

Wiha Basic – tried-and-true quality at a competitive price, with an appealing design.

All-round end cutting nippers for soft wire as well as for tough cutting of hard wire.

• Powerful

With DynamicJoint®, the high quality joint construction for simple, long-term cutting efficiency

• Extra rugged, right up to the tips

With Wiha MagicTips®, the precision tips that ensure a firm hold with unexcelled stability

• As hard as steel

Pliers head drop forged from high quality steels

• Robust and durable

Cutting edges are individually tempered and additionally induction hardened to approx. 64 HRC; joints are extremely wear resistant and withstand high stresses, with high-quality riveting

• Ergonomic

An ergonomic handle shape for optimal handling

• Attractive

Diagonal cutters and cable cutters.**NEW****Z 18 0 01** BiCut Classic - switchable high-performance diagonal cutters.

Standards: Based on DIN ISO 5749.

Head shape: Semi-circular.

Design: Clever - BiCut does the job of two pairs of pliers.
Powerful - Up to 50% less hand strength required for cutting.
Power - Cutting force doubled for extremely hard materials.
Comfortable - Easily switch between the two strengths in a one handed operation.

Robust and durable - Cutter blades induction hardened up to 64 HRC.

Material: Hard as steel - Drop forged of high-quality C70 steel.

Application: For cutting various materials from soft to extremely hard, such as cables, nails, screws, bolts, wire cable, spring wire, chains, etc.

**Z 50 1 01** Classic cable cutter pliers.

Head shape: Classic cutting form.

Design: Light, energy-saving and clean cutting with specially ground precision cutting edges.

Durable cutting edges due to additional induction hardening to approx. 58 HRC.

Safety stop prevents finger injuries after cutting.

Material: High quality C 70 tool steel, tempered.

Application: Cable cutter for cutting of copper and aluminium cables without crushing, also suitable for stripping.
Not for steel cable, wires and copper conductors with hard coatings.

TriCut. Stripping pliers.

NEW

Z 14 1 01

Classic TriCut installation pliers.

Head shape: With three processing stations: For cutting and stripping.

Design: Low wear lap joint, riveted and able to withstand high loads. Diagonal cutters with durable cutting edges due to additional induction hardening to approx. 64 HRC. Ergonomic and energy-saving stripping lengthwise on the cable and the pliers, thanks to the specially cranked head. Two precision stripping stations for conductors with 1.5 mm² and 2.5 mm²

Material: High quality C 70 tool steel, tempered.

Application: Diagonal cutters for cutting soft and hard wires, as well as cables such as NYM lines 3x1.52 - 5x2.52. Flush stripping of round and damp-proof cable and stripping of conductors, even in hard-to-reach areas, e.g. in junction boxes and distribution boxes.

Crimping pliers. Precision mechanic's needle-nose pliers.

Z 60 0 01

Classic crimping pliers.

Standards: DIN ISO 5743.

Head shape: Fixed profile grooves for the relevant conductor cross-sections.

Design: Trapezoidal or semi-circular profiles for a secure connection between end sleeve and conductor. Sleeve and conductor inserted from the side.

Material: High-quality tool steel, tempered.

Application: For crimping end sleeves acc. to DIN 46228 parts 1 + 4.

Order-No.	mm	II	mm ²	g	
28330	145	5 ¼	0,25-2,5	130	5

Z 55 0 01

Classic stripping pliers.

Standards: DIN ISO 5743.

Head shape: Precision cutting edge prism for even cutting of cable insulation.

Design: An easy to use adjusting screw allows the stripping diameter to be set. Opening spring for effortless and sensitive handling of pliers.

Material: High quality C 70 tool steel, tempered.

Application: Simple stripping of cables and strands of up to ø 5 mm/ 10 mm² conductor cross-section.

Z 36 0 01

Precision mechanic's needle nose pliers with cutting edge and spring.

Standards: DIN ISO 5745.

Head shape: Straight shape.

Design: Gripping surfaces partially serrated in parts. Cutting edges additionally induction hardened to approx. 64 HRC. With spring and opening limit for effortless, sensitive working.

Material: High quality C 70 tool steel, tempered.

Application: Grip and hold as well as cut soft and hard wires and cables, popular for precision mechanics and model-making applications.

Order-No.	mm	II	○	●	g	
36483	160	6 ½	2	1.2	95	5

Details of cutting results of cutting pliers.

Symbol/Types of wire	Example	Tensile strength ca. N/mm ²
○ Soft wire	Copper, aluminium	220 - 250
● Medium hard wire	Iron nail	750 - 800
⦿ Hard wire	Spring wire, steel nails	1.600 - 1.800
⦿ Piano wire	Hardened spring steel	2.200 - 2.300

Test wires standardised in DIN ISO 5744

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

Precision mechanic's diagonal cutters.**Z 44 3 01** Classic precision mechanic's diagonal cutters with spring.

Standards: DIN ISO 5749.

Head shape: Semi-circular, swedish style.

Design: Low wear lap joint, riveted and able to withstand high loads.
Lightweight action, clean cutting achieved by specially milled precision cutting edges.

Long term cutting is achieved through additional inductive hardening to approx. 64 HRC.

With spring and opening limit for effortless, sensitive working.

Material: High quality C 70 tool steel, tempered.

Application: For almost flush cutting of soft and semi-hard wires.

Order-No.	mm	II	○	○	g	
36189	125	5	2	0.8	65	5

**NEW****Z 15 0 01** Classic diagonal cutters for plastic.

Standards: DIN ISO 5743.

Head shape: Semi-circular, swedish style.

Design: Low wear lap joint, riveted and able to withstand high loads.
Precision cutting edge with surface-ground cutting surface and cutting edge without facet.
For flush, clean cuts.

Opening spring for effortless and sensitive handling of pliers.

Material: High quality C 70 tool steel, tempered.

Application: ideal for smooth cutting of plastic parts or soft materials.

Wiha Info

Due to their moving component and their partly blank steel components, pliers require a certain amount of care:

Therefore keep the pliers joints as clean as possible and lubricate them and the blank surfaces with a drop of thin, acid-free and resin-free oil:

This ensures you can enjoy your Wiha quality pliers for a long time.

Wiha Classic.

The complete workshop range.

Water pump pliers.

Z 21 0 01 Classic water pump pliers, box type.

Standards: DIN ISO 8976.

Head shape: Narrow head, therefore also appropriate for work in small spaces.

Design: Precision adjustment joint, box type, providing optimum adaptation to object to be gripped.
Long durability achieved by additional inductive hardening of gripper jaws.

Material: High quality chrome-vanadium molybdenum steel, tempered.

Application: For gripping and holding pipes and angular profiles such as hex nuts in the installation area.

Circlip pliers for shafts (external).

Z 34 5 01 Classic circlip pliers for outer rings (shafts). With Wiha MagicTips®.

Standards: DIN ISO 5254.
Head shape: Angled form.
Design: Wiha MagicTips® – highly resilient precision tips manufactured from best ball-bearing steel.
With special surface finish to protect against rust and with a unique latching function (from size 21) that effectively prevents jumping away of the safety rings.
High wear resistance with additional hardening of tips.
Slim plier head for optimal access and a good view of the workpiece.
Spring protected in the joint, cannot be lost.
Material: High quality chrome-vanadium molybdenum steel, tempered.
Application: For fitting / removing circlips externally to / from shafts or axles.

Wiha Info

Wiha MagicTips® – Top of their class

- **Maximum grip:** The special latching function preventing jumping away of the safety rings makes the Wiha circlip pliers truly unique
- **Hard as steel:** Additional hardening of tips means high wear resistance and therefore excellent durability
- **Precise:** Precision tips of high performance steel for maximum grip and high stability

Pliers set.

**Z 99 0 007 01** Classic Circlip pliers set, 4 pcs.

Design: Wiha MagicTips® – highly resilient precision tips manufactured from best ball-bearing steel.

High wear resistance with additional hardening of tips.

Slim plier head for optimal access and a good view of the workpiece.
Weight 650 g.

Application: Set of pliers as basic set of tools for attaching retaining rings to and removing them from shafts and boreholes.

Order-No.	Series	
34708	Z 99 0 007 01	1

Wiha Classic.

The complete workshop range.

Pipe wrenches swedish style.

Z 26 0 00 Classic corner pipe pliers, S-jaw.

Standards: DIN 5234.
Head shape: S-jaw shape angled 45°.
Design: Self-clamping gripping of pipes and hex nuts at 3 points.
Torsion-free handle profile.
Adjusting nut secured to prevent loss.
Long durability achieved by additional inductive hardening of gripper jaws.
Material: Chrome-vanadium steel, tempered.
Application: Safe and secure grip on pipes and hex nuts.

Wiha Electronic.

Precision for made-to-measure work.

A calm hand is essential for working with electronic components. The Wiha Electronic pliers optimally support the user in this respect.

The sophisticated details are conspicuous: ground, razor-sharp cutting edges for smooth cuts. A handle shape that correctly positions the hand of the user. A glare-free, finely pressed pliers head for precise, safe grasping and cutting.

And all with an excellent quality and at a competitive price to which both professionals and demanding handymen will not be able to say no to.

The Electronic long-nose pliers from Wiha hold small components and bend wires.

Details of cutting results of cutting pliers.

Symbol/Types of wire	Example	Tensile strength ca. N/mm ²
○ Soft wire	Copper, aluminium	220 - 250
◐ Medium hard wire	Iron nail	750 - 800
● Hard wire	Spring wire, steel nails	1.600 - 1.800
● Piano wire	Hardened spring steel	2.200 - 2.300

Test wires standardised in DIN ISO 5744

Wiha Electronic.

- **Specially for fine work**
Glare-free, phosphate coated head, applied precision joint
- **Precise**
Precisely ground cutting edges
- **As hard as steel**
Finely pressed from high grade C70 steel
- **Robust and durable**
Cutting edges are additionally hardened up to 63 HRC
- **Sensitive**
Greater control with grasping via opening spring with fine resistance
- **Ergonomic**
An innovative handle shape for optimal handling

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

Diagonal cutters, wide shape.**Z 41 1 03 Diagonal cutters Electronic.**

Head shape: Wide, pointed head.

Design: Cutting edge with full flush cutter function.
With opening spring.

Material: C 70 special tool steel.

Application: For an absolutely flush cut of soft wires in the electronics industry.

Order-No.	mm	II	○	g	SB	
26818	138	5 ½	1.3	70		5
27391	138	5 ½	1.3	70	x	5

Diagonal cutters, narrow shape.**Z 40 0 03 Micro diagonal cutter Electronic.**

Head shape: Extra narrow, short head for working in particularly restricted spaces.

Design: Cutting edge with full flush cutter function.
With opening spring.

Material: C 70 special tool steel.

Application: For absolutely flush cutting of soft wires in places which are difficult to access in the electronics industry.

Order-No.	mm	II	○	g	SB	
26812	118	4 ½	0.8	60		5
27388	118	4 ½	0.8	60	x	5

**Z 41 3 03 Diagonal cutters Electronic.**

Standards: DIN ISO 9654.

Head shape: Wide, pointed head.

Design: Cutting edge with semi-flush cutter function, thus also appropriate for medium hard wires. Strong design for soft wires up to ø 2.0 mm.
With opening spring.

Material: C 70 special tool steel.
Cutting edges > 60 HRC.

Application: Universal small diagonal cutter for cutting soft and medium hard wires in the electronics and precision mechanical engineering industries.

Order-No.	mm	II	○	○	g	SB	
26815	138	5 ½	2.0	0.8	80		5
27393	138	5 ½	2.0	0.8	80	x	5

**Z 40 1 03 Diagonal cutters Electronic with wire trapping spring.**

Head shape: Narrow, pointed head.

Design: Cutting edge with full flush cutter function.
With opening spring and fixture for collecting ends of wires that have been cut off.

Material: C 70 special tool steel.

Application: For absolutely flush cutting of soft wires in places which are difficult to access in the electronics industry.

Order-No.	mm	II	○	g	SB	
26813	128	5	1.0	70		5

**Z 41 6 03 Diagonal cutters Electronic with wire trapping spring.**

Head shape: Wide, pointed head.

Design: Cutting edge with full flush cutter function.
With opening spring and fixture for collecting ends of wires that have been cut off.

Material: C 70 special tool steel.
Cutting edges approx. 56 HRC.

Application: For an absolutely flush cut of soft wires in the electronics industry.

Order-No.	mm	II	○	g	SB	
26825	138	5 ½	1.3	80		5
27395	138	5 ½	1.3	80	x	5

Wiha Info

Electronics pliers with cutting edges are designed especially for cutting soft to medium hard wires.

The diameters of materials which your electronics pliers are able to cut depend not only on the material selected and the hardness of the cutting edges but also depend greatly on the geometry of the cutting edges:

- Pliers with the full flush cutter function may cut off wires smoothly and flushly but are only appropriate for soft copper wires (99.85% pure copper)
- Pliers with the semi-flush and normal bevelled cutting edges function on the other hand may not cut in a totally flush manner but can cut thin iron wires or even medium hard steel wire
- You will find details of precise cutting results in the individual figures of pliers

Wiha Electronic.

Precision for made-to-measure work.

Diagonal cutters.

Z 46 0 03 Oblique cutting nippers Electronic.

Head shape: Wide, pointed head.

Design: Cutting edge with full flush cutter function.

With cutting edge at 48° for cutting obliquely from above or from the side.

Material: C 70 special tool steel.

Application: For absolutely flush cutting of soft wires in places which are difficult to access in the electronics industry.

Order-No.	mm	II	g	SB	
26833	138	5 ½	1.3	70	5
27398	138	5 ½	1.3	70	x 5

Z 46 0 03 Micro oblique cutting nippers Electronic.

Head shape: Extremely narrow, short head for working in particularly restricted spaces.

Design: Cutting edge with full flush cutter function.

Edge at 30° to face end of pliers for cutting obliquely from above or from the side.

Material: C 70 special tool steel.

Application: For absolutely flush cutting of soft wires in places which are difficult to access in the electronics industry.

Order-No.	mm	II	g	SB	
26830	118	4 ½	0.6	60	5
27397	118	4 ½	0.6	60	x 5

Needle-nose pliers. Stripping pliers.

Z 36 0 03 Pointed pliers Electronic.

Head shape: Narrow, short head.

Design: With plain inside jaws.

Width at tip is only 1.2 mm.

Material: C 70 special tool steel.

Application: For holding small components as well as for holding and angling wires.

Order-No.	mm	II	g	SB	
26801	135	5 ½	70		5
27326	135	5 ½	70	x	5

Z 49 2 03 Electronic stripping pliers.

Head shape: Wide, long head with ridged gripping surface, shears blade and firm wire stripping stations.

Design: Wire stripping stations: 0.8 / 1.0 / 1.3 / 1.6 / 2.0 / 2.6 mm, AWG 20 / 18 / 16 / 14 / 12 / 10.

With opening spring and locking mechanism.

Material: C 70 special tool steel.

Application: For gripping, cutting and stripping of wires with diameter.

Wiha Info

A variety of different pliers are required for electronics applications. Simply contact us if you require different models for other applications.

Wiha Professional ESD.

Precise in every detail.

Hard, comfortable elastomer zones ensure low friction in the movement range of the fingers

The anti-static, ergonomic handle is fixed to the pliers

Double leaf spring for sensitive working

Low glare mirror polished finish

Precision box joint with long service life

Antistatic arms made of soft, non-slip elastomer are gentle on the parts of the hand that are sensitive to pressure

Wiha Professional ESD.

- **ESD safe**

Suitable for work at ESD workstations in accordance with IEC 61340-5-1, surface resistance $10^6 - 10^9$ ohms

- **Anti-static**

Unique: all handle components are discharging (dissipative)

- **Precise**

Box joint, resistant against twisting

- **As hard as steel**

Pliers head drop forged from high quality steels

- **Robust and durable**

Cutting edges are individually tempered and additionally induction hardened to approx. 64 HRC; joints are extremely wear resistant and withstand high stresses, with high-quality riveting

- **Ergonomic**

Extra wide handle backs, with soft and hard zones perfectly distributed across the handle

- **Attractive**

Appealing design with finely polished head

Wiha Professional ESD is ideal for electronics professionals needing precise, robust pliers.

The formula for success for the pliers series is as simple as it is clever: uncompromising sharpness and hardness for flush cutting, and pleasant comfort with the handle for firm, fatigue-free grasping, holding and cutting.

The Professional ESD diagonal cutter with a broad, pointed head cut soft wires flush.

The Professional ESD needle-nose pliers are predominantly used for fine gripping and bending work.

Suitable for work at ESD workstations in accordance with IEC 61340-5-1. Safety Notice: Wiha Professional ESD pliers are noninsulated, therefore not suitable for working on live parts.

Wiha Professional ESD.

Precise in every detail.

Diagonal cutter, narrow, pointed shape.

Z 40 1 04 Diagonal cutter Professional ESD.

Standards: DIN ISO 9654. IEC 61340-5-1.

Head shape: Narrow, pointed head.

Design: Bevelled cutting edges, individually tested, also appropriate for thin, hard wires. Maximum service life of cutting edge achieved through additional inductive hardening to approx. 64 HRC.

With opening spring. Surface resistance $10^6 - 10^9$ ohms.

Material: High alloy carbon steel C 60.

Application: For cutting different hardnesses of wires in places which are difficult to access.

Order-No.	mm	II	○	●	g	SB	
26808	115	4 ½	1.0	0.6	0.3	60	5
27442	115	4 ½	1.0	0.6	0.3	60	x 5

Diagonal cutter, broad, pointed shape.

Z 41 1 04 Diagonal cutter Professional ESD.

Standards: DIN ISO 9654. IEC 61340-5-1.

Head shape: Wide, pointed head.

Design: Bevelled cutting edges, also appropriate for hard wires.

Maximum service life of cutting edge achieved through additional inductive hardening to approx. 64 HRC.

With opening spring. Surface resistance $10^6 - 10^9$ ohms.

Material: High alloy carbon steel C 60.

Application: All round electronic diagonal cutter for cutting wires of different hardnesses.

Head shape: Wide, semi-circular head.

Design: Cutting edge with full flush cutter function for virtually flush cutting.
Maximum service life of cutting edge achieved through additional inductive hardening to approx. 64 HRC.

With opening spring. Surface resistance $10^6 - 10^9$ ohms.

Material: High alloy carbon steel C 60.

Application: For virtually flush cutting of soft wires.

Order-No.	mm	II	○	g	SB	
26832	115	4 ½	1.2	60		5
27449	115	4 ½	1.2	60	x	5

Wiha Professional ESD.

Precise in every detail.

High leverage end cutting pliers.

Z 47 1 04 End cutting nippers Professional ESD.

Standards: DIN ISO 9654.
IEC 61340-5-1.

Head shape: Extra narrow, slim shape.

Design: Cutting edge with full flush cutter function for virtually flush cutting.
Maximum service life of cutting edge achieved through additional inductive hardening to approx. 64 HRC.
With opening spring.
Surface resistance $10^6 - 10^9$ ohms.

Material: High alloy carbon steel C 60.

Application: For virtually flush cutting of soft wires in places which are particularly difficult to access.

Order-No.	mm	II	○	g	SB	
26839	110	4 ¼	0.6	65		5
27452	110	4 ¼	0.6	65	x	5

Needle nose pliers.

Z 36 0 04 Needle nose pliers Professional ESD.

Standards: DIN ISO 9655.
IEC 61340-5-1.

Head shape: Straight head.

Design: Fine, semi-circular tips.
Ridged gripping surfaces.
With opening spring.
Surface resistance $10^6 - 10^9$ ohms.

Material: C 45 special tool steel, hardened and tempered.

Application: Mainly for precision gripping and bending work.

Order-No.	mm	II	A	B	D	F	g	SB	
26799	120	4 ¾	9.5	23	6.5	1.4	60		5

Z 47 2 04 End cutting nippers Professional ESD.

Standards: DIN ISO 9654.
IEC 61340-5-1.

Head shape: Wide head.

Design: Cutting edge with full flush cutter function for virtually flush cutting.
Maximum service life of cutting edge achieved through additional inductive hardening to approx. 64 HRC.
With opening spring.
Surface resistance $10^6 - 10^9$ ohms.

Material: High alloy carbon steel C 60.

Application: For frontal, virtually flush cutting of thicker, soft wires.

Order-No.	mm	II	○	g	SB	
26840	115	4 ½	1.4	65		5
27453	115	4 ½	1.4	65	x	5

Z 36 1 04 Needle nose pliers Professional ESD.

Standards: DIN ISO 9655.
IEC 61340-5-1.

Head shape: Angled at 45°.

Design: Fine, semi-circular tips.
Smooth gripping surfaces.
With opening spring.
Surface resistance $10^6 - 10^9$ ohms.

Material: C 45 special tool steel, hardened and tempered.

Application: Mainly for precision gripping and bending work.

Order-No.	mm	II	g	SB	
26802	120	4 ¾	60		5
27439	120	4 ¾	60	x	5

**Safety note:**

When working with cutting pliers –
beware of wire ends flying away.
Please wear safety glasses.

**Round-nose and flat-nose pliers.****Z 37 0 04 Round nose pliers Professional ESD.**

Standards: DIN ISO 9655.
IEC 61340-5-1.

Head shape: Round, short jaws.

Design: Smooth gripping surfaces.
With opening spring.

Surface resistance $10^6 - 10^9$ ohms.

Material: C 45 special tool steel, hardened and tempered.

Application: Mainly for precision gripping and bending work.

Order-No.	mm	II	g	SB

26806	120	4 ¾	60		5
27441	120	4 ¾	60	x	5

Set combination.**Z 99 0 001 04 Professional ESD pliers set, 4 pcs.****Dissipative tools, electrostatically discharging.**

Design: ESD tools manufactured according to IEC 61340-5-1.

All pliers of high quality tool steel, hardened and fine-polished.

Plier handles electrostatically discharge via all components.

Surface resistance $10^6 - 10^9$ ohms.

Pouch: Light and space-saving storage of tools.

Application: Universal set for all cutting work with electronic applications.

Wiha Info

A number of different pliers are required
for electronics.

Please ask us if you would like other
pliers models for further applications.

Wiha Professional ESD.

For high standards when it comes to precision and safety.

The new assortment of Wiha electronic tweezers expands the possibilities for exact, and at the same time, careful work with electronic components.

These precision, special or universal tweezers are rapidly becoming essential accessories for everyday electronics work due to their high-quality design: ESD safe (anti-static), anti-magnetic, stainless and acid-resistant.

Unlike purely metal tweezers, the special coating here ensures a controlled dissipation of static charges, and therefore safe, standard-compliant use.

Thanks to its wide selection of tips, the Professional ESD precision tweezers handle even tricky work effortlessly, for example on sensitive semiconductors.

Tweezers are important tools for any electronics technician to enable the necessary work to be carried out safely in the often small, confined structures of PCBs.

Wiha Professional ESD.

- **ESD safe**
Suitable for work at ESD workstations in accordance with IEC 61340-5-1, surface resistance $10^6 - 10^9$ ohms
- **100% anti-magnetic**
High-quality alloy made of chromium-nickel stainless steel with a high nickel content
- **Symmetrical**
Exactly harmonised, precision tips for precise work
- **Acid-resistant and stainless**
For an extra long service life
- **Non-glare surface**
Enables optimal work

**Safety note:**

Wiha ESD electronic tweezers are non-insulating, and are therefore not suitable for work on live parts.

**Universal tweezers.****ZP 01 0 14 Universal tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with a strong tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Universal tweezers for all current electronics applications.

Order-No.	mm	Typ	g	
32318	130	AA	19	10

**ZP 46 0 14 Universal tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with approx. 4 mm wide, round tip.
 Design: Fine-tooth gripping surface, grooved gripping surface.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Universal tweezers for all current electronics applications.

Order-No.	mm	Typ	g	
32343	145	40	29	10

Precision tweezers.**ZP 06 0 14 Precision tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with long, rugged tip - "American shape".
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Precision tweezers for gripping and holding electronic components.

Order-No.	mm	Typ	g	
32347	130	GG	19	10

**ZP 07 1 14 Precision tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with approx. 1 mm wide tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Precision tweezers for gripping and holding electronic components.

Order-No.	mm	Typ	g	
32325	130	PSF	18	10

**ZP 09 0 14 Precision tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with a very slim and extra-fine tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Precision tweezers for gripping and holding electronic components.

Order-No.	mm	Typ	g

32346	110	3c	14	10

Precision tweezers.

ZP 18 0 14 Precision tweezers Professional ESD.

Standards: IEC 61340-5-1.
 Tip form: Straight with a needle-fine tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Precision tweezers for gripping and holding electronic components.

Order-No.	mm	Typ	g	
32334	110	5	13	10

ZP 20 1 14 Precision tweezers Professional ESD.

Standards: IEC 61340-5-1.
 Tip form: Round curved with a fine tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Precision tweezers for gripping and holding electronic components.

Order-No.	mm	Typ	g	
32335	120	7a	15	10

ZP 20 2 14 Precision tweezers Professional ESD.

Standards: IEC 61340-5-1.
 Tip form: Round curved with short, straight, 3 mm long fine tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: Precision tweezers for gripping and holding electronic components.

Order-No.	mm	Typ	g	
32336	120	7abb	15	10

**Safety note:**

Wiha ESD electronic tweezers are non-insulating, and are therefore not suitable for work on live parts.

**SMD tweezers.****ZP 24 0 14 SMD tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with a curved 45° angle flat, narrow tip.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: SMD special tweezers for horizontal gripping of components.

Order-No.	mm	Typ	g	
32338	120	12	15	10

**ZP 25 2 14 SMD tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Straight with flat, wide tip and diagonal alignment of the front gripping edge.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: SMD special tweezers for horizontal gripping of components.

Order-No.	mm	Typ	g	
32340	120	13	16	10

**ZP 25 3 14 SMD tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Curved at a 30° angle with a flat, wide tip and straight alignment of the front gripping edge.
 Design: Smooth gripping surfaces, gripping surfaces without grooves.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: SMD special tweezers for horizontal gripping of components.

Order-No.	mm	Typ	g	
32337	120	8b	16	10

SMD tweezers.**ZP 50 0 14 SMD tweezers Professional ESD.**

Standards: IEC 61340-5-1.
 Tip form: Curved at a 35° angle with an approx. 2 mm wide tip, formed gripping end for 0.8 mm dia.
 Design: Smooth gripping surface, grooved gripping surface.
 Non-glare black coated, anti-static.
 Anti-magnetic and acid-resistant.
 Surface resistance $10^6 - 10^9$ ohms.
 Material: Special alloyed, non-rusting, chromium-nickel stainless steel.
 Application: SMD special tweezers for gripping and holding horizontally-designed components.

Order-No.	mm	Typ	g	
32344	117	59	14	10

**ZP 99 0 140 02 SMD tweezer set Professional ESD, 4 pcs.****Dissipative tools, electrostatically discharging.**

Design: ESD tools manufactured according to IEC 61340-5-1.
 All tweezers are ESD-safe (anti-static) via a special ESD coating, acid-resistant, non-rusting and 100% anti-magnetic.
 Surface resistance $10^6 - 10^9$ ohms.
 Case: No danger to electronic components with use of ESD-safe materials.
 Tough, space-saving metal box.
 Application: Hand assembly of PCBs with SMD components or re-work activities.

5590N Insulated single-sided open-end spanner.
Protective insulation 1,000 V AC.

Standards: DIN 7446.
Manufactured according to EN/IEC 60900:2012.
Design: Position of jaws angled downward 15°.
Material: Forged chrome vanadium steel.
Application: Safe installation of terminals and sleeves.
For all work on or around electrical components up to 1,000 V AC.

Insulated tools.

**7207N K1001** 3/8" reversible ratchet set, 10 pcs.

Protective insulation 1,000 V AC.

- Standards: Manufactured according to EN/IEC 60900:2012.
- Design: Simple locking of the actuating tools with positive locking on the drive square. Clockwise and anticlockwise running.
- Material: Chrome vanadium steel.
- Case: Practical, rugged plastic box.
- Content: Orderly, clearly laid-out arrangement of the tools for fast, clean work.
- Insulated tools:
- Insulated 3/8" reversible ratchet, 190 mm (246N 02 series)
 - Insulated 3/8" extension, 125 mm (7210N series)
 - Insulated 3/8" nut driver inserts, metric
- Ratchet with simple locking of the actuating tools with positive locking on the drive square; clockwise and anticlockwise running.
- Application: Safe installation of terminals and sleeves.
- Note: For all work on or around electrical components up to 1,000 V AC. Use of the nut driver inserts and extensions is only permitted with an insulated reversible ratchet.

Wiha Info

Explanation of the colour-code system

Wiha makes it easy to differentiate between different levels of hammer face hardness with its colour coding system.

Application	Material	Hammer face
For sensitive materials: Window construction, light metal construction, furniture and interior fittings industry, light assembly, tradeshow construction	Elastomer	soft 
For sturdy applications: Tile laying, paving, curbstone setting, prefabricated house construction, light gardening and landscaping setting tasks	Rubber	medium-soft 
For universal applications: Tool and machine construction, metal working, automobile repairs, panel beating, sheet metal and assembly work.	Polyurethane	medium-hard 
For heavy-duty: Assembly and disassembly, sheet metal work, building and construction work, workshop tasks	Cellulose acetate	hard 
For striking power: Building and construction industry, foundry, mould making, road work, forestry and agriculture, gardening and landscaping	Polyamide	very hard 

○ = Round face
 □ = Square face

Wiha Safety soft-face hammer.

Perfect safety in every detail.

Safety Concept:
All parts are interlocked and clamped together by means of a nut and bolt assembly.

The specialty of the Safety Programme lies in the multitude of different colour coded hammer faces. These can, for different applications, be selected to suit your size and hardness requirements. This tool allows you to use single strikes on softer materials such as soft woods, plastics or aluminium as well as allowing for powerful repeated strikes required in foundries and tough industry applications.

Depending on the size and weight of the tool there are different hammer face options available.

All Safety Tools are equipped with hardwood Hickory handles. Due to its high strength properties, Hickory has proven itself over the years as the ideal handle material.

The Wiha Safety soft-face hammer with black/white faces is the professional helper for garden and landscaping work.

The ergonomic outline of the handle in combination with the oval shape and special finish ensure that even with sweaty or slippery hands, the handle will not rotate or slip.

The powder-coated safety shells made from malleable cast iron clamp the head and handle securely together. The 840 mm long sledge hammer is the ideal length for special applications, e.g. for rail-track construction.

Wiha Safety soft-face hammer.

- Safety hammer with interchangeable faces of different hardnesses makes it the most suited hammer for all applications
- Nuts in the face and grooves in the shell provide a secure connection of the hammer housing
- High strength hickory handle guarantees longer tool life
- Each hammer piece is also available as a spare part

Wear safety glasses and protective gloves when working with soft face hammers. In addition, observe the national standards and regulations.

Wear safety glasses and protective gloves when working with soft face hammers.
In addition, observe the national standards and regulations.

Hammers with identical faces.

832-33 Safety soft-face hammer, black/ black.

Faces: Black: Medium soft, wear-resistant caoutchouc (rubber).
Housing: Powder coated safety shells made from malleable cast iron with grooves to clamp faces and handle in place.
Shaft: Hickory handle with ergonomic profile and non-slip surface.
Standards: GS-mark: Tested safety.
Application: Tile laying, paving, curbstone setting, dry wall construction, light gardening and landscaping setting tasks.

Wiha dead-blow hammer.

A star in the world of recoilless tools.

Wiha has now put an end to the familiar problems associated with the stress on joints and muscles when working with recoiling hammers. The Wiha dead-blow hammer has a special filling in the hammer casing to prevent recoil.

Professionals who use these hammers on a continuous basis, for example, in tool and die shops or in body maintenance and sheet-metal work, appreciate the benefits of this recoilless hammer from Wiha.

The face is made of medium-hard polyurethane for full blows and protects delicate surfaces and edges.

The special metal filling in the hammer casing enables recoilless working.

Simple replacement of outworn hammer faces:
1. Secure the hammer in the vice, lift away the old hammer face.
2. Press in the new hammer face in the vice.

Wiha dead-blow hammer.

- Recoilless working due to special metal filling in the hammer casing
- The hammer weight is increased by about 25% for additional power
- Easy on delicate surfaces and edges as a result of its comfort cushioning surface
- Available with hickory wood handle or steel tube shaft
- Faces and wooden handles available as spare parts

Wear safety glasses and protective gloves when working with soft face hammers. In addition, observe the national standards and regulations.

Wiha dead-blow hammer.

A star in the world of recoilless tools.

Hammers with wooden handle.

NEW

8001 Dead-blow hammer with hickory handle.

Faces: Both are white: very hard polyamide (Nylon®), colourfast and wear-resistant.
Housing: Manufactured from precision steel tubing with welded on shaft, powder coated.
Shaft: Hickory handle coated with ergonomic profile and high quality surface.
Standards: GS-mark: Tested safety.
Application: Controlled strikes e.g. on workpieces being held by vices or assembly work.
Extra: With cast iron balls inside the hammer head for recoilless work.

maxiflex system \varnothing 1/4"	348
maxiflex system \varnothing 1/2"	349

Wiha fibre-glass-reinforced callipers.

Precision made in Switzerland.

Play free motion of the sliding components through precision design for precise measurement results:

1. Fixed position
2. Flexible spring component

Wiha fibre-glass-reinforced callipers.

The Wiha callipers from the "max" range are manufactured since 1965 with Swiss precision. Due to the unique advantages made available by the non-metal, high-tech material with 50% fibre-glass component, the callipers have found new applications where their advantages are distinct when compared to the more heavy metal designs.

They are particularly suitable for measuring high-quality and highly sensitive objects.

These measuring tools are also ideal for all metal, wood and plastic-processing applications, for field staff and service engineers. Thanks to their antimagnetic properties, Wiha callipers prevent measuring surfaces from becoming soiled by metal filings, which could impair the accuracy of measurements. Since they are

The dialMax ESD calliper can be used for measuring delicate electronic components.

made of non-corrosive material, Wiha callipers can also be used in damp working environments.

With the Wiha dialMax ESD callipers, measuring at ESD workstations and in ESD protection zones is now possible for the first time.

The measuring jaw of the fibre-glass reinforced calliper enables scratch-free measurement of even very delicate, shiny surfaces.

- **Permanent**
 - very rigid with 50% fibre-glass component
- **High tech material**
 - non-metallic
 - non-corrosive
 - non-magnetic
 - minimum thermal conductivity
 - electrically insulating
 - resistant to chemicals
 - temperature resistant measuring surfaces: temporarily to 180°, permanently at 100-120°
- **Versatile applications**
 - highly sensitive measurement objects
 - electronic components
 - sensitive surfaces
 - model making and prototype production
 - food industry
 - ESD protective zones
- **Precise**
 - practical ratchet guarantees equally balanced clamping force of the measurement jaws

digiMax and caliMax.

411 170 1 Digital calliper digiMax, reading 0.01 mm.
Blister packed.

Material: Non-metallic high-tech material with 50% fibre-glass content.
 Scale: 5-digit digital display with 7.5 mm numeral height for easy reading.
 Reading: 0.01 mm as well as 0.0005 inch.
 Standards: CE compliant.
 Application: For outside, inside and depth measurements.
 Extra: Switches off automatically after 5 minutes of non-use.
 Zero setting possible in every position for quick comparison measurements. Battery with approx. 2-year service life included.

Order-No.				
29422	150	6	48	5

411 320 3 Vernier calliper caliMax, reading 0.1 mm.
Blister packed.

Material: Non-metallic high-tech material with 50% fibre-glass content.
 Scale: Vernier for millimetre and inch display.
 Reading: 0.1 mm as well as 1/64 inch.
 Application: For outside, inside and depth measurements.
 Extra: Almost parallax-free reading of the measurement value.
 Vernier scale in green ensures a good contrast for simple reading.

Order-No.				
27083	150	6	45	10

dialMax and dialMax ESD.

411 210 2 Analog calliper dialMax, reading 0.1 mm.
Blister packed.

Material: Non-metallic high-tech material with 50% fibre-glass content.
 Scale: Dial, diameter 35 mm.
 Reading: 0.1 mm; 1 dial rotation represents 10 mm.
 Application: For outside, inside and depth measurements.
 Extra: Impact resistant dial can be recalibrated to zero.

Order-No.				
27082	150	6	45	5

411 210 8 Dial calliper dialMax ESD, reading 0.1 mm.
Blister packed.

Material: Calliper made of ESD-safe material.
 Non-metallic high-tech material with 60% fibre-glass content.
 Surface resistance $10^6 - 10^9$ ohms.
 Scale: Dial, diameter 35 mm.
 Reading: 0.1 mm; 1 dial rotation represents 10 mm.
 Standards: IEC 61340-5-1.
 Application: For all work with electrostatically endangered components.
 For outside, inside and depth measurements.
 Extra: Measurements in ESD protection zones and at ESD workstations.
 Impact resistant dial can be recalibrated to zero.

Depth measuring

Wiha Longlife® Plus Composite.

Maximum flexural strength.

Wiha Longlife® Plus Composite.

- **Extremely rigid!**
 - Absorbs bending forces
 - Minimises risk of breakage
- **Extremely durable!**
 - No swelling with water contact
 - Resistant against many chemicals
- **Lasts up to 10 times longer!**
 - Rigidity ensured by longitudinal glass fibres
 - Weatherproof and temperature-resistant plastic
 - Wear-resistant joints
 - Metal ends cannot be lost (protective function)

Longlife® Plus Composite redefines measuring with folding rulers. With a very high level of rigidity as known from high-grade beech wood rulers, this folding ruler

features increased measuring precision: precision class II has only been achieved until now by metal rulers and measuring tapes.

LongLife Plus Composite

NEW

410 2005 Longlife® Plus Composite, folding ruler, 2 m, 10 segments. With metal ends.

Material: Composite design: two top layers made of longitudinal glass fibres absorb bending forces and ensure more rigidity than wooden rules. No swelling with water contact, resistant to chemicals.

Joints: Play-free, wear-free and dirt-resistant joint with spring pin for constant tension. Tight 90° and 180° latching of all joints.

Scale: Red/black version: Deep-embossed white scale in 1 mm increments
Grey/white version: Deep-embossed black scale in 1 mm increments, every 10 cm is marked in red

Accuracy: CE conformity, EU standard accuracy class II.

Extra: Metal ends which cannot be lost on the first and last segment. Readable from both sides through a second, backwards running scale (Recto Verso).

NEW

LONG PLUS
LIFE

LONG
LIFE
ALL IN ONE

LONG
LIFE

The world's first folding ruler made of high-quality fibre-glass material was developed and manufactured in 1968, and since then has been successfully marketed under the "Longlife" name.

Its characteristic joint with perfect long-life characteristics is still unique today.

The Polyamide reinforced with 30% fibre-glass makes the Longlife® folding ruler water resistant and scratch and score-proof.

Compared to wooden folding rulers a substantially higher service life is attained.

A deep embossed, precise scale on every segment contributes to the excellent performance characteristics.

Angle gauge

Wiha fibre-glass-reinforced folding rulers.

- **Permanent – Longlife**
 - no swelling from contact with water!
 - distinctly longer service life compared to wooden folding ruler
 - resistant to chemicals, washable
- **Longlife Plus**
 - red joint bodies for improved legibility
 - wear-resistant metal ends
 - backwards running scale
- **Longlife All in One**
 - angle measurement function
 - depth measurement function
- **Exact**
 - CE conformity and Swiss precision for all rulers

Wiha articulated hose system.

The universal pipe system.

maxiflex®

The Wiha maxiflex® universal articulated hose system is dimensionally stable, individually adjustable and has a long service life.

Wiha maxiflex® is a universal articulated hose system with maximum flexibility.

The broad range of hose joints, nozzles, connections, junctions and stop valves supply perfect solutions for every cooling or lubrication task.

A high quality and indestructible plastic, extensive design knowledge and precise manufacturing of all components ensures that this articulated hose system can be adapted for each individual application in day-to-day practice. With tight fitting components, maxiflex® is dimensionally stable, meaning no altering under pressure or via machine vibrations.

Unrestricted flow design

Assembly pliers and separation wedge

Wiha articulated hose system.

Permanent

- high quality, indestructible, dimensionally stable plastic
- resistant to chemicals and solvents
- is not an electrical conductor

Universal use

- cooling and lubrication for sawing, drilling, milling, grinding and machining processes
- blowing out and drawing in of air
- conducting of solvents
- positioning of auxiliary aids (so-called third hands)

Flexible

- adapter solutions for other hose systems

Precise

- Swiss precision with articulated hose assortment

Wiha articulated hose system.

The universal pipe system.

Wiha VDE tools.

VDE in detail.

Wiha Info

What is VDE?

The VDE Testing and Certification Institute is a nationally and internationally accredited institution in the field of testing and certification of electrical engineering devices, components and systems. These electrical products are tested for safety, electromagnetic compatibility and other product properties.

VDE-GS Mark

Technical working equipment and consumable materials subject to the applicable device and product safety laws bear the VDE-GS mark, which stands for the safety of the product with regard to electrical, mechanical, thermal, toxicological, radiological and other dangers.

In addition, tools with the VDE-GS mark conform to the VDE regulations or European or internationally harmonised standards, i.e. they confirm the compliance with the safety requirements of the respective guidelines.

1000 V

Double triangle and voltage range

If insulated tools or aids are marked with the symbol of the double triangle and the assigned voltage or voltage range specification or the class, they are suitable for working on energised parts.

IEC 60900:2012

IEC 60900:2012

An international standard which, among other things, describes the design of insulated tools in detail. For example, the thickness of the protective insulation is specified. In addition, the standard defines individual tests (piece tests) as well as series and random sample tests for checking the electrical safety of the protective insulation.

Wiha VDE tools are subjected to extremely demanding safety test methods.

Safety test method according to IEC using the example of a pair of Wiha pliers

Voltage test (piece test)

Wiha VDE tools are tested individually. All tools with the special marking were tested with 10,000 V AC and are therefore approved for 1,000 V AC (and 1,500 V DC). This means: ten-fold safety.

Cold shock test

The tools are cooled down to -25 °C. The insulating material must retain its toughness in the process so that it does not break when subjected to impacts and jolts.

Testing the electrical insulating properties

The tools are stored in water for 24 hours. Then they are tested at 10,000 V AC for three minutes. Neither a sparkover nor a disruptive discharge through the insulation may occur.

Testing the adhesion of the insulating material coating

To test the adhesion of the insulating coating, the adhesion is tested with a tensile force of 500 N following storage for 168 hours at 70° C. When doing so, the insulating material must continue to be firmly connected to the basic tool.

Pressure tests

No disruptive discharge may occur at a pressure load of 20 N, a temperature of 70° C and a test voltage of 5,000 V AC.

Testing the combustion behaviour

A flame is pointed at the tool for ten seconds. The insulating material may then not continue to burn, but instead must extinguish.

Protective measures

For all work on or near live parts, use the following required for the respective work

- insulating personal safety equipment,
- insulating safety equipment and
- insulated tools.

Work should generally not be carried out on live active parts of electrical systems and electrical equipment. As a result, the parts must be deenergised before starting work and this state must be ensured for the duration of the work.

This is done by complying with the five safety rules.

Before beginning work:

- Isolate
- Protect against being switched on again
- Determine deenergised state
- Earth and short-circuit
- Cover or block access to neighbouring live parts.

Innovation

We break new ground.

*Innovative ideas
and actions are the
driving force behind
our success.*

The innovation of our employees

We regard innovation as an important basis if we are to meet the ever changing market requirements. We create this basis by giving our employees the freedom to act upon their own initiative within the existing, flat hierarchical structure of the company.

In this way, we can operate in a more targeted and individual manner in order to fulfil your wishes and requirements.

The innovation of our processes

Process optimisation ultimately delivers the greatest benefits for you. By putting new innovations into practice, we are able to improve and automate manufacturing and production methods. Process optimisation enables us to reduce manufacturing costs without compromising on the quality of our products.

In this way, we can guarantee you lower costs and faster processing.

The innovation of our products

We break new ground. Particularly today when market requirements are changing at an ever more rapid pace, we understand that our challenge is to meet these requirements. Product innovation represents both the basis and the result of our endeavours. This is manifested in numerous patents and unique selling points.

We believe in our own innovative strength. We also want to do justice to you.

100% innovation

- We are directly responsible for our work and have the necessary freedoms to be able to transform your requirements into specific solutions.
- With the help of new manufacturing methods and machines, we realise new ideas in order to offer you high-quality products.
- Process optimisation improves the processing channels and enables us to act more quickly.
- In all areas, innovation forms the basis for meeting your requirements and for penetrating new markets. This is our challenge.
- Our employees create the basis for our innovations.

Quality

Quality starts with the very first contact.

Our employees deliver high-quality products and services on a daily basis.

The quality of our employees

Quality starts with the very first contact. For us, quality means more than just product quality. First and foremost, the quality of our employees establishes the basis for the high quality of our products. This is achieved by means of teams of employees working independently and with direct responsibility.

Ongoing education and support strengthen the commitment and qualification of our employees. Our employees are skilled professionals in whom you will be happy to place your trust.

We should like to impress you with our service competence.

The quality of our processes

Optimisation of the company work processes is another basic principle.

In order to be able to process your requests/wishes competently and more quickly, we work according to strict goals and objectives. Our processes are checked, re-selected and optimised systematically so as to increase quality even more. By means of the highest possible readiness to deliver and a comprehensive service, we guarantee your full satisfaction.

The quality of our products

Our products are characterised by maximum quality, mature function and innovative design.

We guarantee this claim by using only carefully selected materials and by making ongoing improvements to the quality guidelines.

Find out for yourself and benefit from our professional expertise.

Wiha tools are manufactured to the highest standards. Many years of cooperation with the licensors for TORX®, TORX PLUS®, ACR/AOT, Tri-Wing®, Torq-Set® and Pozidriv give you maximum fitting accuracy of fastening tools in screw heads. True to our motto: Wiha – premium tools.

100% quality

- Independent work as part of a team, with each team player carrying direct responsibility, increases our flexibility and commitment.
- Our quality is characterised by strict guidelines in both the HR and manufacturing areas.
- We work closely with both office and field staff, thus guaranteeing effective communication. And you benefit from our quality.

Reliability

Agreements are binding and we stick to them.

*We are an efficient, reliable partner.
Put us to the test...*

100% reliability

- Our reliability is a result of the conscientiousness and willingness of our employees.
- We keep our promises, and do so with competence and reliability.
- We guarantee good value for money.
- Expert advice and sales support is the basic principle that enables us to meet your requirements.
- We guarantee that we'll keep to the agreed dates and appointments, and this does not just apply to the delivery service for our products.
- Reliability is one of our basic principles for ensuring our availability for you.

The reliability of our employees

The manufacture of quality products involves putting not only the quality and durability of the products to the test, but the service associated with the product also has to be just right.

Reliability is an important basis that is further strengthened by the conscientiousness and willingness of our employees. For us, agreements are binding and we stick to them. You benefit from the expertise of our competent, professional employees, as well as from our specialisation.

We want to establish a relationship of trust with you in order to further promote collaboration.

The reliability of our processes

Our manufacturing reliability guarantees top quality. The ongoing modernisation of manufacturing processes enables us to meet your demands. Our processes are determined by structured and consistent communication, the ability to meet deadlines and by dependable delivery dates.

Your enquiries are handled individually and competently. We take your deadlines seriously.

The reliability of our products

Whether you have questions about our products or the appropriate presentation, our office and field staff are there for you.

For us, product training and education are all par for the course. We'll advise you quickly and competently. Reliability is no coincidence.

We only work with selected suppliers in order to be able to offer you optimum product quality. We guarantee ongoing quality and functional reliability, both today and tomorrow.

Our products live up to expectations.

Wiha product innovations.

iPOSS – Perfect Presentation

Best Practice Compositions

New iPOSS Modules

New iPOSS Modules

Leverage on the new flexibility of modules.

Sales Panel. Design it Yourself.

Wiha General Terms of trading.

Terms and conditions of sale, delivery and payment. Effective as of March 2007.

1. Validity. These terms and conditions shall be binding in respect of all orders. Any departures from them or secondary verbal agreements shall be valid only if confirmed by us in writing. We will not accept the terms and conditions of the customer even if we do not expressly refuse to accept them. By placing his order the customer acknowledges our terms and conditions. Events beyond our reasonable control and instances of force majeure shall release us from commitments entered into.

2. Offers. All offers are made without obligation. Our currently valid catalogues or price lists form an integral part of our offers. Samples are invariably supplied against payment.

3. Orders. Orders shall not be deemed accepted by us until we have confirmed them in writing. This provision shall also apply to orders taken by our representatives. The acceptance of an order does not place us under any obligation to accept follow-on orders under the same conditions.

4. Prices. Prices are quoted in Euros (€), excluding value-added tax at the statutory rate. Prices are quoted without obligation and are applicable to delivery ex works, excluding packaging. If the agreed delivery date is more than 6 weeks after the time the purchase agreement is concluded, we reserve the right to make appropriate adjustments to our prices due to general increases in wage, material or marketing costs or if higher rates of public taxes and similar charges are imposed. All prices are basic prices; in the event of resale by the trade, however, they are non-binding target prices and do not constitute a price recommendation.

5. Delivery. All deliveries are made at the risk of the consignee even if delivery is agreed carriage paid to destination. Deliveries shall be made for the account of the consignee. We will effect delivery using the method of shipment considered most suitable for the goods in question. For small orders up to a net value of EUR 300.00, we will invoice an administration and delivery fee of EUR 6.00. Goods with a net value of EUR 500.00 or more will be supplied to foreign customers free to the German border or FOB German sea port, including packaging. Deliveries of goods with a lower value will be made ex works excluding packaging. In the case of orders that do not conform to our packaging units we reserve the right to deliver the goods in a manner compatible with our packaging units, otherwise a surcharge of 10% will be

charged.

6. Delivery lead time. As a general rule, we deliver all articles listed in our catalogue ex warehouse or within a few days. In all other cases, we will state the anticipated delivery lead time, which depends on our workload; however, we shall not be bound by the lead time quoted. If the lead time is exceeded by us the customer may, to the exclusion of all other claims, withdraw from the contract upon the lapse of a reasonable extension allowed by him. Partial deliveries shall be permitted. If performance is delayed for reasons attributable to the customer, we shall not be bound by our delivery dates. If the customer does not take remedial action immediately, we shall be entitled to claim compensation for the additional costs incurred by us or withdraw from the contract after the lapse of a reasonable extension.

7. Terms of payment. Our invoices are payable within 10 days of the date of the invoice less 2% discount or net within 30 days from the invoice date. Invoices for goods with a value of less than EUR 50.00 are due for payment immediately and without any deductions. Payments by cheque, bank transfers or cash payments made against presentation of a bill made out by us and accepted by the customer shall be deemed to have been effected after the bill has been honoured by the drawee thus discharging us from any liability under the bill. The agreed reservation of title shall remain effective in our favour until the bill has been collected.

8. Property rights. We reserve title and copyright in illustrations, drawings and other documentation.

9. Reservation of title.

9.1 All deliveries will be made with reservation of title. The products delivered (reserved goods) shall remain our property until the customer has met all his obligations arising from the contractual relationship with us. The risk of loss of or damage to the reserved goods shall be borne by the customer, also during the period this reservation of title is effective.

9.2 During the time this reservation of title is effective the customer shall not be entitled to pledge the reserved goods or to assign them by way of security. The customer is entitled to sell the goods owned by us (reserved goods) in the normal course of business. However, the customer already cedes all accounts receivable from this resale to us.

9.3 Processing or alteration of the reserved goods is without obligation to us as a manufacturer as per Section 950 of

the German Civil Code. If the reserved goods are processed together with other objects, we shall acquire a co-ownership in the new object in the ratio of the current market value of our goods to the value of the other processed objects at the time of processing. The customer will store the new object for us with due care and attention free of charge.

9.4 If the value of all security interests we are entitled to exceeds the amount of all secured claims by more than 20%, we will release a corresponding portion of the security interests at the written request of the customer.

9.5 The customer shall inform us without delay in case of garnishments, confiscations or other court orders or interventions by third parties.

9.6 If the customer violates contractual obligations, particularly if the customer is in payment default, we shall be entitled, after an appropriate deadline that we set for the customer to make payment lapses without success, to withdraw from the contract and demand the return of our goods. The legal provisions regarding the dispensability of setting a deadline shall remain unaffected. The customer shall be obligated to surrender the goods.

10. Warranty for defects. The customer shall be entitled to warranty claims under fully commercial business transactions only if he has discharged his obligations in respect of examination and notification of defects without delay and as prescribed by Section 377 of the German Commercial Code (HGB). Any defects in the purchased goods for which we are responsible shall be repaired or a replacement supplied, at our discretion. The warranty refers to the condition of the goods upon delivery. Subsequent damage due to normal aging, wear or excessive use is not covered by the warranty.

Liability for harm to life, limb and health due to a culpable breach of obligations by us, one of our legal representatives or one of our agents shall neither be excluded nor limited. We shall be liable for such harm on the part of our contractual partner only if said harm was due to an intentional or grossly negligent breach of obligations by us, one of our legal representatives or one of our agents. If we caused the harm only due to simple negligence, we shall be liable only if the harm was due to a violation of key contractual obligations, limited to the harm that is reasonably foreseeable and typical for this type of contract.

Further claims by the customer shall be excluded, irrespective of their legal grounds. The exclusions of liability shall also apply in all cases to consequential damage. The above exclusions of liability

to not apply to claims based on the Product Liability Act.

11. Returns. Perfectly packaged goods from the current catalogue which do not require any further processing will be credited with a deduction of up to 20% of the corresponding order value.

12. Dimensions and weights. The dimensions, drawings and illustrations contained in offers, brochures, catalogues and price lists shall not be binding and may be modified by us without further notice. All dimensions are quoted in mm and all weights in g.

13. Special manufacture. In the case of special manufacture, we reserve the right to deliver up to 10% more or less. Orders for special products cannot be cancelled. The same provision shall also apply to series production articles if they were ordered with a special symbol or special marking.

14. Place of performance and jurisdiction. The place of performance for deliveries and payments shall be Schonach/Schwarzwald (Germany). All disputes arising from the business relationship shall be referred to the court under whose jurisdiction Schonach falls.

Subject to technical changes.

All illustrations and graphics, specified dimensions and values and references to standards, e.g. DIN/EN, are non-binding. Any liability claims based on this will therefore be rejected.

No liability claims will be accepted for printing errors and mistakes which have occurred during the production of the catalogue.

All property rights to the catalogue held by Wiha Werkzeuge GmbH are reserved. The printing or copying of the texts and illustrations contained in this catalogue or its design is prohibited.

Our General Terms and Conditions (Terms of Sale, Delivery and Payment) apply.

TORX®, TORX PLUS® = Registered Trademarks of ACUMENT Global Technologies B.V.

ACR/AOT, Tri-Wing®, Torq-Set® = Registered Trademarks of Phillips Screw Company

Pozidriv = Registered Trademark of European Industrial Services Ltd.

Wiha information system

Wiha product information.

On these pages you will find important information you need to know to use and order our products correctly and easily.

308 SoftFinish® slotted screwdriver. Hex blade with hex bolster.

- Blade: High quality chrome-vanadium-molybdenum steel, through hardened, chrome-plated.
Wiha ChromTop® finish on tip for a perfect fit every time.
- Handle: Ergonomic Wiha SoftFinish® multi-component handle with roll-off protection.
- Standards: DIN 5265, ISO 2380.
- Application: Especially for dry and general applications.

Article information

Wiha product search system.

The catalogue contains five different search systems:

1. Product groups.

On page 5 you will find an overview of all product groups.
2. Based on product lines.

You can find a short summary based on product lines on page 4.
3. Tips styles.

On pages 324 to 325 you will find a matrix with all tip styles.
4. Order number.

On pages 334 to 341 you will find all order numbers in a numerical index.
5. Series number.

On pages 342 to 343 you will find an overview of the Wiha article series in a numerical index.
